BIO-BIBLIOGRAPHY
OF
XVI. CENTURY MEDICAL
AUTHORS

By
CLAUDIUS F. MAYER, M. D.
Editor of the Index-Catalogue

UNITED STATES
GOVERNMENT PRINTING OFFICE
WASHINGTON : 1941

PREFACE

For centuries the study of the product of early printing has been a favorite occupation of professional and amateur students of the printed letter. Monumental works have been published, thousands of volumes have been written; not a single phase of early book production has been neglected by historians and bibliographers. The books have been listed, and described minutely, from their first to their last blank leaves, from their titles to their last lines and colophons; their initials, woodcut illustrations, printers' marks, the very shape of their letters, even the water-marks on their stiff paper leaves have been carefully examined. Not a few of these detailed studies were done by medical men, and the works describing the incunabula of medical printing by such men as *Sudhof*, *Osler*, *Klebs*, and others, are as important for the medical librarian today as were the fundamental lists of *Hain*, *Panzer*, or *Proctor*, before the publication of the *Gesamtkatalog der Wiegendrucke*.

While there are many thousands of reference works devoted to the 15th-century products of printing, and while one may get a fairly complete view of the entire period of world literature "in cunis," one will be much disappointed when tracing the publications of 16th-century authors. Although scattered information on 16th-century literature is available in a small number of bibliographies, booksellers' catalogues, lists of libraries, or biographical encyclopaedias, the knowledge, communicated by them is neither exhaustive, nor exact, not to mention the disadvantage of having to spend days and weeks in a search of these sources.

Amateur medical historians seldom cared for anything closely approaching a complete bibliography of an obscure 16th-century physician, and professional medical bibliographers rarely had the opportunity for the compilation of the complete list of works of a single medical author even, yet some outstanding works on the field of personal bibliography have been produced in the last few decades. These include, for example, the Paracelsus bibliography of *Sudhof*, and the Paré bibliography of Janet *Doe*. Several libraries have been engaged in listing their holdings of 16th-century books, e. g., the Library of the British Museum, and the John Carter Brown Library. Listing of the books printed in the 16th century, and owned by the Library of the New York Academy of Medicine is also in progress. Thus the number of reference works related to 16th-century printing is gradually increasing, and the trend of the bibliographical interest is towards that neglected era of literature.

Seven or eight years ago, Professor Henry E. *Sigerist*, the director of the Johns Hopkins Institute of the History of Medicine, suggested an English translation of *Choulant's* *Bücherkunde für die ältere Medizin*, a completely new Choulant made in English, with the bibliography brought up to date. In his preface, *Choulant* exposed his scheme of describing the biography and bibliography of medical men in chronological order to the end of the Middle Ages. His original scheme, however, was left unfinished, and his work ends with the Arab medical authors of the 12th century. For the 15th-century medical literature and medical authors there are nevertheless several reliable, correct bibliographies and biographies available for consultation. It seemed to be more alluring, therefore, to continue the study of medi-

cal authors in the chronological order and in the manner of description of *Choulant*, beginning the bibliographical search with the 16th century.

The idea of such a bibliographical study would appeal to any medical librarian who feels that by virtue of his office and under the compelling urge of the books surrounding him he has certain obligations, perhaps we may call them moral ones, far above the needs of his daily routine. In the Army Medical Library, with hundreds of thousands of medical books in front of him and behind his back, the Editor of the Index-Catalogue could not feel otherwise.

In spite of this urge the realization of the idea of a 16th-century bibliography had its difficulties. A bibliographical supplement to the Index-Catalogue somehow did not seem to fit into the older scheme of the functions of the library. In the last five years, however, the functions of the Army Medical Library have grown much and have widened considerably, and the present Librarian has been thoroughly in sympathy with the amplification of the scope of its activities. These include some nation-wide projects such as a planned Union List of Medical Publications for the U. S. A., eventually becoming an International Bibliographical List of Medicine, in addition to the work now under way and exemplified in the following pages.

Only among such circumstances, with an encouraging and clear understanding for the functions of a living institution and for its national and international bibliographical importance, was it possible to depart from the traditional style, and to begin printing bibliographical supplements in the Index-Catalogue.

The first of these supplements was a Tentative List of National and International Scientific and Medical Congresses. Then, a few pages of the present Bio-Bibliography have been issued, with the object of learning whether such a publication, in the form offered, would be favorably received. Private letters, reviews in bibliographical journals, and personal interviews not only encouraged the continuation of the Bio-Bibliography of 16th-Century Medical Authors, but a number of medical libraries expressed their willingness to cooperate in making this bibliography a sort of Union List for medical publications of the 16th century.

The present fasciculus gives the first half of letter A of the 16th-century medical authors. Further fasciculi will be published regularly, and the entire work should be finished after several years, provided the circumstances remain favorable. The outline and scope of the entire work as well as the mode of describing the authors and the single works are explained in the introduction.

WASHINGTON, D. C., *June 30, 1941.*

CLAUDIUS F. MAYER, M. D.,
Editor of the Index-Catalogue,
Assistant to the Librarian,
Army Medical Library.

INTRODUCTION

OLD medical books interest many people of diverse occupations: bibliophiles, booksellers, and bibliographers in general; physicians, historians, and librarians in particular. Their wish to know more about a book and its author leads them to search biographical encyclopaedias, catalogs of libraries, national and regional bibliographies, textbooks of histories of general and medical literature, and other possible sources of information. Names of persons and places have to be identified, fictitious dates to be corrected, catalogs of book prices to be consulted, and many other details to be investigated. Even though the needed reference works are at hand this research consumes a great deal of time, often resulting in a complete disappointment to the investigator, because his biographical reference works are incorrect or their statements contradictory, his bibliographical sources apparently faulty, and his textbooks of medical history superficial and erroneous in both a biographical and a bibliographical sense.

It is for the sake of all those interested in the older medical literature that the project of issuing a series of bio-bibliographical reference works to the 16th, 17th, and 18th century medical authors has been planned. Such bio-bibliographies will save time by bringing together into a single reference work all the details, which are now scattered through thousands of publications.

The Army Medical Library is a logical place for such a medico-bibliographical undertaking. Its richness in old medical books, its proximity to the Library of Congress, its Index-Catalogue, and its recent activity in establishing a Union List of Medical Books all create a role for this library in helping other institutions and the world of book lovers by the publication of such a series of bio-bibliographical reference works. The Index-Catalogue is a fairly complete key to the medical literature of the 19th and 20th centuries. For the earlier periods of literature however, it is more a catalogue of works than an index to subjects. By the publication of the supplemental series of bio-bibliographical references, the analytical function of the Index-Catalogue will reach the medical subjects of the past hitherto uncovered by any other modern reference work.

The immediate *benefits* of the bio-bibliographical series of fasciculi will be felt in the various departments of the Army Medical Library itself. For the Book Acquisition Department, they eliminate the need of searching for the holdings of the library; they enable a systematic enlargement of the collection by listing all the possible medical publications wanted. For the Indexing and Cataloguing Department, they are not only catalogues and indexes of the actual holdings of the library, but they are, as well, guides for the cataloguing of future acquisitions. For the Book Conservation Department and the stacks, they are the basis of rearrangement of the books on shelves according to the chronology of authors, the present system of subject classification being considered unsuitable and awkward. The daily services of the library will be speeded up by the bio-bibliographies, since the number of requests for bibliographical description of our copies of old books will diminish.

The series of reference works on older medical literature to be published in the Index-Catalogue in the form of supplemental fasciculi begins with the present Bio-

Bibliography of XVI. Century Medical Authors, which is divided into the following sections:

Section A: Authors (16th century)

Section B: Editions of ancient and medieval authors published in the 16th century;

Section C: Appendices (related to material included in Section A and B)

- (a) List of printers, and publishers;
- (b) Checklist of editors, translators, proofreaders, and correctors;
- (c) Checklist of book-illustrators, and artists;
- (d) List of references consulted;
- (e) List of true and fictitious places (including places of publication, and places mentioned in the biographies)
- (f) Maps (with reference to the List of Places)

Section D: Indices:

- (a) Names (complete alphabetical index of all personal names, synonyms, pseudonyms occurring in Section A and B).
- (b) Polyglot subject index to 16th-century publications.

The *sources* searched in writing and compiling this bibliography are of very different value and nature. They include the personal statements of the authors themselves in their 16th-century publications. The perusal of these works was of great assistance in correcting the errors of biographical encyclopaedias and bibliographies. Valuable aid was obtained from the catalogs of private and public libraries such as the British Museum, the Bibliothèque Nationale at Paris, the Gesamtkatalog of the German libraries, etc. Catalogs of booksellers and auction catalogs helped chiefly in collecting information on the prices requested on the bookmarket. Some of them even helped in discovering the names of authors, who could be suitably included in this list. Most of the older bibliographies were also searched, even if for no other reason than to find a "ghost" edition, or to expose the original source of incorrect later quotations. Biographical encyclopaedias, and articles in journals often made further search necessary in order to bring into harmony their erroneous data. Though a list of the sources used or to be used cannot be given while the writing of this bibliography is in progress, some of the publications referred to are mentioned below:

AMRAM, D. W. The makers of Hebrew books in Italy. Phila., 1909.

This sample of the sources is inserted to illustrate the broad basis of the Bio-Bibliography, and to show the endeavor to avoid omissions of any kind.

Section A, which is the main part of this Bio-Bibliography, is arranged in a single alphabet of authors, who come within the *chronological limits* of the 16th century; yet these limits are not drawn very rigidly. Indeed, physicians who died in the 15th century often had much greater influence upon the next generation than upon their contemporaries. It also happened that their manuscripts were first printed and their ideas first divulged in the 16th century. This is true for other authors who, though non-medical men, have written on topics closely related to medicine or referring to the social implications of medicine. At the other end of the century, there are many who stand with their feet in the 16th, but think and speak in the 17th century. In general, these were excluded from the 16th-century list and referred to a

future 17th-century Bio-Bibliography for the reason that, although they were born within the chronological upper limit set for this bibliography, they published their writings, or the greater bulk of their writings, in the next century. In order to avoid the appearance of incompleteness, the names of such authors on the borderlines are listed as references.

The single alphabet includes also *anonymous works* chiefly under their titles, choosing the first *noun* of the title for the first word of the entry: e. g., a work with the title "Ain nutzliches Regiment" will be found under "Regiment." If the title refers to a certain town where some event took place, the main entry has been made under the name of the town, because a geographical name is much easier to remember than the first noun of a fancy title: e. g., the anonymous publication "Vom Wildtbad Abbach" is entered under "Abbach," and only a cross-reference is to be found under "Wildtbad," the first noun of the title.

Collections of works on special subjects are generally entered under the names of their editors, but they are also listed under their subjects. If an anonymous work or a collection was edited in the 15th century and subsequent editions appeared in the 17th century, all of these editions are listed by the Bio-Bibliography.

Publications by magistrates of towns or by councils of countries are considered as official works of the town or the country, and are listed under their proper geographical names. Publications of societies can be found under the name of the city or country in which the society or academy was resident. Anonymous publications referring to hospitals are entered under the name of the city where the hospital (or institution) is located.

Within the chronological limits, as explained above, the following personal names are to be found in the alphabetical list:

(a) Names of authors, who were either practicing *physicians* and surgeons or who, at least, studied medicine; *all* of their published works are listed with all 16th-century and later editions of such works, regardless of their subjects; the titles of their unpublished manuscripts are also occasionally mentioned;

(b) Names of non-medical authors, whose works are related to medicine or its 16th-century allied sciences such as botany, zoology, veterinary medicine, natural history, natural philosophy, astrology, alchemy, etc.; in most instances, their works of medical interest only are listed, with all 16th-century and later editions; in exceptional cases, it seemed to be advantageous to enumerate also their works of other nature, especially when the information on them was collected from uncommon sources;

(c) Names of authors of belles-lettres or of poets, if their works are of culture-historical, especially of medico-historical significance; thus, the work of Cornelis Adriaansz is listed because of its importance for the history of flagellation; most of the facetiae writers are included in the list, because their works throw light upon the social standing of the 16th-century physician and surgeon, upon the methods of medical examination, on diseases of the social groups, etc.

(d) Names of editors, translators, book-illustrators, engravers, etc., if they were either physicians, or their works are in connection with anatomy, medicine, surgery, and the allied sciences, or if their drawings are of especial significance for physiology.

Whenever complete information could be collected, it has been *arranged* according to the following points:

(1) **Name with dates;**

(2) **Synonyms** of name; distinction from others of similar name; pseudonyms;

- (3) **Biography**; including family relations, professional standing, literary activity, corrections of errors in dates, quotations from the author's own works, etc.
- (4) **Biographical references**, if they seemed to be important;
- (5) **Portrait**, with reference to the place from which it was reproduced;
NOTE: absence of portrait does not necessarily mean that there is absolutely no likeness of the author existing;
- (6) **Checklist** of works; only if they are many, or are known under various titles;
- (7) **Works** listed with the *Opera omnia* or *Opera selecta* first, followed by single or smaller groups of works in, usually, alphabetical order; they are marked as *Op. om.*, *Op. 1*, *Op. 2*, etc., which does not mean that they were the first or the second work written by the author; each of these works has a number on the left-hand side of the column printed in heavy type; this numbering is continuous throughout the Bio-Bibliography and serves for easy references;
- (8) **Description of work**;
- (9) **All editions** of a particular work beginning with the earliest, and ending with the 20th century; **translations** into any language; they are arranged chronologically and numbered in the convenient style of KLEBS;
- (10) List of **copies** available in a number of public libraries;
- (11) List of **references**, if there are no copies known;
- (12) **Description of each edition**, with collation, title and contents, list of illustrations, size of book measured by the size of text; such description would be ideal for each edition, but it could be given only for books in the possession of the Army Medical Library; for such copies, the library's accession number is printed in heavy type on the right-hand side of the column; the rarity of the edition, and its price on the bookmarket is also indicated;
- (13) List of **non-existent** or ghost **editions**; they are mostly from Linden, and Haller;
- (14) **Manuscript works**;
- (15) **Spurious works**.

Many of the 16th-century men are known under a number of *names*: names of their families, either in the vernacular or in the Latin language, nicknames, names of the towns or countries where they were born, names which were assumed or which were given them by a later cataloguer or a bibliographer. The variety of names resulted in a great confusion. This Bio-Bibliography enters the author chiefly under his name in the vernacular language of the author's own country: e. g., "Rudolf Agricola" is to be found under R. Huisman; in exceptional cases, the author is listed under his assumed name (e. g., Georg Agricola under Agricola and not under Bauer). The principle of giving names in the vernacular is followed throughout the entire work, and the geographical names occurring in the text of the descriptions or in the imprint of the various editions are also in the language of their own country. "Venetiae" is "Venezia," and neither "Venice," nor "Velence"; "Vienna" is "Wien," and not "Vienna," nor "Vienne," nor "Bécs"; just as much as "London" is not "Londres" nor "Londinum." Experience shows that many of the mistakes in bibliographical lists are due to the misinterpretation of Latinized names, and for that matter, Venice and Vienna are to be found in the United States.

In the *description of a work*, its synonyms are always listed. Often, it was found that such synonym titles were accounted for as individual works of an author. The description also contains the brief history of the work, the possible motives of composition, the persons to whom it was dedicated, its division into books and chapters, sometimes with the title of all or of the more interesting chapters, the "incipit" and "explicit" of the text in order to make identification easier, also other suitable or appropriate notes.

The consecutive *editions* of a work are listed chronologically under their imprints in Choulant's style and are numbered in Klebs' style. If the edition is in the possession of the Army Medical Library, the number of the edition is followed by an asterisk.

The *copies* of the following libraries are regularly listed: British Museum; Bibliothèque Nationale, Paris; the larger German libraries (as far as contained in their Gesamtkatalog); American libraries whose holdings are listed in the Union List of the Library of Congress; also the Library of the New York Academy of Medicine, the Boston Medical Library, the Medical Library of the Medical Society of the County of Kings at Brooklyn, N. Y., the Library of the College of Physicians of Philadelphia, the Sutro Library at Los Angeles, the Welch Medical Library, and the Army Medical Library (SGL) at Washington. Symbols are avoided, except BM for the British Museum, and SGL for the Army Medical Library. The libraries are referred to by the name of the cities where they are located. "London," if it occasionally occurs, means the British Museum Library; "Paris" means the Bibliothèque Nationale; "Berlin" means the Preussische Staatsbibliothek; other libraries are mentioned by the personal name which occurs in their titles as Rylands, Hunterian, John Crerar, etc.

The *collation* often is given in the incomplete form it was found in the library catalogs. It seemed strange, however, that even the best equipped and largest libraries differ so much in the collation of their copies. One library may count 200 pages in a book, while the other speaks of 200 leaves. Such discrepancies made necessary the frequent use of question marks.

The widest differences among cataloguers and bibliographers become manifest when it comes to the determination of the *size of a volume*. Indeed, the size given in 4-o, or 8-o, or 12-o, or 16-o, is entirely meaningless, and the bibliographers of former days may refer to the very same edition of a work, while their modern reader may think of four independent editions. The only safe way of measuring the size of a volume is by measuring the size of the printed text in millimeters (or centimeters), while many of the former size measurements are referring to the number of leaves in a quire.

The *rarity* of an edition depends on many external factors. Its significance is entirely relative. It means that the edition in question is rarely seen at the book-market. Several phrases are used for the expression of the grades of infrequency: Rare, Rarior (or rather rare), Very Rare, Rarissimum, Extremely Rare, Unique. The only sure, quantitative way of measurement of the rarity of an edition would be by counting all copies in public and private possession, which is impossible.

The *prices* are listed so that after the price listed in pounds, dollars, francs, or other monetary system, the year of sale or offer is given in parenthesis. The variation of book prices is still more under the influence of external factors than is the rareness of a book. A particularly elaborate binding may be hundred times more valuable than the volume it covers. In general, however, the Bio-Bibliography gives the average prices paid for ordinary copies, and, therefore, it may be of special value to medical librarians and to dealers in old books.

In describing the SGL copies, the quality of binding, the existence of Ex-Libris plates, the name of previous, especially contemporary owners, and the manuscript glossae are always mentioned.

Abbreviations are used but sparingly, and they are such that their significance is evident from the context. In order to increase the reliability of the Bio-Bibliography, any doubtful or uncertain or contradictory information found in the sources has been marked with the question mark.

Though at the time of writing this introduction it seems that the Bio-Bibliography of 16th Century Medical Authors is entirely comprehensive, that is, it lists all the possible authors of the 16th century, all their existing works, and all the editions ever published, it is also true that never was there a bibliography without a later supplement. It is hoped, nevertheless, that much can be inserted in Section B and Section C of this Bio-Bibliography and the need for supplements will not arise.

1 (ABBACH) Vom Wildtbad Abbach. Was dasselb für Krafft, Natur und Aigenschaft, auch für was Defect und Kranckheiten es dem Menschen nutz und dienstlich sey. Straubing, Summer, (ca 1585).

Copy: Berlin.

¶ Probably written by Andreas Ruland, physician at Regensburg, whose manuscript of the same title, dated 1630, is mentioned by J. H. LANG in his **De aquis medicatis Abudiacis* (Erlangen, 1795) p. 5. Also publ. Regensburg, Chr. Fischer, 1630.

¶ ABBACH, or Abach (Lat. Abacus; Abudiacus), a village near Regensburg, on the right bank of the Danube; its sulphurous bath visited by Charles V; mentioned by GUENTHER von ANDERNACH (1565) BACCI (1571) and others. Founded around 1465.

ABBAS, Moseh.
See Moseh Abbas.

ABBATI, Baldo Angelo (fl. 1590)

Syn.: Abati; de Abbatibus; Abbatius; Abbattius; Abbatio; Abbazio; Angelus; D'Ange.

B. Gubbio (Lat. Eugubium), Umbrian city, 27 miles from Urbino; practiced there, and in Urbino, where he was physician to the Duke of Urbino, Francesco Maria II Della Rovere (1574-1631); first ed. of Op. 1, 1589; Op. 2, 1594. Date of death unknown.

2 Op. 1: De admirabili viperae natura et de mirificis eiusdem facultatibus liber.

Dedicated to the Duke of Urbino, Francesco Maria II; describes anatomy, physiology, coitus, birth, and therapeutical use of the viper. 32 chapters.

.1 *Urbino, Bartholomeus Ragusius, 1589.

SGL: 128070

Copy: BM; Paris Nat.; Berlin; Wien; Marburg; Kiel; Göttingen; München; SGL.

(16f. incl. tp. (a¹-d⁴); 151p.; text 160mm; each page within borders made up of rules. Title within engraved ornamental

border with snakes, birds, fish. 5 full-page engravings (d_{4v}, p. 59, 62, 65, 66) representing 7 old medallions with vipers, coitus, birth, intestines, and genitals of the viper. Tp.v: coat of arms.

a₂-a_{4r}: poems of Pietro Matteo Vanni, M. D., Guido Guidarelli, and others; a_{4v}: blank; b_{1r}-b_{3r}: dedication dated Pesaro, Jan. 1, 1589; b_{3v}-b_{4v}: authors' index; c_{1r}-v: preface of Ventura Concioli; c₂-d_{4r}: index of chapters and subjects; d_{4v}: engraving; p.1-5: preface of author: "Non illam dicendi facultatem ..."; p.5-148: text from chapter 1 to end; p.149-50: addition on the natural immunity against vipers; p.150: ecclesiastical imprimatur; p.151: errata.

Very rare as all Urbino prints of this period. Prices: 33 Sw. fr (1933); 500 fr (1939).

.2 *Nürnberg, Sebastian Heusler, 1603.

SGL: 156549

Copy: London; Paris; Berlin; Wien; Bonn; etc. SGL.

8p.l. incl. tp.; 133p. (p.133 numbered 125); (5)f. for index of subjects; text 175mm; tp. with borders as for 2.1; same illustrations from larger plates (19 cm x 13 cm) on f.8r, p.53, 56, 58, 59. Coat of arms on tp.v missing. Arrangement of preliminaries: dedication first then preface of Concioli, poems, indices. Printer's device.

Bound in vellum; owner in 1643: R. Farvacquès (?) Med. D.

.3 *s-Gravenhage, Samuel Broun (Browne), 1660

SGL: 20506

Copy: London; Paris; Berlin; Edinburgh Univ.; Med. Soc. London, etc., Boston M. L.; SGL.

(12)f. incl. tp. (*2-*7 numb.); 186p.; (13)f. index; (3)f. blank; text 110mm; Roman type resembling Elzevir; engraved tp. made up of architectural details and the 7 medallions of previous editions; plates to p.78, 79, 81, 84; ornamental initials. Arrangement of preliminaries as in E. P. On f.(12): the publisher to Kenelm Digbey. Incorrect back-title: "Abbatil & Viperis".

¶ Editions doubtful or nonexistent: a) 1518, Nürnberg; listed in Falconet's Catalogue; b) 1587, Ragusa; name of publisher mistaken for place of publication; Op. 1 written later as shown by date of dedication; no regular printing in Ragusa before 1780, c) 1591, Urbino; mentioned only by Linden and Clément.

3 Op. 2: Opus discussarum concertationum praeclarum de rebus, verbis et sententiis controversis ex omnibus fere scriptoribus libri 15.

.1 Pesaro, Hieronymus Concordia, 1594. 4?

Copy: London; Paris.

116p. (or 216p.?). rare. Ed. of 1595, Pesaro, mentioned only by Linden.

ABBATIA, Bernard, 1540(?)–ca 1590.

Syn.: Abatia.

B. Toulouse, 1530 or 1540; physician, and astrologer of Charles IX, King of France (1560–1574); prof. of mathematics, law, and philology, Paris, ca. 1583; died Paris (?) ca. 1590.

Portrait from J. C. BRUNET; *Manuel du libraire*. Par., 1860, 1: p.6.

4 Op. 1: *Prognostication sur le mariage de ... Henry ... roy de Navarre, et de ... Marguerite de France, calculée par maistre Bernard Abbatis, (etc.)*

On marriage and its origin; forecast of happy marriage from constellation of stars; also "restaurants pour obvier aux maladies".

.1 Paris, G(uillaume, 2d) de Nyverd, 1572. 8°
Copy: Paris, 3 copies.

(20f. portrait of author on tp. (See fig.) One of the 3 copies is from an issue without date. Extremely rare work from the year of the massacre of St. Bartholomew.

Henry (1553–1610), King of Navarre as III (1572), King of France as IV (1589–1610); married Margaret of Valois, sister of Charles IX, at Paris, Aug. 18, 1572; the massacre was inaugurated on the 24th during the nuptial festivities.

ABIOSI, Giambattista, ca 1462– after 1523.

Syn.: Abbiosi; Abiosus; Abioso.

B. Bagnuolo (Lat. Balneolus) near Napoli ca. 1462 (see poem in 1498 ed. of Trutina: "vix septem numerans lustra vel unus habet"); doctor of medicine and arts; mathematician and astrologer; finished Op. 1, 1492, and sent it to Alfonso II (1448–1495), King of Napoli (1494–95) on June 4, 1494; Op. 1 published in Venezia, 1494; editor of *Epitoma of Regiomontanus*, 1496; resided in Treviso, where Op. 3 was finished, 1498; returned to Napoli, where 2. ed. of Op. 1 was finished, 1523. Date of death unknown.

8 Op. 1: *Dialogus in astrologiae defensionem cum vaticinio a diluvio usque ad Christi annos 1702.*

Text begins and ends: "Quoniam innatum est nobis obsequium veritatem precipiendi ... ego quoque confiteor. Laus sit semper Deo." Written in 1492; first ed. dedicated to the King of Napoli; contains forecast of schism in Catholic Church; on Index libr. prohibet.

.1 Venezia, Franciscus Lapidica, Oct. 20, 1494. 4°

Ref.: Hain 24; GK 6; Pellecbet 17.

Copy: Philadelphia Coll. Phys.; Morgan N. Y.; Paris Bodleian; München; Wien; Roma; etc.

(38f. last blank (a^s-d^e); Gothic; title begins: "Ad invictissimum ac potentissimum ..."; large cut under title taken from SACROBOSCO's *Sphaera mundi* (Venez., 1491); a few astronomical cuts in text; rare.

.2 Napoli, Catherina de Silvestro, June 12 1523. 8°

Ref.: Panzer, 7: 431, No. 46.

Copy: Bibl. naz. Napoli.

Title reads. "Liber astronomicus." At end: "Completum Neapoli per Joannem Abiosum Artium medicinae doctorum

et astrologiae professorem die Martii MDXXIII". Possibly a revised edition of his *Dialogus*. Extremely rare.

9 Op. 2: (Editor) REGIOMONTANUS. Epitoma in Almagestum Ptolomaei.

Venezia, Johannes Hamman, Aug. 31, 1496.
Ref.: Hain 13806; BM v, 427. Proctor 5197.

Copy: Radcliffe; Boston M. L.; Libr. Congr.; Osler; West Point; Morgan N. Y.; London; etc.
Book size 316 x 216mm; (110f. the last blank. Editor's letter on f.2v-3; copied and compared the work of G. Peurbach and Regiomontanus. Letter date Aug. 15, 1496.

For Regiomontanus see MUELLER. There are probably three different types of this edition; in one copy the editor's preface is on f.1v-2v; another copy has only 108 leaves without the preface.

10 Op. 3: Trutina rerum terrestrium et coelestium.

Variations of title as mentioned in text: "Dlvinus tractatus terrestrium (!) et celestium Trutina artem exhibens"; "Trutinator terrestrium et celestium". 39 chapters: weather forecast from March 1498 to Febr. 1499 (Cap. 1-10); de cometis (Cap. 12-14); methods of forecasting from aureola around celestial bodies (Cap. 15-20); from behavior of animals (Cap. 21); forecast of epidemics and diseases "per elementorum alterationes" (Cap. 22); forecast of diseases for 1498 (Cap. 23); "Pestis curam largitur" (Cap. 24); "Argumentationes communis medicorum scholae contra maximam quintae essentiae ... repulsionem" (Cap. 25); etiology and treatment of syphilis (Cap. 26-28); special forecasts for Firenze, the Pope, Maximilian, the King of France, etc. (27-39.) Writing finished at Treviso, Febr. 5, 1498.

.1 *[Venezia, Johannes Rubeus, 1498]

ABOUL-MIAMEN.

See Abdul Miamen (Mumen?) Muştafa.

ABRABANELE, Jehudah, 1470(ca)-1535.

Syn.: Abarbanel; Abravanel; Barbanella; Judah Leon Hebreus; Leon Hebreus; Leon Medigo; Medigo. Note: Jehudah or Juda of the Hebrew is Leon (Engl. lion) in Roman languages; after his father called "ben Isaac (Jichak)"; full name: Jehudah ben Ishâq Abrabanele.

B. ca 1470, at Lisbôa, as the eldest son of Isaac ben Juda Abrabancle (1437-1508), famous statesman in Portugal, of an old Jewish family, which boasted descent from the royal house of David; expulsion from Portugal after death of Alfonso V (Aug. 28, 1481); studied, lived, and married in Madrid; his first son, Ishâq, born 1491; expulsion from Spain, 1492; his son taken away by Spanish Court, and baptized; in Napoli and Messina, 1493-95; here, physician to the kings, Ferdinand I (1424-1494) and Alfonso II (1448-1495); at invasion of Charles VIII (1495) flight to Venetian territory: Corfu (1495) and Venezia (1496); migration to Genova, where Op. 1 written at instigation of his friend, Pico della Mirandola (finished 1502); practitioner in Genova; also physician to Gonsalvo Hernández de Cordova (1453-1515); poems to his father, 1504; elegy on death of father, 1508; autobiography in poem to his baptized son, 1515; commentaries on prophets, 1520. Died at Venezia, 1535. His brother, Josef (1471-1552) was physician at Ferrara ca 1549; his second son, Ishâq, physician at Venezia.

A neoplatonist philosophical dreamer. Not to be confused with others by the name of Leo Judaeus (16. and 17. century in Switzerland and the Netherlands), or Leo Hebreus.

See also Solmi, E. Benedetto Spinoza e Leone Hebreo. 1903.—Zimmels, B. Leo Hebreus. 1886.

12 Op. 1: Dialoghi d'amore.

Syn.: Philographia universal.

PHILO's love for SOPHIA. On Index libr. prohibit.

There are three dialogues in which Philo enlightens Sophia in sexual matters. The second dialogue is especially interesting, containing views on generation, on the nature of 'semen', on the influence of stars upon human love, etc.

Text begins: "FILONE. Il conoscerti o Sofia, causa in me amore, et desiderio. SO. Discordanti mi paiono, o Filone, questi affetti ... (ends) non mancarò di pagarti quello, a che la mia promissione, & servitù verso di te amorosa m'obligano. Vale."

- 19p. Correspondance with Marco DI THIENE; from the Archives of Conte Giorgio TRISSINO. Title: "Lettere estratte (etc.)."

Op. 3: (Commentaries on PLATO)

MS copy: Roma Bibl. Slusian.

†Note: various poems published in different anthologies.

ACCORAMBONI, Girolamo, 1469-1537.

Syn.: **Accorambonius** Eugubinus; A. Hieronymus; A. Geronimo.

B. Gubbio (Lat. Eugubium), 1469 (not 1496!); studied medicine at Perugia against the wishes of his father, Fabio; married, and had a son (1502-1559), Fabio, a famous jurist, and professor of law at the Univ. Padua; prof. med. at Perugia, and physician to Leo X (1475-1521), Pope (1513-1521) and to Clement VII (1475-1534), Pope (1523-1534); when Rome was stormed and sacked by French troops, and the Pope made prisoner in 1527, he lost his fortune and manuscripts (see preface to Op. 3), and fled to Padova, where he stayed as prof. med. till 1534; Paul III (1468-1549), Pope (1534-1549), called him back to Rome as his private physician; here he died, Febr. 21, 1537 (not 1535!)

29 Op. 1: Tractatus de putredine.

.1 Venezia, A. de Arrivabene, 1534.

Copy: London; München; Breslau; Wien.

15f. 8°

30 Op. 2: Tractatus de catarrho.

Probably identical with his lost work mentioned in the preface of Op. 3 as "De fluxu omnium generum et eius curatione". Dedicated to Paul III, Pope, who has been suffering from catarrh for many years.

.1 Venezia, Andr. de Arrivabene, 1536.

Copy: London.

47f. 8° Also as MS is the Sloane collection (No. 2858) dated 1536.

31 Op. 3: Tractatus de natura et usu lactis.

Syn.: *Tractatus de lacte*.

Dedicated to Johan Chojensky (Lat. Chojenius), Bishop of Kraków, here mentioned as bishop of Plotzk (Poland) (died 1532?). Written before 1527, in which year the manuscript was lost in Rome; the first two parts of it were later found by the author's son, Fabio, and the third part was supplied from the notebook of a former German pupil. Text: "Quod primum ac potissimum nobis proposuimus in hoc tractatu ... credimus nunc sufficere ad laudem altissimi, a qua bona omnia ad nos proveniunt." Divided into 3 parts: 1) the breastmilk; its formation; effect of menstruation; menstruation during pregnancy; 2) quality and analysis of human and animal milk; the cheese; 3) dietetic use of milk; his personal experiences in tuberculosis; use of human milk in diseases of adults.

.1 Venezia, Andr. de Arrivabene, 1536.

Copy: London; Paris; München; Breslau.

8° 48f. Begins on tp.: "Excellentissimi ..."—50 RM (1940)

.2 *Nürnberg, Johan Petri (= Petreius), 1538.

SGL: 69118

Copy: London; Paris; Berlin; etc.; Crummer Collect.; SGL.

Issued as 2. pt, under different sigs, to Sextus PLACITUS Papyrensis: *De medicamentis ex animalibus* under title, "Sexti Placiti ... Item. Tractatus utilissimus de natura et usu lactis." (52)f. of which pt 2 has (36)f. Text 160mm; Roman: Sigs: pt 1: aa'-cc'dd'; pt 2: a'-c'd'e'-i'.

Pt 1: aa₁: title as above; aa₁-aa₂: preface of the editor, Franz EMERICH, of Troppau (=Oppavianus), physician in Wien, to the vice-chancellor of Germany; of Placitus and Antonius MUSA: aa₂-dd₃: text of Placitus; dd₄-dd₆: text of Antonius MUSA *Ad moecenatem suum de bona valetudine instructio*; dd₆ blank.

Pt 2: a₁: title: "Excellentissimi philosophi et ... tractatus de lacte." a₁-a₂: author's preface to Bishop Chojensky: "Dum superioribus annis ... nomini tuo dicata in lucem prodant. Felix vale, 1536." a₂-i₄: text. Stamped leather bd ("R. V."), rebound.—80fr. (1932)

†SGL copy bound with IBN ROSHD. *Collectancorum de re medica* (etc.) Lyon, 1537.

†Note: The *De lacte* does not occur in later editions of PLACITUS.

B. Canary Islands; lived in Spain and Portugal as a priest. All his works are rare; no copy identified.

32 Op. 1: Recreación del alma y defensa del Evangelio contra la superstición astrológica.

.1 Sevilla, Alonso Escribano, 1570. 8°

Ref.: Antonio.

Copy:?

33 Op. 2: Remedios contra pestilencia.

Probably identical with the MS: "Recreo del alma y alivio contra la pestilencia y otros males."

.1 Zaragoza, Pedro Puig, 1589.

Ref.: Sánchez 696. Copy:?

Note: also author of *Marial*, discursos morales. Lisboa, 1602.

ACHENBACH, Anton, ca 1590-1600.

Called "Laspensis"; stud. med. Univ. Heidelberg; grad. 1598.

34 Op.: De respiratione.

Heidelberg, (publisher) 1598.

Copy?: Ref. Heffter.

Thesis; praeses Simon KOCH (=OPSOPAEUS; died 1619); probably Johannes KOCH, since his brother, Simon, became professor of medicine in 1614.

ACHILLINI, Alessandro, 1463-1512.

Syn.: Achillinus; de Achillinis.

B. Oct. 29, 1463 (not 1461), "post meridiem", at Bologna; son of Claudio Achillino di Cavalcaselli; brother of Giovanni Filoteo ACHILLINO (see), the Italian poet; studied philosophy and medicine at the Univ. of Bologna, but not in Paris; grad. at this university, Sept. 7, 1484; prof. of logics with a salary of 100 Bolognese livres, 1484-1488; his portrait painted by Francesco FRANCIA (Jacopo BOATERI; 1487-1557), in 1486 (aet. suae 23; now in the Uffizi Collection); extraordinary prof. of philosophy at Bologna, 1488-1490; ordinary prof. of philosophy, 1490-1495; Op. 8 and Op. 13 publ., 1494; lecturer on medicine, Bologna, 1495-1497; again prof. of philos., 1497-1501; Op. 6 publ., 1498; Op. 10 and Op. 14 publ., 1501; prof. of both philosophy and medicine at Univ. Bologna, and physician to the ruler of Bologna, Giovanni BENTIVOGLIO (1430-1508), with a prof. salary of 200 Bolognese livres, 1501-1506; at the convention of Franciscan brothers, Roma, May 1506; Op. 11 publ. 1502; Op. 3 publ. 1503; editor of TRIOMFO (Op. 15), 1503; Op. 7 and Op. 9 publ. 1504; Op. 5 publ. 1505; Op. 13 publ. 1506; political troubles in Bologna, flight to Padova, Oct. 1506; ordin. prof. of philos., Padova, Nov. 7, 1506-Sept. 1508; here, disputations with Pietro POMPONAZZI (1462-1526), Italian philosopher ("aut diabolus aut magnus Achillinus"); received an annual salary of 250 livres; called back to Bologna under the penalty of confiscation of his Bolognese property; return to Bologna, Sept. 14, 1508; prof. med., with a salary of 900 livres, 1508-1511; Op. omn. published 1508; study of Avicenna (De febris), 1509; Op. 4 separately published, 1510; political troubles, and suspension of lectures, 1511; Op. 12 publ. 1512; died, after a few days' sickness, Aug. 2, 1512; entombed in the Chiesa di S. Martino Maggiore, Bologna. He was rather a philosopher than a physician, mixing Aristoteles with the ideas of Ibn Roshd (=Averroes). While his demonstrator, the surgeon Pietro MORSIANO, was performing autopsies, he lectured and commented on MONDINO's anatomical work. He is claimed to be the discoverer of the middle-ear ossicles, of the submandibular duct before WHARTON, of the ileocecal valve before BAUHIN, etc.

For biography see Münster, L. Alessandro Achillini, Riv. stor. sc. med., 1933, 15: 7-22; 54-77 (also portr.); good biography with authentic documents, but with incorrect bibliographical data for Achillini.—Streeter, E. C. Francia and Achillini. Med. Pickwick, 1915, 1: 60 (portr.).

Portrait from his Op. 1.1.

4f. 334p.; 1f. fol.; woodcut medallion of Aristoteles; print. dev.; woodcut initials and figures (?); editor, and arrangement of works the same as in 2. ed.—40 Sw. fr. (1938).

†Editions nonexistent: a) 1559, mentioned by Atkinson; b) 1608, Venezia; misprint for 1508.

36 Op. 1: Anatomicae annotationes.

Syn.: Anatomia; Annotationes; De humani corporis anatomia; Repertorium ex annotationibus anatomiae.

Synonyms of title taken for as many separate works by several bibliographers (DE RENZI 3; CAPPARONI 2; MUENSTER 2, etc.) A manual for anatomical dissection, with criticism of statements of previous anatomists; based chiefly upon experience gained during his medical professorship 1501-1506. Text begins and ends: "Anatomia est artificiosa membrorum divisio et ... undecimam et duodecimam per multa capita queritans nunquam inveni."

.1 *Bologna, Hier. de Benedictis, Sept. 24, 1520.

SGL: 238493

Copy: London; Paris; Hunterian; SGL.

18f; (a⁴-c⁴d⁴); 165 mm text size; Roman; portr. of author on tp. (10 cm x 10 cm) with poem of Annibale CAMILLO, stud. med., below. Ed. by author's brother, Giovanni Filoteo ACHILLINI (see).

(1r): "Magnus Alexander Achillinus"; portr. and poem; 1v: preface of editor to Pamfilo MONTI, dated Sept. 13, 1520; 2r-17v: "Annotationes anothomicae"; at end of 17v: corrigenda; 18r: poem of Annibale Camillo; 18v blank.—Very rare E. P.

.2 Venezia, J. Ant. & Fratr. de Sabio, 1521.

Copy: London; Paris.

8° Ed. by G. Fil. Achillini.—Rare.

.3 *Venezia, Arrivabeni, Mar. 31, 1522.

SGL: See KETHAM

Copy: Paris; SGL.

Printed as Chapter 10 of *Fasciculus medicinae* (KETHAM, J.) (see that). It follows MONDINO's *Anatomia* (Chapt. 9), on f.46v-55.col. 1; 46v: full-page woodcut of urine examination; 47r: "Incipit repertorium ex annotationibus anathomie Magni Alexandri Achillini bononiensis noviter excerptum." 47v: preface of G. Fil. Achillini to P. Monti as in E. P.; work considered fragment of an anatomical manual; 48r: "Annotationes anathomie ..."; explicit on 55r in col. 1.

Note: The very rare Italian translation of the *Fasciculus* of KETHAM, published Jan. 7, 1522 by Ces. Arrivabeni in Venezia, does not have Achillini's Annotations. Mondino's work (38r-56v) is followed by Secreti de herbe. (See description under KETHAM.)

Editions nonexistent: a) 1524, Bologna, in KETHAM. *Fasciculus*, publ. Ettore Benedetti; confused by Brüggeman with a 1523 ed. of BERENGARIO da CARPI; b) 1516, Venezia; quoted by Capparoni, Münster; nonexistent; c) 1568, Venez., T. Antoninus; mentioned by Atkinson; error.

37 Op. 2: (editor) ARISTOTELES. *Rhetorica*.

Venezia, O. Scotus & G. Arrivabeni, (1515)

Copy: London; Paris; Berlin; München.

4f., 118r., 13f.; fol.; Gothic; 2 cols. Title: "Rhetorica Aristotelis ..."; with commentaries of COLONNA (Aegidius Romanus) and of Alfarabius; also Poetica of Aristoteles with commentaries of Ibn Roshd. Alessandro Achillini is mentioned as editor by the catalogue of the Bibl. Nat. Paris. How is this possible?

38 Op. 3: *De chyromantiae principiis et physionomia*.

Syn.: *De physionomia*; *De principiis chyromantiae et physionomia*; *De subiecto physionomia et chiromantiae*; *Quaestio de subiecto p. et c.*

Text begins and ends: "Quaeritur utrum physionomia aut chiromantiae subiectum sit homo ... demonstratione quia utentes et speculative et de humanis operibus recte iudicantes."

Achillini also wrote a preface to the 1504 Bologna ed. of COCLES (=Bartolomeo DELLA ROCCA) *Anastasis chyromantiae*; the preface, which is an approbation of the work of DELLA ROCCA, begins: "Venerandam sophiae veritatem ..." Op. 3 of Achillini is not the same as this Approbatio, though the title of the preface has been repeatedly used as the title of Op. 3.

.1 *Bologna, J. Ant. de Benedictis, 1503.

SGL: 312441

Copy: London; Paris; Wien; Berlin; München; SGL; Pannonhalma.

Bound with the *Anastasis* of COCLES (=DELLA ROCCA) forming the 12 leaves which precede the 164 leaves of the main work. Date of main work: 1504. Text size 285mm; Gothic; 2 cols.

Tr.: "Alexander Achillinus/ Bononiensis de/ Chyromantiae/ principiis et/ Physionomia/"; tpv: preface of Achillini to Cocles; (2r)-12v: text of Op. 3. For description of main work see DELLA ROCCA.—£3-15 (1933).

Ex libris: Gino Sabattini; by R. Rubino; very interesting bookplate.

.2 Venezia, Bonetus Locatellus for Oct. Scotus, 1508.

See in Op. omn. (No. 35.1)

.3 *Pavia, Bernardinus de Garaldis, Dec. 5, 1514.

SGL: 120545

Issued with other physiognomical works under title: "Infinita naturae secreta quibuslibet hominibus contingenda providenda cavenda ac prosequenda declarant in hoc libro contenta ..." See description of volume under INFINITA (etc.) Consists of 2 parts: pt 1, Pavia, B. de Garaldis, Jan. 19, 1515; pt 2, Pavia, B. de Garaldis, Febr. 20, 1515. Achillini's treatise on AA₁-BB₄v, with separate imprint as above; according to the Registrum, it should precede the work of DELLA ROCCA. Volume contains ARISTOTELES, Michael SCOTUS, COCLES, and ACHILLINI. Not to be confused with ARISTOTELES: *Secreta secretorum*.

.4 Bologna, Hier. de Benedictis, Nov. 1517.

Copy: Boston M. L.; Ref.: Panzer.

Issued with DELLA ROCCA (=Cocles). *Chyromantiae ac physionomia anastasis*. Fol.

.5 Bologna, Hier. de Benedictis, 1518.

Copy: Breslau; Wien.

Further editions see in Op. omn. (No. 35.2-4)

44 Op. 9: De subiecto medicinae.

Syn.: Quaestio de ...

Short treatise. Text begins and ends: "Utrum homo secundum quod arte sanabilis est, et subiectum medicinae ... medicum esse artificem mechanicum, quemadmodum eleganter dixit plusquam commentator, prima technis commento septimo."

.1 Bologna, Joh. Ant. de Benedictis, 1504.

Copy: Berlin;

Issued with Op. 7 (see No. 42.1). For further editions see Op. omn. (No. 35.1-4)

45 Op. 10: De universalibus.

Short treatise. Text begins and ends: "Utrum universalis existant in intellectu. Respondeo duplex universale ... consequentia non sunt inconvenientia. patebit alias." Never printed separately. Issued either in his Op. 14 or in the Op. omn.

.1 Bologna, Bened. Hectoris, 1501.

Copy: Berlin; Paris.

See description under No. 49.1. For further editions see No. 35.1-4 and No. 49.

46 Op. 11: Examinatio figurae quadratae et additio oblongae.

.1 Bologna, (publisher?) 1502.

Copy: Paris.

Issued in BURLEY, W. De primo et ultimo instanti. Listed as a separate work by the Cat. Bibl. Nat. Paris.

47 Op. 12: Expositio primi physicom.

Syn.: De physicorum auditu; De physico auditu; Fragmentorum fractiones physicales; Interpretatio in libros physicae auscultationis; Philosophia naturalis; Physicom interpretatio. Commentary to ARISTOTELES (φυσικὴ ἀκρόασις; Auscultatio physica) Text begins and ends: "Deus illuminatio mea sit. Primo dubitabitur utrum naturatum sit subiectum in philosophia naturali ... quae fragmenta esse voluissim. sed fragmentorum fragmenta sunt, quoniam eis comminutiva fractio supervenit Hispanis Bononiam armis impetentibus et moenia machinis deicientibus ... Explicunt Fragmentorum fractiones physicales ..."

Tp., (f.2)-f.83, 1f. blank; text 110 mm; Gothic; tp. within border; animated initials. Title: "Secreta secretorum Aristotelis ..." Arrangement of works as in previous editions: Secretum secretorum (2-42); De signis (43-47); De mineralibus (48-50); Alexander Aphrodisiensis (50-54); Ibn Roshd (55-63); Op. 10 of ACHILLINI (64-73); Alexander the Great (74-83); 83: print. device.

†Nonexistent: a) 1516, Venezia; probably an incorrect reference to No. 49.2.

50 Op. 15: (editor) TRIOMFO, A. De cognitione animae.

.1 Bologna, J. Jac. de Benedictis for A. de Placentia and J. de Ripis, May 31, 1503.

Copy: London; Paris.

52f.; 4°; Gothic. Title: "Opusculum perutile de cognitione animae ..." Contains a) Destructio arboris Porphyrii, and b) Tractatus de cognitione animae, both by Augustino TRIOMFO (=Triumphus; 1243-1328) and "accuratissime revisum (!) per A. Achillinum."

51 Op. 16: (Poems)

Published in Collettance Greche, Latine (etc.) edited by his brother, Giovanni Filoteo ACHILLINI (see), for the memory of Serafino AQUILANO, Italian poet (died Aug. 10, 1500)

.1 Bologna, Caligula Bazaliero, 1504.

See under No. 53.

†Works of Alessandro ACHILLINI, which remained unpublished (cf. Münster): 1) Expositio super primam quarti Avicennae (De febribus) dated Sept. 7, 1509; 2) Tabula in medicina; 3) Quoddam consilium in medicina; 4) Autoritates Galeni; 5) Multa ex Eutishari (?) sophista; 6) De mixtis; 7) Libri 12 metaphysicarum. No. 1-5 are in the library of Univ. Bologna.

ACHILLINI, Giovanni Filoteo, 1466–1538.

Syn.: Achillini, Gianfiloteo.

B. Bologna, 1466; was "consiliarius regius", and poet; founded an academy called A. del Viridario at Bologna, 1511; brother of Alessandro ACHILLINI (see), and editor of his brother's anatomical work. His own publications are of little medical interest. Died 1538. All works extremely rare.

52 Op. 1: Epistole ... dove si narrano tutte le sorte di precioso petre (etc.)

.1 Bologna, (publisher, ca. 1500)

Copy:

(12)f.; 4°; Roman. Of little value.

53 Op. 2: (editor) Collettanee Greche, Latine e volgari di diversi autori nella morte di Serafino Aquilano.

Commemorative volume of epigrams on Serafino AQUILANO (died Aug. 10, 1500), Italian poet. Contains also poem by Alessandro ACHILLINI (see No. 51)

.1 Bologna, Caligula Bazaliero, July 1504.

Copy:

106f.; 8°; dedicated to Elizabeth, Duchess of Urbino.

54 Op. 3: Il viridario.

Poem mentioning the names of Bolognese and other Italian authors. Nine sections.

.1 Bologna, Joh. Ant. Platonides de Benedictis, 1513.

Copy: Paris.

4° Not to be confused with other publications of similar title. The "Somnium viridarii" (Hanau, 1611) is incorrectly listed under his name.

55 Op. 4: (editor) ACHILLINI, A. Anatomicae annotationes.

.1 *Bologna, Hier. de. Benedictis, Sept. 24, 1520.

Copy: London; Paris; Hunterian; SGL.

For description of volume and further editions see No. 36.

56 Op. 5: Stanze.

.1 Venezia, Zoppino, 1520. 8°

Copy: Paris.

Published in Antonio TEOBALDO: Stanze amorose nove.

.2 Venezia, Zoppino, 1522. 8°

"Stanze in dialogo de effetti d'amore"; dialogue between Antiphilos and Phileros.

57 Op. 6: Il Fidele, lib. 5.

.1 Bologna, publisher, 1523.

Copy:

8° Extremely rare poem "in terza rima cantilene cento."

58 Op. 7: Annotazioni della lingua volgare.

Satire against the "lingua Toscana".

.1 Bologna, Vinc. Bonardo & Marcantonio, 1536.

Copy: Berlin.

52p. 8° Rarissimum.

ACIDALIUS, Christian, -1632.

Syn.: Havekenthal.

Prof. med. at Altorf; by his publication he belongs to the 17. century; mentioned here as editor of his brother's works (See Valentin ACIDALIUS).

ACIDALIUS, Valentin, 1567–1595.

Syn.: Acidalius. Valens; true name: Havekenthal.

B. Wittstock, a village 60 miles NW of Berlin, 1567 (not 1566); son of Heinrich A., a preacher; brother of Christian A., prof. med. at Altorf; became an orphan in early childhood; stud. med. against his inclination at Rostock, Greifswald (here Op. 1 publ. 1588) and Helmstadt; here, Op. 2 publ. 1589; went to Italy with Alexander von HAKEN, 1590; began his studies in Roman classics; in Padova, 1590; here Op. 3 publ. in the same year; stud. med. Bologna under Mercuriali (1530–1606), but never was graduated; return to Germany, 1593, together with his friend, Daniel RINDFLEISCH (=Bucetius, died 1631), who in the 17. century edited several anatomical works; in Breslau, 1593; Op. 4 and 5 publ. 1594; Op. 6 and 7 (the anonymous work) publ. 1595; suffered much persecution

owing to this anonymous offensive publication; became rector in Neisse, 1595, and died May 25 of the same year from "phrenesis" (encephalitis?), but not from suicide.

He was an esteemed humanist, and poet, who never wanted to be a physician; "medicum nec ago, nec agere unquam propositum fuit". Only his Op. 7 has any interest for medicine.

¶For biography see Leuschner. De V. Acidalii vita. Lpz. 1757.

59 Op. 1: Cunae natalitiae Jesu Christi redemptoris ac salvatoris nostri carmine elegiaco celebratae.

.1 Greifswald, Ferber, 1588.

Copy: Univ. Greifswald.

4f. Exceedingly rare.

60 Op. 2: Epigrammata ad Danielelem Rindfleisch Bucetium.

.1 Helmstadt, J. Lucius, 1589. 4°

Copy: London; Berlin; Rylands.

Copy: Paris; Berlin; München; London; Univ. Ill.

566p. 8° Seems to be the 6. vol. of the Lampas of Janus GRÜTER (1560–1627), publ. in 7 vol. Frankfurt, 1602–1623.

.3 Firenze, (publisher) 1737–1739.

Copy: Paris.

Issued in the 1. vol. of the Lampas of J. GRÜTER.

65 Op. 7: Disputatio perjuconda qua anonymus probare nititur mulieres homines non esse.

Attributed to V. ACIDALIUS. Published without the author's name. Probably written in Poland against the doctrines of the 16. century Scenians. The true authorship of the work could not be established, yet Acidalius was blamed for its publication. (See No. 64.) It became the source of a great many publications of the 17., 18., and 19. centuries; some of these are:

a) GEDIK, S. (1551–1624) Defensio sexus muliebris contra anonymi disputationem. 1595.

b) Mulier non homo! s. l. 1690; copy in London.

c) Mulier Homo! s. l. 1690; copy in London.

d) Ein Liebhaber der Bescheidenheit. Gründ- und probirliche Argument und Schluss-Articul, samt beygefüigten ausführlichen Beantwortung: Belangend die Frag, Ob die Weiber Menschen seyn, oder nicht? Frankf., 1721. 40p. 8°; copy in München; dialogue between Brother Endres, O. B., and Pater Eugenius, S. J. Further ed.: a) 1643 and 1722 in BASSI; b) 1660.

e) Apologie des schönen Geschlechts; oder, Beweis dass die Frauenzimmer Menschen sind. Transl. from Latin by D. Heindr. NUDOW. s. l., s. a. viii, 32p.; copy in München; reprinted in Köln, 189*.

f) BACKFISCH. Juste, pseud. Beweis, dass die Männer eigentlich keine Menschen sind! Motto: Und die Frauenzimmer sind doch Menschen. Berl., (1861) 16p. 8°; a parody.

ACOSTA, Cristóvão, 1515(?)–(1580, or 1594?)

Syn.: Costa, Cristóbal de; Coste; Da Costa; De la Coste; La Costa; La Coste. Not to be confused with a Jesuit father of the same name, who in 1569 was in Malacca and wrote a letter to the Jesuit General (publ. in Lettère dell'India Orientale. Venez., 1580). Acosta's chief work is often found in catalogues under the name of his translators (LECLUSE or Clusius. COLIN), under GARCIA da ORTA, Orta. In the 3. ser. of the Index-Catalogue, one finds the works of GARCIA da ORTA under Da COSTA.

B. in Africa, probably 1515, either at Mozambique, city on the East coast and then metropolis of the Portuguese possessions, or at one of the seaport towns of Morocco, Ceuta or Tangier; his father was Portuguese; no data on his education (stud. at Coimbra Univ.?); at one time he became a slave ("fué esclavo á un bárbaro sangriento"); traveled much in Africa, and Asia (China, Persia, India); came to Goa, territory of Portuguese India, ca. 1568, and became a surgeon of the Portuguese viceroy; in Malabar, 1569; here, study and collection of Indian plants; returned to Spain, and became surgeon of the city of Burgos. ca. 1578; Op. 1 publ., 1578; after the death of his wife, he became either a monk or a hermit, and died after 1580, either at Burgos or at Compostella.

†For biography see OLMEDILLA y PUIG, J. Estudio histórico de la vida ... del sabio médico ... C. Acosta. 1899.

Portrait from Bürglen, C. F.: Abbildungen, Angsb., 1805.

72 Op. 1: Tratado de las drogas y medicinas de las Indias Orientales.

Syn.: Libro que trata de las drogas medicinales y de sus provechos.

Intended to be a verification of the statements of GARCIA da ORTA (see that, and his Coloquios dos simples e drogas e cousas medicinais da India); hence, he borrowed freely from this work. Description of 68 medicinal exotic plants in as many chapters, with an added treatise on the elephant and its qualities. Text begins and ends: "De la canela. Capitulo 1. Pues entre las Drogas medicinales ... Del opio. Capitulo LXVIII (etc.) por lo qual se vera quanta fuerza tiene el uso y costumbre." Followed by: "Tractato del elephante y de sus calidades. Puesto que este tractato del elephante tenia llegado

al libro ... por abreviar, y solo contrar lo mas verdadero, callo (etc.) Vale. Finis."

.1 *Búrgos, Martin de Victoria, 1578.

SGL: 56290

Copy: London; Edinb. Univ.; Paris; J. C. Brown; SGL; Berlin; Wien; Göttingen; Boston M. L.

Tp., (11)f. 448p., 38p., (1)f.; text 165mm; Roman; woodcut portr. of author; 45 woodcuts of plants, and 2 cuts of elephants, all full page, made after the author's frechand drawings; printed marginalia; historiated initials; tp. within architectural border.

Tp.: "Tractado/ Delas Drogas, y medicinas de las Indias/ Orientales, con sus Plantas debuxadas al/ biuo" etc.; tp.v: privilege of printing signed by Pedro Capata del Marmol, clerk of the Court; (1)f: "El rey ...", signed by Antonio de Erasso; (2)-(3r): preface of author to the senate of Búrgos; (3r)-(5r): preface of author to the reader; (6r)-(7r): preface of Juan COSTA to the reader; (7r): portrait of C. Acosta; (8r)-(9r): poems of Claudius LIBESSARDUS, Alonso González DE LA TORRE; (10)-(11r): Table of chapters; index of authors mentioned; p.1-p.416: text; p.417-p.448: Tractado de elephante; p.1-p.36: "Tabla universal" in 2 cols.; p.37-p.38: "Tabla de los arboles"; (1)f. colophon.

SGL: 131558

Copy: Paris; J. C. Brown; SGL.

French translation from the Latin translations of L'Ecluse; transl. by Antoine COLIN, apothecary at Lyon; containing works of GARCIA da ORTA, Cr. ACOSTA, and Nic. MONARDES; commonly catalogued under GARCIA da ORTA; published with the general title: "Histoire des drogues, espi-eries (etc.)".

SGL copy contains only the 3. (Acosta) and 4. (Monardes) part of this edition; p.(344)-p.720; (15)f.; text 145mm; Roman; marginalia in Italics; 38 illustrations to Acosta's text; p.(344) titlepage for part 3: "Traicté de/ Christophle/ de la Coste/ ... Des drogues & medicaments qui naissent/ aux Indes (etc.)"; p.345-6: the translator's preface to the reader; p.347-52: the author's preface to the reader; p.353-501: text,

in unnumbered chapters; 502-720: part 4: Monardes; (15) leaves for tables to all 4 parts under sigs. Zz4-Bbb2, of which index to Acosta is on Aaa₄-Aaa_{6v}.

.6 *Antwerpen, Raphelengii from Plantin's house, 1605.

SGL: 175849

Copy: Paris; London; SGL.

Latin abridgment of L'Ecluse, called 3. rev. & enl. ed.; issued on p.253-294, as Liber 9. of Lécluse Exoticorum libri decem. Roman; text 285mm; marginalia and notes of translator at end of chapters in Italics; 6 illustrations.

p.253 titlepage: "Caroli Clusii Atrebatis exoticorum liber nonus sive Aromatum ... (etc.)"; p.254: preface of translator to William, dated Wien, Jan. 1, 1582; p.255-6: preface of Acosta to the reader; p.257-94: text in 60 chapters (1. De aloe, 60. De sargaço)

.7 *Lyon, Jean Billehotte, 1619.

SGL: 2 copies; 89605; 301391

Copy: Paris; London; J. C. Brown; Edinb. Univ.; SGL.

French of COLIN after the Latin abridgment of Lécluse; enlarged ed. of No. 72.5 (see above); contains also notes of COLIN; the 4 parts are separately paged in this edition, with individual titlepages and signatures (A, AA, AAA, AAAA), introduced by (8) p.l. (sig. *); text 145mm; Roman; but marginalia in Italics; pt 1 and 2 (called 1. and 2. book) 369p., and (7)f. with sigs Aaz-Aaa, containing GARCIA da ORTA's work; pt 2, called 3. book, 176p., and (4)f. with sigs MM₁-MM₄, containing ACOSTA's work; part 3, called 4. book, 102p., and (5)f. with sigs GGG-GGG₄, containing Prospero ALPINO's work; pt 4, 262p., and (5)f. with sigs RRRR₁-RRRR₄, containing Nic. MONARDES' work. 55 illustrations to ACOSTA.

*1: titlepage to volume: "Histoire des drogues espieries, et de certains medicaments simples, qui naissent és (l) Indes & en l'Amérique. Ceste matiere comprise en six livres ... (etc.)"; *1, blank; *2: translator's dedication to André and Richard DuLAURENS; *3: translator to reader; *4-*7: Latin and French poems to COLIN by Hier. LANERIUS, phys. at Lyon, Jean TARDIN, phys., Claude COLIN, Cosme COLIN, surgeon at Lyon, etc.; *7-*8: approbation dated Paris, Febr. 9, 1600; privilege dated Oct. 31, 1618, etc.; *8, blank.

ACOSTA's work is the second part (sigs. AA-MM), and is called the 3. book; p.(1) titlepage: "Traicté de Christophle de la Coste ..." (etc.); p.(2) blank; p.3: translator to the reader; translator mentions the 4. ed. of the Latin abridgment of Lécluse (see under GARCIA da ORTA); p.1-8: preface of Acosta to the reader; p.9-176: text in 59 chapters (1. De l'Aloe, 59. Sargaço (l); MM₁-MM₄; index; MM₅ and MM₆ blank. The average size of illustrations is 120mm x 70mm.—£8-8 (1923).

.8 *Antwerpen, Chr. Plantin, 1632.

Copy: SGL.

Latin abridgment of LECLUSE. 88p.; 155mm; colored illustrations; vignette on tp.—Very rare edition.

Editions nonexistent: a) English transl., Lond., 1604; confused with the English transl. of José ACOSTA (see that); b) 1617 in the Little Voyages of the BRY collection.

72a Op. 2: Tratado del elephante y de sus cualidades.

Text begins and ends: "Puesto que este tractado del elephante tenia ... por abreviar, y solo contrar lo mas verdadero, callo (etc.) Vale."

.1 *Búrgos, Martin de Victoria, 1578.

See in his Op. 1 (No. 72.1-7)

73 Op. 3: Tratado en loor de las mugeres, y de la castidad, (etc.)

.1 Venezia, Giac. Cornetti, 1592.

Copy: London; Paris; Wien; Bonn; Göttingen; L. Congr.

(8)f. 133f. (15)f. for errata; 4^o; tp. within ornamental border composed of allegoric figures, a Dominican(?) monk standing on three skulls, nude Eros hanging with head downwards and holding a broken arrow, etc., signed FRANCO. Rare work. \$6 (1922); £25 (1929); \$125 (1933).

Dubious or nonexistent: a) Valladolid, 1585; nobody saw a copy; b) 1602.

74 Op. 4: Tratado en contra y pro de la vida solitaria.

.1 Venezia, Giac. Cornetti, 1592.

Copy: Paris.

230f.; 4^o; contains also Op. 5 and Op. 6.—Rare work.

75 Op. 5: Tratado de la religión y religioso.

For edition see No. 74.1.

76 Op. 6: Tratado contra los hombres que mal viven.

For edition see No. 74.1.

Lost works: 1) Diálogos theriacales; 2) Carta de la India, 1564; ref. Picatoste No. 8; 3) Discurso del viaje de las Indias

Orientales y de lo que se navega por aquellas partes; ref. Pica-toste No. 7.

ACOSTA, José de, S. J., 1539-1600.

Syn.: Coste; Da Costa; De la Coste; La Coste. Do not confuse with previous author.

B. Medina del Campo, residence of Spanish kings in León, ca. 1539; had a brother called Cristóbal (see reference to him under Cristóvão ACOSTA, synonyms); both became Jesuits; entered the order, 1553 or 1554; ordained presumably after 1564; became teacher of theology at Ocaña, 30 miles East of Toledo; sent to Perú, 1571; Jesuit provincial of Perú, 1571-1586; here, he wrote catechisms in Spanish, which were translated into Indian languages, arranged an ecclesiastical council at Lima (1583), translated Xenophon, and wrote his Op. 6 and Op. 7 based upon his personal experiences; returned to Spain, 1586; became visitor of his order in Aragón and Andalucía, 1587; Op. 6 publ. 1588; Op. 7 publ. 1589; translated his Op. 7 into Spanish and wrote 5 more books to make up his Op. 8, 1589; Op. 8 publ. 1590; meanwhile, he was superior at Valladolid, and rector of a college at Salamanca; in Italy, 1590-1594; became friend of Antonio Cardinal CARAFFA (1538-1591), Librarian of the Pope; Op. 9 and Op. 10 publ. 1590; Op. 11 and Op. 12 publ. 1591; in the same year his Op. 8 was republished in Spanish and translated into German; delegate to the 5. General Council of the Jesuits in Rome, 1592; returned to Spain, and became preacher at Salamanca, 1595; his sermons (Op. 13 and Op. 14) publ. 1596 and 1597; died at Salamanca, Febr. 15, 1600 (other version: Febr. 11, or 1599).

80 Op. 4: Instrucción contra sus ritos.

For editions see Op. 2 (No. 78.1)

81 Op. 5: Tercero catecismo; exposición de la doctrina christiana por sermones.

Forty sermons written in Spanish and translated into Quechuan and Aymaran.

.1 Lima, Antonio Ricardo, 1585.

Copy:

(8)f., 215f.; 4°; in three languages.

.2 Lima, (publisher) 1773.

Copy:

12f., 515p. (correct?)

.3 Paris, Bouret, 1866.

Copy:

xv, 409p.; in Quechuan and Spanish.

82 Op. 6: De promulgando evangelio apud barbaros; sive, De procuranda Indorum salute, libri sex.

.1 Salamanca, Guill. Foquel, 1588.

Copy: London; Hunterian; Paris; J. C. Brown.

Forms the second part (p.111-640) of Op. 7 (No. 83.1), and the colophon of that volume with the date 1588 belongs to this work. Most of the further editions were issued with Op. 7

.2 Salamanca, (publisher) 1595.

Copy: not found.

Together with Op. 7. See No. 83.2.

.3 *Köln, Bireckmann for A. Mylius, 1596. SGL.

Copy: London; Paris; Berlin; München; Wien; J. C. Brown; Sütro Libr.; SGL.

Latin text; issued together with Op. 7. See No. 83.3.

.4 Lyon, Laurent. Anisson, 1670.

Copy: London; Paris; Berlin; München; Wien; J. C. Brown; Sütro Libr.

(12)f., 501p. (14)f.; volume 167mm; called "6. ed."; seems to be the first separate printing without Op. 7.

.5 Manila, Coll. Seti Thomae, 1858.

Copy:

Ed. by Julian VELINCHON. Title: "De procuranda ... (etc.)" £0-10-6 (1922). Nonexistent edition: a) Salamanca, 1589.

83 Op. 7: De natura novi orbis libri duo.

Written in Perú, between 1572 and 1585; closely related to Op. 8 in which Op. 7 forms the 1. and 2. book. The editions of these two works should not be confused.

.1 Salamanca, Guill. Foquel, 1589.

Copy: London; Paris; Hunterian; J. C. Brown.

Volume of two parts; pt 1, (10)f. 110p., is this work with the date 1589; pt 2, from p.11 to p.640, is Op. 6, with the date 1588 in the colophon. Woodcut on tp.—Not very rare; 100 pesetas (1918); £15-15 (1926); £3 (1923); £1-2 (1935); £4-5 (1935).

.2 Köln, Johan Christoffel, 1591.

Copy: J. C. Brown.

German translation; (2)f., 51p. (40)f; with 20 maps. "Geographische und/ historische Beschreibung der uber/auss grosser Landschaft America" (etc.) See also No. 83.5.

.3 Salamanca, (publisher) 1595. 8°

Copy: ?

Contains Op. 7 and Op. 6.

.4 *Köln, Bireckmann for A. Mylius, 1596. SGL.

Copy: Berlin; Breslau; München; Wien; London; Paris; J. C. Brown; Sütro Libr.; SGL.

(8)f., 581p.; 8°; volume 153mm; contains Op. 7 and Op. 6. "Josephi/ A Costa/ Societatis/ Jesu/ de natura novi orbis/ libri 2/ / et etc.; Jesuit emblem on tp.—£5-5 (1923); 48 RM (1938).

.5 Köln, Johan Christoffel, 1598.

Copy: J. C. Brown.

(2)f., 51p. (40)f. with 20 maps. Second ed. of German translation. Title same as of No. 83.2.

.6 Köln, Johan Christoffel, 1600.

Copy: München; Wien; J. C. Brown.

(2)f., 51p.; volume 282mm; 3. ed. of the German translation; title: "New Welt, das ist: Volkommen Beschreibung von Natur, Art und gelegenheit der Newer Welt, die man sonst America oder West-Indien nennet ..." (etc.). Do not confuse with Op. 8.

¶ Grosse refers to a 1599 Köln edition of the New Welt by the same publisher.

84 Op. 8: Historia natural y moral de las Indias.

Consists of 7 books of which the first two are the Spanish translation of Op. 7 (see No. 83); book 1. and 2. written in Perú,

the rest of the work written in Spain. For the relationship of Acosta's work with those of the Dominican DURAN (died 1588) see the article of E. BEAUVOIS in *Revue des questions historiques*, 1885, 38: 109-65. Contents: 1. book in 25 chapters: the sky and the stars; the Poles; knowledge of the ancient World of the New World; the land of Ophir; prophecies; the aborigines of the New World; Atlantis; origin of the Indians.—2. book in 16 chapters: the Tropics; meteorology and biology.—3. book in 27 chapters: natural history; the weather; the Ocean and its straits; Florida; rivers and land; Perú, New Spain, and land still unknown; volcanoes; earthquakes.—4. book in 42 chapters: minerals, metals, gold and silver; the mountains of Potosi; mines; metallurgy; use of metals; precious stones; pearl; plants (Chapt. 16-33); cacao (chapt. 22); animals (chapt. 34-etc.).—5. book in 31 chapters: Indian ethnology, religion, superstitions, temples in Mexico.—6. book in 28 chapters: Mexican chronology; China; writing in China and Mexico; the Incas.—7. book in 28 chapters: history of Mexico.

.1 Sevilla, Juan de León, 1590.

Copy: London; Paris; Berlin; München; Wien; J. C. Brown; Cath. Univ. America.

(1)f., p.3-p.535, (18)f.; vol. 199mm; Jesuit emblem on tp. "Historia/ natural/ y/ moral delas/ Indias/." (etc.) Rare; 120 pesetas (1916); £3-10 (1926); £6-5 (1930); £5-10 (1933); \$90 (1935).

†SGL has an extract of this edition: "Efecto extraño que haze en ciertas tierras de Indias el aire o viento que corre"; Typewritten.

Copies supposedly burnt by the Spanish Government (s. Regnault)

.2 Girona, A. Garrich, 1591.

Copy: Paris.

8^s; extremely rare; no other copy known; probably identical with the so-called Sevilla edition quoted by Brunet.

.3 Barcelona, Jaime Cendrat, 1591.

Copy: London; Wien; J. C. Brown.

(8)f., f.9-f.345, (28)f.; vol. 156mm; Jesuit emblem on tp. "Historia/ natural y / moral de las / Indias." (etc.) Rare; 600fr. (1925).

.4 Venezia, Bernardo Basa, 1596.

Copy: London; Berlin; München; Wien; Göttingen; J. C. Carter; N. York Pub.

(23)f., 173f., 1f. blank; vol. 219mm; Italy; print. dev. on tp.; Italian translation by Giampaolo GALUCCI, astronomer, of Salò. "Historia/ naturale e morale/ delie Indie" (etc.). Rare; 30fr. (1907); £10-10 (1926).

ACOSTA, Nonius.

See Acosta. Nufiez.

ACOSTA, Nuñez, fl. 1594.

Syn.: Costa; Da Costa; Nonius, Nonnius, Nnnes. Not to be confused with a jurist of the 17th century (see Gesamtkat. Preuss. Bibl., where the works of these two men are listed under one name).

A physician born in Portugal; lived at Padova ca. 1594.

93 Op. 1: De quadruplici hominis ortu libri 4.

Written as a thesis for public discussion to be held at the Chiesa di San Francisco, Padova, under the supervision of Georgius PIPANUS, rector at Kraków, on two days of March, 1594. Book 1 in 5 chapters: the first generation of man by God; "Deus est parens omnium"; book 2 in 6 chapters: the second generation of man by man; mode of generation; origin of monsters; role of male and female in generation; book 3 in 5 chapters: the third generation of man; growth and aging; aims of medicine; medicine among the sciences; book 4 in 6 chapters: the fourth generation by attaining perfection and happiness. Statements for discussion at end of each chapter. Text begins and ends (see below)

- .1 *Padova, Lorenzo Pasquato, 1594.

SGL: 161585

Copy: München; Wien; Univ. Königsberg; SGL.

Consists of 2 parts; pt 1 (sig. A), ****, f.1–57 (pp), 1f. blank, contains Op. 1; pt 2 (sig. a), f.1–52, contains Op. 2; text 160 mm; historiated initials.

(*) titlepage: "Nonii / A Costa / Lusitani / De Quadruplici Hominis Ortu, / Libri Quatvor, / Illustissimo / Nicolao Sagredo / Patricio Veneto dicati / (engr. emblem 85mm x 100mm) / Patavii, Apud Laurentium Pasquatium, 1594. / Superiorum permissu." (*1v) blank; (*2r–*4r) dedication to Sagredo: "Vetustissimum ... prodesse valeas. Patavii Idibus Februarii"; (*4v) errata; (**1r–**2v) index of chapters; Op. 1 begins with Prooemium, f.1–f.3; "Quaecunque sua natura, ordine ... genitore in eundem nos deducentes."; f.3–f.57, text of Op. 1: "Liber I. Chapt. 1. De absolute universo & mundo originali. Vetustiorum philosophorum plurimi ... a Theologis conceditur et commendatur"; Op. 2 begins in pt 2, f.1–51v; f.52, announcement of disputation with space left for later insertion of date; f.52, blank.

¶SGL copy bound in vellum; very rare work.

94 Op. 2: Pro geniti hominis cura.

For history of work see No. 93. Text begins and ends: "Pro geniti hominis cura. De arte medendi liber unus. De naturali constitutione, eius causis & differentiis. Cap. 1. Praeclare quidem Peripatetici enunciarunt ... (De venenis & modo quo ab eis humana corpora praeservantur. Cap. XV ...) non raro homines ab imminente morte, Deo auxilio, liberamus." In 15 chapters. Medical philosophy on constitution of body, health and disease, symptomatology, health conservation, therapeutic methods and indications, medicaments, primitive pharmacodynamics, humoral pathology, dispensing, etc.

Issued with Op. 1; for description of volume see No. 93.1. "De arte medendi" is mentioned by Linden as a separate work.

ACQUAPENDENTE, Girolamo Fabrizio d'.

See Fabrizio D'Acquapendente, G.

ACRONIUS, Johannes, 1520(?)–1564.

Syn.: Acron; Atrocianus (Frisius) Not to be confused with a prof. of theology of the same name (1565–1627), or with the next author.

B. Akkrum, a small village of the Netherlands, in Friesland, 7 miles East of Sneek, ca. 1520; hence, Acronius and Frisius; studied at Basel, 1542; prof. mathematics (1547) and logics (1549) at Univ. Basel; was friend of Suffridus PETRI (1527-1597), historian of Friesland, ca. 1557-62; grad. M. D., May 2, 1564; died from plague, Oct. 18, 1564, at Basel (other versions: May 2; Oct. 28; 1563, which is incorrect). (See also the next ACRONIUS) He was a practitioner at Basel, and a student of astronomy.

95 Op. 1: Epistola ad N. N. (i. e. David JORISZ) Letter to his friend, the heretic David JORISZ (1501-1556?) dated July 28, 1559 (after death of Jorisz!)

ADDA, Ferdinando d', fl. 1540-1570.

Syn.: Abdua; Abduensis; de Abdua; also Ferrandus Adduensis.

An Italian jurist, patrician of Milano; once, he was rector at Padova; wrote epigrams (Venez., 1546), orations, and poems to Girolamo Monti (1557), Cardinal Madrucci (1563), hymn to the Virgin Mary (Milano, 1564); commented on the *Pandectae* in 2 books (Lyon, 1561); his only work of medical interest is an oration on the superiority of Law over medicine and philosophy. It caused considerable indignation (see Giambattista PELLEGRINI)

101 Op.: Ad omnes juris civilis interpretes ... oratio, qua manifeste declarat Leges plurimum Medicinae Philosophiaeque artibus antefendas esse.

Confer with this the defense of medicine by G. PELLEGRINI: *Adversus medicinae calumniatores apologia* (Bologna, 1582)

Text begins: "Nulla maior, ornatissimi totoque terrarum orbi illustri ... (etc.; ends) ... tam ingratae litterae unquam reperiri potuerunt, quae gloriam vestram non immortalitatis memoria prosequantur." A vituperation of physicians, and of the medical art.

.1 (Venezia, Aldo) 1546.

Copy: London; Paris; Berlin; Wien.

48f.; London copy 45f. Very rare. Publ. together with his epigrams.

.2 Bologna, P. Bonardi, May 1566. 4°

Copy: Milano.

ADELPHUS, Johannes, fl. 1500-1521.

Syn.: Adelf; Adelphe; Adenlphus (print. error); MUELICH; Mulichius; Mulingus; wrote also under pseud. Jacob Huser (or Hauser) Jost Fritz, Hauptmann; also under initials "Ja. M. D.", "J. A. M. A."

B. Mühlhingen near Strassburg, in the last quarter of the 15. century; stud. med.; was physician at Strassburg, 1503-1515; here, he wrote most of his works, was a proofreader of the Strassburg printers, edited and translated more than 20 different works; visited Trier, 1513; was physician at Schaffhausen, 1516-1520; died probably, 1521; after this year, results of his continued literary activity are unknown. He is one of the forgotten men of the German renaissance period. His chief activity was that of an editor and translator. Only a few of his publications are of medical content.

103 Op. 1: (Editor) Argentinsium episcoporum catalogus cum eorundem vita.

.1 Strassburg, J. Grüninger, 1508. 4°

Further editions by John Mich. MOSCHEROSCH: a) Strassb., 1650; b) Strassb., 1660.

104 Op. 2: Barbarossa.

History of Frederick I, called Barbarossa, Emperor of Germany; work prepared after Latin publications; it is more than a simple translation. Preface dated Schaffhausen, March 1, 1520.

.1 Strassburg, Joh. Grüninger, Aug. 28, 1520.

110 Op. 8: (translator) FICINO, M. Das Buch des Lebens.

Latin original written in 1489, by Marsilio FICINO, with the title: *De triplici vita*. Translated into German by Adelphus in 1505.

.1 Strassburg, Johan Grüninger, April 1505.

Copy: ?

Ref.: Weller 311; Panzer 557.

192f., 130f.; fol.; woodcuts. The volume is the so-called *MEDICINARIUS*, or *Das Buch der Gesundheit* as seen from the running headlines; it is a collection of works by BRAUN-SCHWEIG (=Brunswick), FICINO, and an anonymous author; contains a) BRAUNSCHWEIG's: *Liber de arte distillandi simplicia et composita*; 2 books of the so-called "Kleines Destillierbuch"; b) FICINO's work translated by Adelphus under the title "Natürliche und gute Kunst zu behalten den gesunden Leib und zu vertreiben die Krankheit mit Erläuterung des Lebens"; c) *De quinta essentia* and other pieces. With this arrangement, the volume was repeatedly printed.

†Not to be confused with editions of the *Grosses Destillierbuch* of BRAUNSCHWEIG.

.2 *Strassburg, Johan Grüninger, 1508.

SGL: 119271

Copy: Paris; SGL.

(58)f. without foliation; text 235mm; Gothic; 2 cols; 24 cuts; initials. The volume is just the second half of the *MEDICINARIUS* (see above), containing the German translation of FICINO's work, and the *Quinta essentia*, with sigs.: X⁴ Y² AA⁶ BB⁶ CC⁶ DD⁶ EE⁶ FF⁶ GG⁶. See § note at end.

X₁ titlepage: "Das buch des lebens / Marsilius ficinus zu Florentz / von dem gesunden und langen leben der rechten artzneyen / von dem Latein erst nūw zu tūtsch gemacht durch Johanem adenlphum(!) Argen. un an-/ derwert emendiert und gebessert. mit vil nūwen zusatze der quinta essentia und anderer stück / (woodcut 100mm x 155mm); X_{1v} poem: "Marsilius Ficinus bin ich genant/ In der Stat Florenz gar wol hekant" (etc.); contents in general outline; X_{2r} dedication of translator to Heinrich GRAUEN of Werdenber, canon in Strassburg; X_{2v} title of Ficino's dedication to Lorenzo MEDICI, and woodcut 150mm x 135mm; X₃ (both sides) preface of Ficino, division of work into three books; X_{4r} in one single column: preface of Ficino to the first book, addressed to Giorgio Antonio VESPUCCI and Giambattista BONINSEGNI; X_{4v} col. 2: register of Book 1; Y_{1r}–AA_{2v} (no columns): *Das Buch des Lebens*; AA_{3r} preface of Ficino to Book 2, addressed to Philippo VALORI, with register of chapters; AA_{4r}–DD_{1v}: *Das ander buch ... von dem langen leben*; DD_{4v}, col. 2. explicit: ... "erst mals recht nach dem latin corrigiert und emendiert durch Johannem Adelphum Mulich zu Strassburg im jar 1508 am abent des Ertzengels Michaelis"; EE_{1r}–GG_{8r}: "Von quinta essentia"; this part is not translated by Adelphus; it is called "das fünfte Teil" of the volume, followed by "das letzte buch des Medicinarii"; GG_{8r}, col. 2. colophon.

The 24 woodcuts are as follows: 1. on tp., 100 x 155, Marsilio Ficino sitting on chair on terrace, with a young and an old man standing before him; low wall of terrace; castle in background; 2. on X_{2v}, 150 x 135, 7 persons within a room; 3. on Y_{1r}, 85 x 155, the nine Muses, one of them sitting on throne and crowning a kneeling man; 4. on Y_{4v}, 110 x 160, garden with 4 figures, medicinal plants, and distilling oven; 5. Y_{4r}, 85 x 140, scene from a brothel, with 7 prostitutes, and 3 men of different nationality; 6. Y_{6r}, 60 x 145, tripartite allegorical cut showing a) a talking pair, b) the earth and stars, c) a sleeping man; 7. Y_{6v}, 60 x 155, tripartite cut, allegorical showing a) time for recreation, b) for work, c) for eating; 8. Z_{2v}, 170 x 135, inside of an apothecary's shop with 2 figures, and vials on two shelves; 9. Z_{4r}, 15 x 140, interior scene with 2 sitting figures at table, one playing a musical instrument, oven in left back; 10. Z_{6r}, 160 x 135, scene in a kitchen with 2 figures; 11. Z_{6r}, 75 x 140, tripartite cut with bloodletting scene in the center; 12. AA_{1r}, 75 x 145, tripartite cut with man on sleeping porch suffering from insomnia, in center; 13. AA_{2r}, 80 x 135, exterior, with man traveling in coach drawn by 4 horses, 2 bystanders, 2 reading music notes or map (symbol of forgetfulness?); 14. AA_{3r}, 85 x 80, interior scene with magister and a little child in front of bookcase; 15. AA_{4r}, 120 x 150, exterior scene, with man sitting at covered table in garden, 4 musicians, two on each side, woman coming from left back; signed (on the little label hanging over the sitting man's head): C. A.; for the life of this woodcutter and his other works see Nagler: *Die Monogrammisten*, under No. 2186; from the style of the cuts he seems to be the artist of all the unsigned cuts; 16. AA_{5v}, 80 x 150, tripartite cut: a) man sitting before fireplace, b) old man in bed attended by physician, c) physician holding up a urine bottle; 17. AA_{6v}, 145 x 140, poor man in a hospital (?) bed attended by 3 physicians; 18. BB_{2v}, 60 x 60, small town and castle; 19. BB_{3r}, 65 x 60, old man enjoying sun, country, and God; 20. BB_{4v}, 60 x 145, bipartite cut: a) dining scene before a house with 10 figures, b) two wanderers (tramps?) lying on ground in front of forest and fountain; 21. CC_{1v}, 120 x 155, Aeneas,

Dido, and others at table; 23. CC_{6v}, 120 x 145, Virgillus and Maecenas walking out of Rome to open country full with vineyards; 24. DD_{3r}, 135 x 85, Virgin with Child adored by the three Oriental kings.

NOTE: The first part of this edition of the MEDICINARIUS was printed Strassburg, Joh. Grüninger, 1509, and separately bound; usually catalogued under BRAUNSCHEWIG. For description of SGL copy of this part (119270) see under BRAUNSCHEWIG. The titlepage has a large bipartite woodcut, its upper half being identical with Cut No. 1, the lower with Cut No. 4 described above. The title reads: "Liber de arte distillandi ... Ouch von Marsilio Ficino und anderen hochberömpften Ertzte natürliche und gute künst, zu behalten den gesunden leib und zu vertreiben die Krankheiten mit erlengerung des lebens."

.3 Strassburg, Joh. Grüninger, 1515.

Ref.: Panzer

Copy:?

130 f. fol; "Das Distillierbuch. Das buoch der rechten Kunst zu distillieren und die Wasser zu brennen"; also the work of FICINO.

.4 *Strassburg, Joh. Grüninger, 1521.

SGL: 84148

Copy: German Museum; SGL.

Published as part of the MEDICINARIUS under the general title: "Das distillierbuch" (etc.) of Braunschweig; first half of 130f.; second half not foliated, sigs. A-I, all in 6, except A and I, which are in 8; text 240; Gothic; 21 cuts (different woodcutters). Title: "Das buoch des lebens" (etc.), without the translator's name; text of FICINO from A₁ to C_{6v}, followed by the 5th and 6th part of the MEDICINARIUS.

The woodcuts number only 21; they are essentially those of the 1508 edition, but made by a different artist, probably by "P.", whose signature appears on the bipartite woodcut on E_{6v}; several bi- and tripartite cuts in new arrangement; also new cuts as follows: 1. A_{4r}, 80 x 160, bipartite: a) the 9 muses standing, b) man entering the room; 2. C_{6v}, 140 x 135, interior of an apothecary's shop with 4 figures; 3. D_{2r}, 75 x 155, tripartite cut: a) physician holding up urine bottle, b) scene of courtship, c) wall with window; 4. D_{6r}, 80 x 155, tripartite cut: a) old pair sitting at dining table, with musicians, b) man kneeling and admiring a garden, c) six old persons standing in a crowd; 5. 60 x 145, E_{6r}, tripartite cut: a) old pair in a building, b) old pair walking, c) street scene with 9 figures; 6. E_{6v}, 60 x 155, bipartite cut: a) man in bed attended by three persons, signed "P."; b) garden scene with 6 figures; 7. F_{2r}, 100 x 75, dining table with 6 figures at table, and 2 musicians; 8. F_{3v}, 115 x 145, open country with city in background, several pairs walking or petting; 9. F_{6v}, 65 x 150, tripartite cut: a) woman picking flowers, b) a chained monkey, c) street scene.

Ref.: Panzer.

Unpublished MSS: a) *Historia Siculi*; b) *De situ valli Mazariae*; dedicated to Ettore PIGNATELLI, viceroy of Sicily; c) *De laudibus Mazariae*; d) *Legenda Sancti Viti*; e) *De phlebotomia*; dedicated to Charles V; f) *De praeservatione pestilentiae*; written to his son, Antonio; g) *De medicinis ad varios morbos hominum*; h) *De balneis Siculis*; written to his son. Most of these MSS are in private libraries of Palermo.

ADRIAANSZ, Cornelis, 1520-1581.

Syn.: Adrians Sohn; Adriaensen; Adriaensen; Adrianus; Broer Cornelis; Cornelis van Brugge.

B. Dordrecht, 1520 (not 1521); his father was Adriaan Cornelis WOUTERS; entered the Franciscan order, 1548; studied theology, Greek, Hebrew, and became lecturer in these subjects; became guardian in his order, and lived in Brugge; his sermons advocated the brutal castigation of the body; established a circle of devoted flagellants (Betje Maas and Kalleke Pieters), by which he became the center of public scandals; died Ypern, July 14, 1581.

For biography see Sander, A. *De Brugsensibus eruditione fama claris*.—Desselius, A. *Bibl. belg.*—Meteren, E. *Niederl. Historie*, ad ann. 1578.—Brandt, G. *Hist. Abrégé de la reform. des Pais Bas*, pt 1. For his "disciplina gymnopygica" see Flekwick, H. A dialogue between a Dutch Protestant and a Franciscan friar (1784; 1812).—Frusta (pseud. for Carl Aug. FETZER) *Der Flagellantismus* (1834).

ADRIAENSEN, Cornelis.

See Adriaansz, Cornelis.

ADRIAENSENS, Corneille, S. J., fl. 1590-1600.

Syn.: Adriani. Not to be confused with the Franciscan friar of the same name. (See Adriaansz, Cornelis)

B. Antwerpen; teacher of mathematics, Hebrew, and philosophy at the Univ. Ingolstadt, 1592-99; later, professor at the Collegium Romanum. He was praeses of several natural philosophical theses; here listed only in order to avoid confusion with Cornelis Adriaansz. The theses were: 1) *De corporibus simplicibus*; resp. J. C. HUTTLER; 2) *De loco et vacuo*; resp. P. PORCELEUTUS; 3) *De tribus rerum naturalium principis*; resp. P. REIFF; all publ. by Wolfgang Eder, at Ingolstadt, in 1595.

ADRIANI, Junius.

See Jonghe, Adriaan de.

ADRIANI, Marcello Virgilio, 1464-1521.

Syn.: Marcello Virgilio; Virgilio. Not to be confused with Marcello ADRIANI (1533-1604), translator of Plutarch and Demetrius.

B. Firenze, 1464; his father was Virgilio A.; stud. med.; but never practiced; chancellor of Firenze since 1498; prof. of Greek at Firenze; his translation of Dioskurides publ. 1518; was called "the Florentine Dioskurides". Died from a head wound, Nov. 27, 1521.

134 Op. 1: (translator and commentator) DIOSKURIDES. De medica materia.

Critical reconstruction of the original text from 5 different codices, then translated into Latin, with an attempt of using the medical terminology of Celsus, Plinius, etc. and of identifying the plants described by Dioskurides. The annotations or commentaries, which make up about 50% of the work, are a mixture of medicine and philology, often with severe criticism of Ermolao Barbaro. Dedicated to Leo X, Pope (died Dec. 1, 1521) Text begins and ends: "Post multos non veteres tantum ... ampliore volumine librorum et legentes defatigare: visum non est."

AFFAITATI, Fortunio, ca 1505–1550 (or 1551)

Syn.: Afaetati; Affaitatus; Affaydatus; Affaytadi; Affeytat.

B. 1505 or 1506 at Cremona as son of a noble family; was interested in medicine, astronomy, and theology; prof. of mathematics at Venezia; later, settled in Roma, where he became physician to Pope Paul III (1468–1549); the Pope died Nov. 10, 1549, whereafter the author, who dedicated his single work to the pontiff, emigrated to England, and in London was teaching mathematics (not in 1548); he drowned in the Thames. Died 1550 (var.: 1555)

143 Op.: Physicae et astronomicae considerationes.

Contains six treatises: (a) De peculiari magnetis ad polum descensu; (b) De causa cur magnes ad se ferrum attrahat; (c) De androgyne a se ipso concipiente, etc. The last mentioned treatise has been considered a separate work by Carrere, and called *De hermaphroditis*.

The same French translation under the title: "La désolation de l'Univers".

AFINE (Van den Eynde) Henry, fl. 1515–1532.

Syn.: Afineus; Affinius; Henry de Fine; de Fines; van den Eynde.

B. at the end of the 15. cent. at Lierre (Lat. Lyra) a small industrial town near Malines in Belgium; hence, called *Lyranus* or *Lyrensis*, or de *Lyra*; stud. med. at Louvain; ca. 1516, resided in Antwerpen, and wrote his Op. 1, which he dedicated to the mayor of that city, his compatriot; next year, he became archiater of Antwerpen, and in 1518 the University of Louvain engaged him as an astrologer; in this position he published his yearly prognostications (see Op. 2) from 1518 to 1532; thereafter, nothing is known of him.

146 Op. 1: Questiones tres.

Three questions of interest discussed at the Academy of Louvain in 1516: (a) De reductione medicinae (or medicinarum) ad actum; (b) De correctione Calendarii; (c) De intelligentiis.

.1 Antwerpen, Willem Vorsterman, Apr. 4, 1517.

Copy: Paris; Gent Univ.; Brit. Mus.

32f. A–H⁴; Gothic; 4° On f. 5r: his letter of dedication to Arnold, mayor of Antwerpen, dated Antwerpen, Dec. 24, 1516. The copy contains also two poems, and a letter of Erasmus to the author.

147 Op. 2: (Prénostication de Louvain)

The title varies in the different years; presumably it was an annual publication (1518–1532) but only a few issues can be traced.

AGER, Nicolaus, 1568–1634.

Syn.: Acker; Agerius.

Physician, and botanist; b. Itenheim(?) in Alsace, 1568; stud. at Strassburg; 1591, pupil of Spach (1560–1610), whose library he visited frequently and of which he wrote an epigram (op. 1); his teachers, including J. L. Hawenreutter (1548–1618) and Melchior Sebiz sen. (or Sebisch, 1539–1625), liked him, and he wrote a medical dissertation for each of them (op. 2, 3, 6); he graduated at Strassburg, 1593; in 1597, he studies at Basel, where he was engaged in pathological and botanical studies, and became acquainted with the Bauhin brothers; 1597, Op. 4 published at Basel; his botanical discoveries he revealed to the Bauhins, and incorporated in the pharmacological book of Walter RYFF, which he revised and edited in (op. 5) 1602 at Strassburg; between 1602 and 1614 his activities are unknown, but after 1614 he became professor at the Strassburg University on the philosophical faculty, taught physics, and was the praeses of several dissertations at this faculty (1619–1621); from 1623 on until his death he was also the assistant professor at the medical faculty, and was the praeses of a large number of medical dissertations; during this time he himself wrote only four small theses (Op. 7–10); it is mentioned that he was also a canon of the Thomas Church at Strassburg. He died June 26, 1634. His botanical

investigations brought him the honor that Linne named a plant after him (*Pederota agerii*).

See also **Sitzmann**. Dict. biogr. d. hommes célèbres de l'Alsace.

148 Op. 1: De bibliotheca medica ... Doct. Spachii epigramma.

A poem "ad lectorem" in 25 distichs. Begins: "Barbarus, ut fama est Cyllenia numina placans Mercator, tumidis lineata pandit aquis"

and ends "Sic vigili demum sparget monumenta labore Disposita & medicas accumulabit opes."

.1 *Frankfurt, M. Lechler for N. Bassaeus, 1591. **SGL:66145**

On f.(7v)-(8v) i. e., the preliminary leaves after the preface of Israel Spach's *Nomenclator scriptorum medicorum* (description of the volume see under Spach)

149 Op. 2: De homine sano.

His inaugural dissertation under Israel Spach. According to its subtitle, it discusses the parts of the human body, their actions and uses. In the preface the author mentions that he often was present at dissections made by Johann Sebastian Fride, a physician at Strassburg. The work contains 409 short "theses" anatomical and physiological, with many references to Galen.

Text begins: "De homine sano thesis I. Magna ea profecto Hominis laus est: ... (ends) ... omnia nostra consilia, dicta & facta ad Laudem nostri Conditoris dirigamus. Amen."

.1 *Strassburg, Anton Bertram, 1593. **SGL:418**

Copy: Brit. Mus.; SGL.

(38f.); sig. A-H¹⁶; preface in Roman, text in Italic, with Greek letters occasionally; text 15 x 10 cm. F.A_{1r} tp. in floreated border: "Theses medicae / physicae, / De Homine Sano, / hoc est, / De Partibus Humanum / Corpus Constituentibus, ea- / rumque actionibus & usu."; f.A_{1v} blank; f.A_{2r}-A_{2v}: preface or dedication to Ulrich Chelius, archiater of Strassburg and to others dated VI. Kal. Julii, 1593, Strassburg; f.A_{4r}-l_{5v} text; f.l₅ blank.

150 Op. 3: Theses medicae de dysenteria.

.1 Strassburg (publisher) 1593.

Copy: BM.

(12f.); 4? His inaugural dissertation under Melchior Sebisch, sen.

151 Op. 4: Chronologia medica.

.1 Basel (publisher) 1597.

Copy: Leningrad Med. Chir. Acad.

In the catalog of the Leningrad Med.-Chir. Academy it was classified as a publication on medical history; it is not, since the subtitle reads: "... hoc est, conclusiones de temporibus rerum praeter naturam tum universalibus, tum particularibus." Exceedingly rare.

152 Op. 5: (editor) RYFF, Walter: Neue auszgerüste Deutsche Apoteck.

According to the preface of the printer, the editor not only enlarged the work of RYFF with many new compositions and remedies, but also rearranged the material so that it is truly a new work. The editorial work must have been finished by Nov. 20, 1601. There is no preface by the editor, whose name appears only on the title and in the preface of the printer.

.1 *Strassburg, Lazar Zetzner, 1602. **SGL:119182**

Copy: Paris; SGL; Univ. Wisconsin.

(6)f. 721p. (13)f. 302p. (4)f.; fol.; text 26 x 15 cm; Gothic. The running title calls the volume *Reformierte Deutsche Apotecke*. For full description see under **Ryff**.

153 Op. 6: De elementis.

His disputation under J. L. Hawenreutter as praeses.

.1 Strassburg (publisher) (1614)

Ref.: Hefter 2:2766.

Copy:

The full title reads: "De elementis ut materia sunt mutationis: ex Libr. II. Aristotelis de generatione et interitu." 18f. 4? Part of a series of disputations on the elements held at the Strassburg University in 1614.

154 Op. 7: (Problemata) or (De elementis)

Part of a series of "medical exercises" under Melchior SEBISCH jun. (1578-1674) as praeses. This is the 5. "Exercitatio medica" published separately, and in 1639 bound together with others under a common title-page "Exercitationes medicae", which gives credit to Sebisch as author.

Auger's work contains six problems: 1. An vocabulum στοιχείου Elementi, uno eodemque semper modo accipiat?; 2. Rectene de Elementis in medicina praecipiat?; 3. An Galenus ... recte dicat, elementum esse minimam rei (etc.)?; 4. Utrum sensus iudex sit eorum, quae vera & natura cuiusque rei sunt elementa (etc.)?; 5. An Hippocratis argumen-

tatio contra unitatem elementi (etc.)?; 6. Utrum 4 tantum sint elementa .. ex quibus tum corpus humanum, tum in universum omnia corpora mixta constent?

.1 *Strassburg, Typ. Rihel, 1623.

SGL:44963

Copy: SGL.

(4)f.; sig. A⁴. Roman and Italic; text 160 x 100mm. F.A_{1r}: title-page: "Exercitatio / Medica / Quinta; / etc." F.A_{1v} blank. F.A_{2r}-A_{2v}: text beginning with the first problem as above and ending: "Primae ergo elementum terrae; secundae aquae; tertiae aeris; ultimae ignis in memoriam tibi revocabunt."

155 Op. 8: (Problemata) or (De cerebro et nervis)

Part of a series of "medical exercises" under M. Sebisch as praeses. See above under Op. 7. This is the 22. "Exercitatio medica". Published in the same collection as Op. 7.

It contains ten problems: 1. Cum officium cerebri ab Aristotele ... sit reiectum; merito quaeritur, quodnam sit genuinum & germanum?; 2. Rectene spinalis medulla nomen medullae sibi vindicat?; 3. An nasus sit organum olfactus?; 4. Utrum anteriores cerebri ventriculi sint olfactus organum?; 5. An Aristotelis admittenda sententia de sensorio olfactus?; 6. Quod ergo verum, & genuinum olfactus sensorium?; 7. Sinite aures auditus instrumentum?; 8. An lingua sit musculus?; 9. Utrum cor in numero musculorum habere queat?; 10. An cor sit calidum, & humidum?.. The text begins with the first problem as above, and ends: "... sed etiam omnibus plane corporis particulis: quemadmodum sensus docet."

.1 *Strassburg, Johannes Andreas, 1624.

SGL:44963

Copy: SGL.

(6)f.; sig. A⁴B²; chiefly Italic; text 160 x 100mm. F.A_{1r}: title-page: "Exercitatio / Medica / Vigesima Secunda; /"; f.A_{1v} dedication to Matthias Bernegger, prof. of history at Strassburg; f.A_{2r}-B_{2v} text.

Both Op. 7 and Op. 8 bound in SEBISCH, M. Exercitationes medicae, Strassb., 1639.

156 Op. 9: De diebus criticis.

This is the first, general part of a disputation under Melchior SEBISCH, jun., as praeses. The second, or special part was proposed by Melchior ZSCHUESY. It contains 121 short "theses" and 32 miscellaneous "pargra". It deals also with astrology, the influence of the moon, the hidden virtues of numbers, etc.

Text begins: "Thesis I. Disputationibus duabus doctrinam de morborum temporibus complexi sumus ... (ends) ... ergo nulla est inter naturam at septenarium numerum tacita occultaque conspiratio." The "pargra" begins: "Virtus & Natura curant morbos ... (ends) 32. Solum vertere in diuturnis morbis, optimum. Hipp. I, 6, epid. s. 5."

.1 *Strassburg, Johannes Andreas, 1626.

SGL:

Copy: SGL.

(16)f.; sig. A-D⁴; text Roman with occasional Greek words; the pargra in Italic; 145 x 100 mm for both parts. F.A_{1r}: title-page: "Disputatio / De Diebus Criticis / Prior; continens doctrinam eorum generalem; / F.A_{1v} dedication to Paul MUEG, quindecimvir of Strassburg, and to others; f.A_{2r}-D_{2v} text of theses; f.D_{3r}-D_{4v} text of pargra. End piece.

157 Op. 10: De infarctibus mesarai.

It is a medical inaugural dissertation for which Auger acted as the praeses, but the name of the respondent is unknown. Hence, it is listed here under Auger's name.

.1 Strassburg, E. Welper, 1629.

Copy: Brit. Mus.

14f.; 4?

In the catalog of the Bibl. Nat. of Paris, Auger is mentioned as the author of a thesis *De putredine* (Strassb., 1625), yet this is the work of Lazar von HEYDEN under M. Sebisch as praeses.

AUGER himself was the praeses for 44 inaugural dissertations at the University of Strassburg. Many of them are mentioned by various bibliographers as works of Auger. All of them are by 17. century physicians, and will not be included in this list elsewhere than here. All were published at Strassburg, and listed by Hefter in the two volumes of his *Museum Disputatorium*. In the following list the credit is given to the respondents:

- 1619. Kisling, J. De elementis. 8f.
- 1621. Rihel, J. Quaestiones physicae septem. 10f.
- Wittwer, A. Decas questionum physicarum de tempore. 6f.

In his Op. 1; consists of four books.

161 Op. 3: Epigrammata nonnulla.

.1 Augsburg, P. Ulhard, 1548.

Copy: Paris.

Published in Op. 1; among these may be two other works of which only the titles are known: a) *De arcu cupidinis libri tres*; b) *Veneris et cupidinis dialogismus*.

AGOSTINO VENEZIANO, 1490?-1540?

See *Di Musi*, Agostino.

AGRESTO da FICARUOLO, pseud.

See *Caro*, Annibale.

AGRICOLA, Conrad, -1617.

Syn.: Bauer.

A German printer at Nürnberg and Altorf at the beginning of the 17. century; 1602, published and edited the work of Andrea CESALPINO (1519-1603); 1610, published a concordance to the Bible, which was often reprinted; died 1617.

162 Op.: (editor) A. CESALPINO. De metallicis.

.1 Nürnberg, C. Agricola, 1602. 4°

For description of volume see under *Cesalpino*.

AGRICOLA, Franz, -1624.

Catholic German theologian; b. ca 1545 at Lünen, a small village in Westphalia; about 1568, becomes pastor at Rödingen, close to Köln; here, he wrote many sermons and theological pamphlets between 1568 and 1614, some of them of medical interest; at the end of his life he migrated to Sittard, a small town in Limburg (Netherlands), where he died 1624 (not 1621).

163 Op. 1: Diatriba evangelica de coniugio et celibatu sacerdotum.

Discussion on marriage of priests and bishops.

.1 Köln, M. Cholinus, 1581.

Copy: BM; Berlin; München; Wien.

8°; 285p.

.2 Köln, H. Hoberg, 1604.

Copy: Paris; Wien.

Issued twice; as (a) *Nova apodixis Evangelica de ... statu concubinariorum*, and (b) *Demonstrationes evangelicae de ... statu concubinariorum*. Seems to be the same work as the *Diatriba*.

164 Op. 2: Gründlicher Bericht ob Zauberei die argste und greulichste Sünd auf Erden sei.

.1 Köln, Falckenburg, 1597.

Copy: Berlin; Münster.

231p.; 8° Title reads: "Gründtlicher Bericht, ob Zauberey die argste und greulichste sünd auff Erden sey. Zum andern, ob die Zauberer noch Busz thun und selig werden mögen. Zum dritten, ob die hohe Obrigkeit ... die Zauberer und Hexen am leib und leben zu straffen schuldig."

.2 Dillingen, Hänlin, 1613.

Copy: Brit. Mus.; München; Wien.

353p.; 8° With slight change in title.

.3 Ingolstadt, Hänlin, 1618.

Copy: München.

263p.; 8°

.4 Würzburg, Fleischmann, 1627.

Copy: BM; Breslau.

277 (or 177?)p.; 8°

165 Op. 3: Biblischer Ehespiegel.

.1 Köln, Wolther, 1599.

Copy: Berlin; München; Münster; Wien.

125p.; 4° Catholic sermons exposing the abuses in contemporary marriages. Rare.

AGRICOLA, Georg, 1494-1555.

Syn.: Bauer; "Landmann" (Nouv. biogr. gén.); Pauer; "Glaucius"; generally called "senior". Not to be confused with (a) Georg Agricola, Catholic priest and bishop, commonly called the younger, ca. 1560; (b) Georg Agricola, physician at Nürnberg, ca. 1573 (q. v.); (c) Johann Georg Agricola, physician ca. 1617.

B. 1494, and not earlier, as proved by his epitaph ("mortuus est aetatis suae 62, 10. Cal. Nov. 1555"); March 24, not March 14, at Glauchau, industrial city of Saxonia, and residence of the counts of Schönburg, a few miles away from Zwickau. His brother called himself Franz Bauer. He studied first at Glauchau, then in Zwickau, where he learned Greek and Latin; 1510, became "rector extraordinarius" of Greek at the Zwickau school; 1512, stud. theology, physics, and chemistry at the University of Leipzig, one of his professors being Peter SCHADE (Mosellanus), a leading humanist of the 16. century; 1518-22, teacher of Greek at Zwickau, and published his grammatical work (op. 17); 1522-1524, at Leipzig as assistant rector of Peter SCHADE; 1524, after the death of his chief, travels in Italy, visits the medical schools of Bologna, Padova, stayed in Venezia, and became acquainted with the publishing house of the Aldo family; during his Italian sojourn, somewhere he graduated an M. D., studied Arabic and Greek; 1526, returns to Germany, and becomes town physician of Joachimsthal in 1527. Here, he had opportunity to devote himself to mineralogy and metallurgy, and to observe the miners of the "Giant Mountains" (Riesengebirge); received much good advice from his friend, Lorenz BERGMANN (or Bergmann), an expert in mining; 1530, published his work (op. 3) on

metallurgy; in the same year, Prince Moritz of Saxonia called him to Chemnitz to become the historian of his court; his new position brought him closer to the political events, to the danger of Christian Europe by the invasion of the Turk; 1531, he became town physician of Chemnitz, and was repeatedly elected the mayor of the town; in a respected position and in favor of the prince he was able to continue his mineralogical and geological studies, which have been published in various works; meanwhile, the entire city of Chemnitz left the Catholic church with the exception of Agricola, who, therefore, became the object of religious persecution. It is told that even his sudden death by apoplexy was caused by a stormy disputation with his protestant enemies on Nov. 21, 1555. Religious hatred did not allow his burial in Chemnitz; his corpse had to be removed to the nearby Zeitz, where Agricola was buried, 4-5 days after his death. According to other reports, he died from a short febrile disease.

For his many mineralogical publications he is considered the father of mineralogy and metallurgy. See his life in E. Darmstädter: Georg Agricola, Münch., 1926.—Portrait taken from the portrait collection of the Army Medical Library.

[Check list of works

Opera omnia.

Op. 1: De animantibus subterraneis.

Op. 2: Appellationes quadrupedum, etc.

Arte (de) metallica. See Op. 18.

De bello adversus Turcam ... oratio. See Op. 13.

Bergwerck-Buch. See Op. 18.

Op. 3: Bermannus; sive, De re metallica (dialogus)

Bücher vom Berg- und Hüttenwesen. See Op. 18.

Commentarius in artem medicinalem Galeni. See Op. 8.

Op. 4: Ad ea quae A. Alciatus denuo disputavit de mensuris, etc.

Op. 5: Epistola ad Plateanum ... de mensuris.

Epitome in omnes G. Agricolae ... libros. See Op. 11.

Op. 6: De externis mensuris et ponderibus.

De fontibus medicatis. See Op. 12.

166 Op. om.: (Opera omnia seu collecta)

.1 Basel, H. Froben & N. Bischof, Sept. 1546.

Copy: BM; Paris; Wien; Berlin; München; Breslau; Osler; Phila. Acad. Nat. Sc.; U. S. Geol. Survey. 487p. (51)p.; fol. Print. device on tp. and at end. Dedicated (1544) to Prince Moritz of Saxonia. Contains Opp. 14, 12, 7, 20, 3, and 9, with additional index.—£ 8/10 (1939). Rare

.2 Venezia, Michele Tramezzino, 1550. 8°

Copy: BM; München; Wien; Engineer. Soc. N. York.

Italian transl. by an anonymous author; (27)f. 1 blank 467p. (1)f.; Italic. Dedicated to Cardinal Di Monte. Contents as above, but Op. 9 omitted.

.3 Basel, H. Froben & N. Bischof, Sept. 1558.

Copy: BM; Berlin; Wien; John Crerar Libr.; Engineer. Soc. N. Y.; N. York Pub. Libr.

Latin edition with the same content as the Ed. Princeps; (4)f. 470p. 1 blank, (20)f. Contains 142 cuts.—90 RM (1911); 36 RM (1930); £ 1/10 (1931).

.4 Wittenberg, A. Rüdinger for Zacharias Schürer, 1612.

Copy: BM; Paris; Berlin; Wien; NYAcadM.; Phila. Pub. Libr.

Latin edition with contents as in 1546; ed. by Joh. SIGFRID; also a treatise by Georg FABRICIUS De metallicis rebus et nominibus observationes. (14)p. 1014p. (114)p.; 8°—25 RM (1930).

.5 *Basel, Emanuel König, 1657.

SGL:140403

Copy: BM; Paris; Berlin; München; Wien; Breslau; John Crerar Libr.; Welch Libr.; NYAcadM.; SGL.; Phila. Acad. Nat. Sc.; Amer. Philos. Soc.; Phila. Pub. Libr.; Pennsylvania Univ.; Massachusetts Inst. Technol.; Bowdoin; Univ. Chicago; Univ. Michigan.

More complete than the previous editions, including also Op. 18, and Op. 1. Latin; (7)f. 708p. (45)f.; fol.; text Roman in two different sizes; dictionaries in Roman, Italic, and Gothic; text 250 x 150 mm for the first half, 275 x 155 for the second half, which is in double columns, 255 x 150 for the dictionary in double columns, and 275 x 160 for the index in three columns. The volume can be arbitrarily divided into three parts: 1. part: ending on p. 477, contains the chief work of Agricola De re metallica libri 12; it has 276 woodcuts, more than 50 of them being full-page cuts, including 2 folding plates (between p.96 and 97, and 100 and 101); 4 cuts are signed: RMD, i. e., Rudolf Manuel DEUTSCH (q. v.); there are also several diagrams; 2. part: beginning on p.478 and ending on p.708, contains the other works; dedications in Italics, text in Roman double columns; there is one full-page woodcut in this part; 3. part: contains dictionaries not by Agricola, and various indices; this part has signatures with letters of the Greek alphabet.

1. part: Tp.: "Georgii Agricolae / Kempnicensis medici ac / philosophi clariss./ De Re Metallica / Libri XII," etc.; with list of added works in 2 columns, followed by a woodcut of a man in front of a furnace, and the imprint; tpv: blank; the next 2. leaf and the recto of the 3. leaf: letter by Cornel MARTIN, professor to Johann SIGFRID dated Helmstadt, 15. Cal. Sept., 1612; verso of 3. leaf blank; A) f.(;)2-(;)3v: Agricola's dedication to Moritz of Saxonia dated Chemnitz, Dec. 1, 1550; f.(;)4r-f.(;)6v: poem in distichs by Georg FABRICIUS to the reader dated Meissen (=Misnia) 1551; p.1-477: text of De re metallica libri 12;

2. part: B) p.478: list of authors quoted in the next work; p.479: dedication by Agricola to Georg FABRICIUS dated Chemnitz, 3. Id. Aug., 1548; p.480-492: De animantibus subterraneis; C) continued on p.492 to p.527: De ortu et causis subterraneorum libri 5; p.528: list of authors quoted; D) p.529-532: dedication by Agricola to Moritz of Saxonia dated Chemnitz, 8. Cal. Nov., 1545; p.533-566: De natura eorum quae effluunt ex terra libri 4, ending with a list of authors quoted; E) p.567-568: dedication by Agricola to Moritz of Saxonia dated Chemnitz Id. Febr., 1546; p.569-664: De natura fossilium libri 10, ending with list of authors quoted; F) p.665-666: dedication to Moritz of Saxonia dated Non. March, 1546; p.667-678: De veteribus et novis metallis libri 2; G) p.679: letter of Erasmus to Andreas and Christoph von CONRITZ, dated Freiburg, 12. Cal. March, 1529; p.680-681: letter of Peter PLATEANUS, rector at Zwickau, to Heinrich von CONRITZ, superintendent of Joachimsthal, without date; p.682-701: Bermannus, sive de re metallica; H) p.702: letter of introduction by Agricola to Wolfgang MEURER, dated Chemnitz, 12. Cal. Apr., 1546; continued on p.702 to 708: Rerum ... nomina (or Rerum metallicarum interpretatio), an alphabetical list made by Agricola himself.

3. part: I) α1v-β3r: Rei metallicae nomenclatura (prima), words in the order as they occur in the books of De re metallica;

K) $\beta_{3v}-\gamma_{2v}$: *Nomenclatura secunda*, an alphabetical list of words in *De re metallica*; L) $\gamma_{3v}-\epsilon_{1v}$: subject index to *De re metallica*; M) ϵ_{2v} : catalog of the mine works mentioned in *De re metallica*; N) $\xi_{1v}-\epsilon_{3v}$: Greek-Latin-German dictionary of animals in *De animalibus subterraneis*; O) $\xi_{2v}-\xi_{3v}$: subject index to *De animalibus subterraneis*; P) $\eta_{1v}-\delta_{3v}$: subject index to all other works (i. e., C-G); Q) $\delta_{2v}-\epsilon_{1v}$: geographical index to all other works (i. e., C-G).

¶None of the woodcuts is of medical interest; they represent the search for metals (divining rod represented), the geological formations of ores, scenes of mining, construction of mines, instruments for measuring or for mining operations, furnaces, apparatus for removal of water, for ventilation, for separation of metals from ores, manufacture of salt, etc.

¶The 1. part is a reimpression of the 1561 ed. of the *De re metallica*. The volume is not nice, but the most complete for Agricola's works.—£ 3/15 (1931); £ 1/10 (1933).

.6 Freiberg, Craz & Gerlach, 1806-12. 8°

Copy: BM; München; Breslau; Paris; Wien; N. York Pub. Libr.; Lehigh Univ.

German transl. and notes by Ernst LEHMANN of Op. 14, 12, 7, and 20; 4 parts in 5 volumes; main title reads: "Georg Agricola's mineralogische Schriften". Contents: 1. Von den Entstehungsursachen der unterirdischen Körper und Erscheinungen; XXIV, 424p.; 1806; 2. Von den Eigenschaften der Körper, die aus dem Innern der Erde auf die Oberfläche hervordringen; XXXVI, 260p.; 1807; 3. Oryktognosie; 2 vol. XVI, 342p.; X, 335p.; 1809-1810; 4. Geschichte der Metalle; VIII, 144p.; 1812.

¶Nonexistent edition of selected works: (a) Basel, 1555; (b) Basel, 1607; mistake of 1657.

167 Op. 1: *De animalibus subterraneis*.

Written in 1548; based chiefly on Aristoteles, Galenus, and other old authorities; describes the animals which live below ground either temporarily or permanently in caves, underground rivers, or even in man-made stables; the demons are also mentioned as well as the underground dwarfs. A short and rather superstitious treatise.

Text begins: "Corpus subterraneum, ut res ipsa demonstrat ... (ends) metallici non deterrentur a laboribus, sed omnem inde capientes alacriori animo sunt & vehementius laborant."

.1 Basel, Froben & Bischof, Aug. 1549.

Copy: BM; Paris; John Crerar; NY AcadM; Berlin; Wien; U. S. Dep. Agric.

8°; 79p. (26)p.; sigs a-g8. Contains also: *Animantium nomina*.

.2 Basel, Froben & Bischof, 1556.

Published as 2. piece in his Op. 18, p.479-502.

.3 *Basel, Froben & Bischof, 1561.

Published as 2. piece in his Op. 18: p.478-502; also the *Animantium nomina* p. on Bb_{2r}-Bb_{3r}.

.4 Basel, Froben & Bischof, Aug. 1563.

Published in the Italian Transl. of his Op. 18: p.513-542.

.5 Wittenberg, Zacharias Schürer, 1614.

Copy: Berlin; Göttingen; Greifswald; BM; Paris; Harvard.

Latin text ed. by Johann SIGFRID; a supplement to the 1612 Op. omn. edition to make that edition more complete; 12°; 80p.

.6 Basel, Ludwig König, 1621.

Published in his Op. 18: p.479-502.

.7 *Basel, Emanuel König, 1657.

Published in the Op. omn.: p.478-492.
Nonexistent editions: (a) Basel, 1548; date of dedication; (b) Schweinfurt, 1607; (c) Leipzig, 1613.

168 Op. 2: *Appellationes quadrupedum, insectorum, voluerium, piscium*.

.1 Wittenberg (publisher?) 1563.

Ref.: Graesse.

Certainly this must be the short dictionary of animals belonging to Op. 1 and called *Animantium nomina*; it begins: "Gradientium. Alce elch / elend", and ends: "Daemonum. Daemon subterraneus truculentus, bergteufel mitis, bergmenlein / kobel / gittel". Yet, there was no 1563 ed. of Op. 1, except the Italian translation.

169 Op. 3: *Bermannus, sive de re metallica*.

The work has been written in 1528 based upon personal observations and on knowledge acquired from Bartholomäus BACH and Lorenz BERMANN, experts in mining and friends of the author. It is in the form of a dialog between Nicolaus ANCON and Johann NAEVIUS, two physicians. Naevis was town physician at Annaberg and Joachimsthal. It is chiefly a mineralogical work, but there are references to the therapeutical use of minerals.

Text begins: "Cum saepenumero mecum ipse reputo res", and ends: "Jam vero valete. NAE. Et tu Bermanne multum vale." Do not confuse with Op. 18.

.1 Basel, Froben, 1530.

Copy: BM; Paris; Berlin; München; Wien; Rutgers Univ. 8°; 135p. Edited by Erasmus. Title: "Georgii / Agricolae medici / Bermannus, sive / De re metallica"; p.131-135: P. Plateanus: *Rerum metallicarum appellationes*.

.2 Paris, II. Gormont, 1541.

Copy: BM; Paris; Königsberg; Osler; Libr. Congr. 8°; 108p.; 165mm (volume); also the dictionary of Plateanus.

.3 Basel, Froben & Bischof, 1546.

Published in the Op. omn. (q. v.)

.4 Leipzig, Valentin Papa, 1546.

Copy: Wien; Breslau; Königsberg; Basel; N. York Pub. Libr.

Called a revised edition; ed. by the author. 8° (or 24°?) 93p.

.5 Venezia, M. Tramezzino, 1550.

Published in the Italian Op. omn. (q. v.)

.6 Basel, Froben & Bischof, 1558.

Publ. in Op. omn.; not a German translation.

.7 Wittenberg, Z. Schürer, 1612.

Publ. in Op. omn.

.8 *Basel, E. König, 1657.

Publ. in Op. omn.

.9 Rotenburg, Harnstädt, 1778.

Ref.: Darmstädter.

Copy: BM; Halle Univ.

German translation by J. G. Stör: "Gespräch vom Bergwesen"; 8°; 180p.

.10 Freiberg, Craz & Gerlach, 1806.

Copy: Paris; BM; Berlin; Wien; München; Michigan Univ.

German transl. and notes by Friedr. Aug. Schmid: "Bermannus eine Einleitung in die metallurgischen Schriften"; with life of Agricola; 8°; VIII, 260p.

Nonexistent editions: (a) Basel, 1528; (b) Basel, 1549, mentioned by Linden; (c) Genève, 1561; also editions of the *De re metallica* (Op. 18) confused with the Bermannus.

170 Op. 4: *Ad ea quae A. Alcinius denuo disputavit de mensuris et ponderibus brevis defensio*.

Agricola's work on weights and measures has been published in 1533 (see Op. 10); it was criticized by ALCIATI (q. v.). The present work is a defense.

.1 Basel, Froben & Bischof, 1550.

Published in his Op. 10.

171 Op. 5: *Epistola ad Plateanum*.

The letter contains also a few corrections of the author's work on weights and measures (Op. 10)

.1 Basel, Froben, 1534.

Copy: Dresden.

The letter is also found in later editions of Op. 10.

172 Op. 6: *De externis mensuris et ponderibus*.

Description of Greek, Persian, Egyptian, Syrian, Hebrew, and Arabic weights and measures. Two books.

.1 Basel, Froben & Bischof, 1550.

Published in his Op. 10.

173 Op. 7: *De fossilium natura*.

Written 1545, and dedicated to Moritz of Saxonia. Description of minerals (fossile) and stones, consisting of 10 books; a sort of handbook of mineralogy with a few references to the therapeutic use of minerals and salts.

Text: "Res fossiles inter se multum differunt ... (ends) ... & quia homines navi & industria per se ipsi hoc facere possunt."

.1 Basel, Froben & Bischof, 1546.

Published in the Op. omn.

.2 Venezia, M. Tramezzino, 1550.

Italian transl. publ. in the Op. omn.

.3 Basel, Froben & Bischof, 1558.

Published in the Op. omn.

.4 Wittenberg, Z. Schürer, 1612.

Published in the Op. omn.

.5 *Basel, E. König, 1657.

Published in his Op. omn.

.6 Freiberg, Craz & Gerlach, 1809-10.

Published as part 3 of his Op. omn. mineralogica under the title: *Oryktognosie*.

174 Op. 8: (co-editor) GALEN: *Opera omnia* (Greek)

His work in editing the Greek Galen is acknowledged by Andrea ASOLANO (q. v.) in the preface to vol. 5 written to Giambattista OPIZ with the words: "sed nec Georgius Agricola non parvam laudem est meritus, nam et ipse in emendando Galeno nihil sibi ad industriam et laborem reliqui facit ..." (see on f.*r, at end of preface of vol. 5)

.1 *Venezia, Aldo & Andrea Socer, 1525.

Copy: SGL.

For description of volume see ASOLANO. Agricola is men-

tioned also as the author of a commentary to Galen's *Ars medicinalis* (Basel, 1541), which could not be verified.

175 Op. 9: Interpretatio Germanica vocum rei metallica.

Syn.: *Rerum metallicarum interpretatio; Rerum nomina.*

Written 1546, as a supplement of his Op. 18, with which it is usually published. It is preceded by an introductory letter to Wolfgang MEURER.

Text: "Achates Achat / Acidula Saurling oder saurbron/ ... (ends) ... Vitrum quo tingitur aurum rubro colore Ritzkle".

Another dictionary to the Bermannus (op. 3) has been prepared by Peter Plateanus. For editions of Op. 9 see Op. 18 and the Op. omn.

176 Op. 10: De mensuris et ponderibus.

Written in 1532-33, and dedicated to Prince Johann Friedrich and Duke Johann of Saxonia; based partly upon previous publications of G. BUDE (q. v.) and PORZIO (q. v.); it consists of 5 books: 1. De mensuris Romanis; 2. de mensuris Graecis; 3. de rerum quas metimur pondere; 4. de ponderibus Romanis; 5. de ponderibus Graecis.

1. Basel, H. Froben & N. Bischof, Aug. 1533.

Copy: BM; Univ. Paris; Hunterian; Wien; Berlin, etc.; U. S. Geol. Survey; N. York Pub. Libr.

8°; (4)f. 292p. (2)f.; print. device on tp. Less complete than the later editions.—40RM (1931); 150 lire (1932); 300 fr (1938)

2 *Paris, Chr. Wechel, 1533.

SGL:151887

Copy: Berlin; München; Paris; BM; Osler; SGL; Harvard.

261p.; 1p. blank; (4)f. for index with sig. R₁-R₇; R₈ and R₇ blank; Italian; text 120 x 70 mm; few Greek sentences; tp.: "Georgii Agricolae medici libri / quinque de Mensuris & Ponderibus, in quibus pleraque a Budaeo &/ etc.; the tp. calls this the first edition; print. device 50 x 30 on tp.; p.(2) blank; p.3-7: dedication: "Cogitanti mihi nuper ..." dated Chemnitz, 3. Non. Martii, 1533; p.(8) contents; p.9-74: book 1; p.75-143: book 2; p.144-187: book 4; p.188-261: book 5; p.(262) blank; R₈-R₉: Index in double columns; R₈ and R₇ blank.—Library's copy bound in vellum; contains also the work of ALLAXINUS (q. v.) Rs (probably with printer's device) is missing.—£2-15 (1938).

3 Venezia, J. A. de Nicolinis de Sabio for Melchior Sessa, July 1535.

Copy: BM; Faeenza; Wien; Crummer Collect.; Coll. Phys. Phila.; Boston Pub. Libr.

8°; 116 fol. plus index; Latin ed. of the 5 books; print. dev. on tp. and at end.—£2-12-6 (1936).

4 Basel, Froben & Bischof, March 1550.

Copy: Berlin; Wien; Paris; BM; NYAcadM.; Libr. Congr.; Minnesota Univ.

Copy: Berlin; Wien; Paris; BM; NYAcadM.

Fol.; (4)f.340p. (8)f.1; beside the main work it contains also Op. 6, 4, 11, 19, 16.—50 Sw. fr (1926); £2 (1935)

5 Lyon, J. de Tournes, 1552. SGL:38649

Copy: BM; Paris; SGL.

This is not Agricola's work; only its Epitome made by G. PHILANDER: "Epitome in omnes Georgii Agricolae de mensuris et ponderibus libros." 53p. plus (11)p.; Roman text 90 x 50 mm; print. dev. on tp.; p.(2) blank; p.3: letter to Philander apparently by the Printer, dated Rouverge (=Rhutenis), Id. Martii 1551. Since the edition is called "revised" on the tp., there may be also an ed. of 1551.—Repeatedly printed also in VITRUVIUS: De architectura (1552; 1586; 1825).—Library's copy bound to A. SORBIN: De monstris (Par., 1570)—\$22 (1940).

6 Venezia (publisher) 1635. 8°

Copy: ?

7 Wittenberg (publisher) 1714.

Copy: ?

Nonexistent editions: (a) Basel, 1532; (b) Venezia, 1533; this is probably a mistake for Venezia, 1535; a copy of a 1533 Venezia ed. is listed by BM, and referred to by Darmstädter.

177 Op. 11: De mensuris quibus intervalla metimur.

On Greek and Roman measures of length.

1. Basel, Froben & Bischof, 1550.

Published in his Op. 10.

178 Op. 12: De natura eorum quae effluunt ex terra.

Written in 1544 and 1545; dedicated to Moritz of Saxonia, description of all liquid substances issuing from the ground: petrol, waters, mineral waters; it is also an important description of bathing places. Four books.

Text: "Ortuum et causa rerum quae terra intra se gignit ... (ends) ... Typhonem gigantem fulmine ictum, sub his locis humatum jacere."

1. Basel, Froben & Bischof, 1546.

In the Op. omn.

2 Venezia, M. Tramezzino, 1550.

In the Op. Omn.; Italian transl.

3 *Venezia, Junta, 1553.

3 Basel, Froben & Bischof, 1558.

In the Op. omn.

4 Wittenberg, Z. Schürer, 1612.

In the Op. omn.

5 Basel, E. König, 1657.

In the Op. omn.

6 Freiberg, Craz & Gerlach, 1806.

Publ. as part 1 of the German translation of the mineralogical works.

Nonexistent editions: (a) Venez., 1553 as part of the balneological collection; (b) Basel, 1553; (c) Venezia, 1559; (d) Basel, 1599; (e) Wittenberg, 1614; (f) Basel, 1665; part of the erroneous quotations were made because this work has been confused with Op. 12.

181 Op. 15: De peste.

The only truly medical work of Agricola. It has been written in 1554, and is dedicated to Hieronymus KISWETTER, jurist and chancellor of the Duke of Saxonia. Three books describe the causes, course, and treatment of the epidemic "pestis", which, according to Agricola, is a contagious disease. The work is based chiefly on old Greek, Latin and Arab authorities.

Text: "De lue illa gravissima & violentissima ... (ends) ... de peste scripserunt, intelligenda sunt, alias explicabo."

- .1 *Basel, H. Froben & N. Bischof, 1554.
SGL:18847

 Nonexistent: (a) Schweinfurt, 1605.

182 Op. 16: De pretio metallorum et monetis.
 Discussion of the natural value of metals, with historical retrospect to the price of gold and silver in antiquity, development of the monetary system, the weight of coins, alloys, etc. Three books.

- .1 Basel, Froben & Bischof, 1550.
 Published in his Op. 10.
- 183 Op. 17: De prima ac simplici institutione grammatica.**
 His first work written at the time when he was schoolmaster at Zwickau.
- .1 Leipzig, Melchior Lotter, 1520.
 Copy: Berlin; München; Yale Univ.
 4°; (24)f.; sigs. A-F4; "Libellus de prima ..." etc.; a rather rare small pamphlet.

184 Op. 18: De re metallica.
 Syn.: Bergwerksbuch; Vom Bergwesen; not to be confused with his De re metallica dialogus or Bermannus.
 Written in 1550, but published after his death. Twelve books on mining and metallurgy without any medical reference. It is a work calling for many illustrations, and it is told that the author spent a fortune for paying the artists such as Basilius WEHRING, and Rudolf Manuel DEUTSCH.
 Text: "Multi habent hanc opinionem, rem metallicam fortuitum quiddam esse, ... (ends) ... de causis Andrean Nangerium in aedibus, quas ibi habebat, una cum Francisco Asulanum convenirem."

- .1 Basel, H. Froben & N. Bischof, 1556.
 Copy: BM; Hunterian; Wien; Berlin; München; Paris; Osler; Harvard; Michigan Univ.; N. York Pub. Libr.; Engin. Soc. N. Y.; Lehigh Univ.; Princeton; Libr. Congr.
 Fol.; (6)f. 502p. (37)f.; printer's dev. on tp. & end; 2 plates and 269 cuts in text; contains also Op. 1.—51RM(1930); £16 (1933); £3-5 (1934); \$150 (1941).

.7 Basel, L. König, 1621.
 Copy: Berlin; München; Paris; Sutro Libr.; Yale.
 Latin edition; fol.; 538p. (of which 502p. are text); contains also the cuts and Op. 1. A rather shabby edition.—95 RM (1930); £ 5-15-6 (1934)

.8 *Basel, E. König, 1657.
 In his Op. omn. (q. v.)

.9 London, The Mining Magazine, 1912.
 Copy: Coll. Phys. Phila.; John Crerar; NYAcadM; Osler; Welch Libr.; Libr. Congr., etc.

Transl. from Latin into English by Herbert Hoover (later president of the United States) and his wife, Lou Henry Hoover; with notes; fol.; XXXI, 640p. £ 13-10 (1930); £ 9-10 (1931); \$32.50 (1933); \$30 (1935); £ 7-7 (1940); with reproduction of cuts.

.10 Berlin, Agricola Gesellschaft, 1928.
 Copy: Berlin; München; NYAcadM; Libr. Congr.
 German transl. by Carl SCHIEFFNER: "Zwölf Bücher vom Berg- und Hüttenwesen"; xxii, 564p.
 Nonexistent eds: (a) Schweinfurt, 1607; (b) Wittenberg, 1614; (c) 1661; (d) Schweinfurt, 1687. The Pennsylvania Univ. Libr. lists a copy printed at Meissen in 1551; doubtful.

185 Op. 19: De restituendis ponderibus atque mensuris.
 With reference to medical weights.

.1 Basel, Froben & Bischof, 1550.
 Publ. in his Op. 10.

186 Op. 20: De veteribus et novis metallis.
 Dedicated to Moritz of Saxonia; two books on the history and nomenclature of metals, partly mythological data. Written 1546.
 Texts: "Multa sunt a me in libris ... (ends) ... idem Plinius non explicavit."

.1 Basel, Froben & Bischof, 1546.
 In his Op. omn.

.2 Venezia, M. Tramezzino, 1550.
 Italian transl. publ. in his Op. omn.
 For further editions see editions of Op. omn.
 Manuscripts: 1. Deum non esse auctorem peccati; written July 23, 1522 in a letter to Gregor Copp; 2. another theological discussion in a letter to Peter Fontinus, Franciscan pater.

The following are not the works of Georg Agricola:
 1. **Dominatores Saxonici a prima origine ad hanc aetatem.** Freiburg, Hoffmann, 1611.—28f.
 2. **Lapis philosophicus** (or Gálcerazaya); a theological work with this symbolical title, written by Daniel AGRICOLA under the pseudonym: Agricola Philopistius; a 1531 and 1534 Köln edition is mentioned by Linden; but no edition is known before 1580.
 3. **Rechter Gebrauch d'Alchimei.** Frankfurt, C. Egenolf, (1531) 27f. and repeatedly; contains chemical receipts for everyday wants; not an alchemy; see KERTZENMACHER, who is given full credit for the work.

AGRICOLA, Georg, fl. 1573.
 A physician of Nürnberg; nothing is known of his life. His only publication was the following:

187 Op.: Epithalamium scriptum in secundum nuptiarum honorem ... Domini J. G. Gleissenthal (etc.)

.1 Nürnberg, I. Koler, 1573. 4°
 Copy: BM.

AGRICOLA, Johann, fl. 1540.
 Syn.: Agricola Ammonius or Hammonius; Peurle; Paürle; in 1533, calls himself Peurlin. Do not confuse with Johann AGRICOLA, editor of the Jesuit letters: "Epistolae Indicae"; or with Johann AGRICOLA Islebius, or with the 17. ct. physician Johann Agricola (died 1643).
 B. at Gunzenhausen, a small Bavarian village, SE from Ansbach, at the end of the 15. century; 1506, immatriculated at the Univ. of Ingolstadt (in 1496 he was not a professor there); but soon left the city, and travelled in Europe "omnes circumlustrans mundi plagas"; he became an expert linguist, and, returning to Ingolstadt in 1515, he became professor of

Greek; at the same time, he began his medical studies, and graduated MD at that university in 1528; from 1530 on, professor of Greek and medicine at Ingolstadt; in 1530, he finished his Op. 7 (publ. 9 years later), and became the friend of many scholars and noblemen (Erasmus, Anton FUGGER); 1533, at the time of the plague in Augsburg, he wrote his Op. 5; in the following years, he lectured on the works of Galen, Hippocrates, Dioscorides, and edited several Galenic works, one of Hippocrates, and the pharmacology of Nicolaus Myrepsus; he probably died before 1555, at Ingolstadt, and not in 1570 as mentioned by others (Gessner's bibliography puts him definitely in the first half of the 16. century).

For biography see also Mederer (Annales Academiae Ingolstadtensis) and Grienwaldt, F. J. Album Bavariae iatricae (Münch., 1733).

188 Op. 1: (editor) GALEN. Ars medicinalis.

.1 Basel, Barth. Westhemer, 1541.

Copy: BM; Paris; Hunterian;

Contains Greek text and the Latin translation of the *τὰ ἐν τῇ ἀρχῇ* by LEONICENO and MANARDO; also the commentaries of Agricola. Also Hippokrates: De specie, acie, visu et opus oculorum.

189 Op. 2: (commentaries) GALEN. De inequali intemperie.

.1 Basel, Westhemer, 1539.

Copy: BM; Paris; NYAcadM;

8°; transl. by Thomas LINACER; "Liber aureus de inequali intemperie"; beside Agricola's commentaries, it contains also his Op. 10, 12, 13 and 11; also the Oath and the Law of Hippocrates, and the Epicedion by H. LEONBERGER.

190 Op. 3: (commentaries) GALEN. De locis affectis.

.1 Nürnberg, J. Petri, 1537.

Copy: Berlin; München; Wien; BM; Paris; Coll. Phys. Phila.

4°; 127f.

.2 Nürnberg (publisher) 1658.

Ref.: Dezeimeris.

This edition as well as the 1538 Nürnberg ed. referred to by Linden is probably nonexistent.

191 Op. 4: Scholia copiosa in Therapeuticam Methodum, id est, absolutissimam C. Galeni Pergameni curandi artem.

It may be called the chief work of the author; arranged according to the chapters of Galen's 14 books, with the first lines of the Galenic chapters used as headings of the chapters of the scholia. Written in 1532 and 1533. The scholia proper are preceded by a few introductory remarks on the work of Galen; contains many interesting original observations.

Text of scholia: "Libri I. Scholia in caput primum libri primi therapeuticae methodi Galeni. De ambitiosis Salutationibus Romanensium hominum extant versiculi Marcialis ... (ends) ... Lumbriorum discrimina ne quid ociosi apponamus, discurito cap. 12 libri huius Decimi quarti."

.1 *Augsburg, P. Ulhard, March 15, 1534.

B_{6v}-B_{8r}: "Perioche decem et quatuor librorum Therapeuticae (!) Methodi Galeni"; f. B_{8r}-n_{1v}: text of scholia; f. n₂-n_{3v}: "Peroratio. Posteaquam abunde multa pro interpretatione ... (ends) ... Cumque cubile petit, cumque aureus exoritur sol. CHRISTO GLORIA."; f. n₄-p_{1r}: index; f. p_{1r}-p_{1v}: poem of Johannes PINICIANUS to Wolfgang OEFFELIN, physician; f. p_{1r}: the printer's words to the reader, with errata and imprint; f. p_{1v}: blank—Libr. copy bd in contemporary stamped leather; previous owner: Michael Zoller; manuscript glossae (16. ct.)

192 Op. 5: Von den Ursachen, Zeichen, Vorsehung und Heilung der greulichen Pestilenz.

Written in 1533, and dedicated to Oswald von ECK; consisting of two books, the first in 17, the other in 15 chapters; describes the causes, signs, and prevention of plague by dietetic and hygienic measures, the disposition to plague; the 2. Book discusses the treatment of the disease: bloodletting, sweating, purgation, diet, surgery. Chapter 12 of Book 2 deals with smallpox; Cap. 13 on intestinal worms; Cap. 14 on fainting, somnolence; Cap. 15 contains advice for the protection of servants attending their sick master.

Text: "Ain kurtze Vorrede. Mir gefallet der loblich gebrauch ... (etc.) Von dreyen ursachen der Pestilenz. Das Erst Capitel. Anfenglich ist zu wissen ... (ends) ... bisz das sich die widerumb inn jr Schlangen grub thon pergen Plinius lib. 16. cap. 13."

.1 *Augsburg, Philip Ulhart (1533)

SGL:69366

Copy: Berlin; München; Breslau; Boston ML; SGL.

(2)f. 21f. (1)f.; sigs A-F¹; Gothic; text 155 x 115mm; on tp. coats-of-arms of the ECK family; (A₁): title: "Ain grüntlicher fleis- / siger ausszug, ausz allen bewerten Kriechischen un / Lateinischen lerern, dermassen biszher noch nye beschien, Von / ursachen, zeichen, fürsehung, und haylung der greulichen / Pestilenz," ... (etc.); f. (A_{1v}): blank; f. A₂: dedication to Oswald von ECK, dated Ingolstadt, March 10, 1533; the author calls himself "Johan. Pewrlin der Artzney Doctor", while on the tp. he is "Doct. Johan. Agricola der Artzney und Kriechischen sprach leszer zu Ingolstat"; f. 1-r.21: text; f. 21v - (F₁): register; f. F_{1v}: blank.—Very rare.

193 Op. 6: (editor) HIPPOKRATES. Aphorismorum et sententiarum medicarum libri septem.

Dedicated to Bishop Philip of Freising.

.1 (Ingolstadt, Alex Weissenhorn) 1537.

Copy: BM; Paris.

4°; 199p. (6)f.; contains also the books of Epidemias or Hippokrates in the translation of L. FUCHS; also G. LEONBERGER: Circumziae regionis descriptio.—375 RM (1930).

194 Op. 7: Medicinae herbariae libri duo.

Written in 1530; a pharmacobotanical dictionary explaining in alphabetical order the synonyms of medicinal plants, and their therapeutic uses; with many references to old and new authors.

Text: "ABSINTHIUM marinum, Santonicum, Centonica ... (etc.) (last item mentioned in 2. book is Zuecharum) ... si plurimarum virtutes non ignorarentur." The 1. book carries the running title: "Vulgarum herbarum nomenclaturae apud Dioscoriden et Galenum"; and the 2. book is titled: "De medicinis recens inventis" with a running title: "De recentibus simplicibus medicamentis".

.1 *Basel, B. Westhemer, Aug. 1539.

SGL:113938

Copy: Berlin; München; Wien; BM; Paris; Med. Lib. C. Kings; NYAcadM; SGL; Missouri Bot. Garden; N. York Pub. Libr.

(1)f. p.3 336; plus (32)f. under sig Y-Z^a Aa Bb³; chiefly Italic with preface, running titles, and leading words of dictionary in Roman; text 115 x 65 mm; contents:

P.(1): title: "Medicinae Her- / bariae Libri Duo. Quo- / rum Primus" ... (etc.); p.(2) blank; p.3-13: "Epistola nomenclatoria" to Anton FUGGER by the author, dated Ingolstadt, May 1, 1530; p.14-15: "Quae simplicia medicamenta a Sepalsariis nostri aevi usurpata"; p.16-231: Book 1; p.232-233: introduction to Book 2; p.234-336: text of Book 2; f.Y_{1r}-Aa_{3v}: Latin index; f.Aa_{3v}-Bb_{1v}: index of German words; f.Bb_{1v}-Bb_{7r}: HIPPOKRATES. De officio medici; f.Bb_{7r}: errata; f.Bb_{8r}: blank; f.Bb_{8v}: printer's device.

200 Op. 8: (editor) NICOLAUS MYRAEP-SUS. De compositione medicamentorum.

In editing the Latin translation of this work made by Nicolaus of Reggio the author used the manuscript found in the library of Adolph OCCO, physician at Augsburg. The original text is in 1065 chapters to which the editor affixed his shorter or longer annotations, which form about one third of the volume. Choulant's accusation that Agricola often confused Nicolaus Myraepus with Nicolaus Praepositus is not true.

Text of Nicolaus begins: "Saepe multumque fatigatus sum ..."; to which the annotation: "In hoc prologo statim ab initio palam facit ..."; text of Nicolaus ends with chapter 1065, the antidote of Zopyrus, to which the annotation ends: "... medicum Gordiensem appellat & Zopyrion prolixius quam aut Celsus aut Nicolaus depingit."

AGRIPPA, Camillo, fl. 1553–1598.

Mathematician and engineer, and writer on military sciences and navigation. B. Milano at an unknown date; nothing known of his education; about 1575, during the time of Pope Gregory XIII (1502–1585; pope 1572–), he came to Roma (not in 1535), and, in 1583, found means for moving the obelisk at the Piazza di San Pietro, which was a truly excellent achievement of engineering; active until 1598; date of death unknown.

209 Op. 1: Dialogo sopra la generatione de' venti (etc.)

Extremely rare work on winds, origin of sounds, thunder, rivers, lakes, valleys and mountains; a geophysical and geodynamical treatise. Whether anything on balneology and mineral waters?

.1 Roma, Bart. Bonfadino & T. Diani, 1584.

Copy: Berlin; BM; Paris.

4°; 47p.; the printer's name given incorrectly by Clement ("Bonefacio"); A supplement called *La Virtù*, containing the technical words, was issued in Roma, Stefano Paolini, 1598 (22p.; copy Berlin)

210 Op. 2: Modo da comporre il moto nella sfera.

.1 Roma, heirs of A. Blado, 1575.

Copy: Paris.

4°; (4)f.; extremely rare.—15 Sw. fr (1914).

211 Op. 3: Nuove inventioni ... sopra il modo d navigare.

.1 Roma, D. Gigliotti, 1595.

Copy: BM; Paris; N. York Pub. Libr.

4°; 4 p. l., 52p. (1); illust.; very rare.

212 Op. 4: Trattato di scientia d'arme.

On military science; illustrations of anatomical interest.

.1 Roma, Antonio Blado, 1553.

Copy: BM; Paris; München; Wien; Boston ML; Hispanic Soc.; Huntington; Harvard; Yale.

(4)f. 70f. (2)f. with last blank; Italie; 2 plates, 55 other cuts, initials, port. of author; the illustrations are in Mare Antonio's style (or Jan van der Straet?) the one on f.63v is attributed to Michel Angelo.—250 Sw. fr (1914); L3–5 (1934).

.2 Venezia, A. Pinargenti, 1568.

Copy: Wien; Paris; BM; Hispanie Soc.

Edited and illustrated by Giulio FONTANA, Veronese engraver; 4°; (4)f.111 f.; Roman; engraved tp.; 28 plates.—Very rare; 150 Sw. fr (1914)

.3 Venezia, Roberto Meglietti, 1604.

Copy: Paris; München; Wien; BM; Univ. Illinois.

4°; (4)f. 51 f.; Italie; frontispiece port. of author; 28 plates as in 2. ed.; very rare.—100 Sw. fr (1914).

AGRIPPA, Heinrich Cornelius, 1486–1535.

Syn.: called Agrippa probably because born in Köln (Colonia Agrippina); Agrippa also means "aegris pedibus", which indicates either illness of the feet or the condition of being born feet foremost; Cornelis or Cornelius; family name: von Nettesheim, Neyttesheim, Nettesheim, Nedtesheim after the village of Nettersheim, 25 miles SW of Köln. RABELAIS called (Colonia Agrippina); Agrippa means "aegris pedibus", which indicates either illness of the feet or the condition of being born feet foremost; Cornelis or Cornelius; family name: von Nettesheim, Neyttesheim, Nettesheim, Nedtesheim after the village of Nettersheim, 25 miles SW of Köln. RABELAIS called him "Herr Trippa"; his name is usually ornated with many titles; his father addresses him as "nobilis ac strenuus miles, utriusque iuris medicinarumque doctor, Senatus urbis Metensis a Consiliis primarius"; on the titlepage of the 1531 ed. of his *De vanitate* (etc.) called: "splendidissimae nobilitatis vir, armatae militiae Eques auratus, legum doctor, sacrae Caesaris Majestatis a Consiliis (etc.)." By later authors his name was often used as a pseudonym: e. g., by Emanuel WEBER, or in 1805 by J. F. K. ARNOLD, and others.

B. Sept. 14, 1486 (not 1487) at Köln (=Colonia Agrippina) of noble parentage; his family has been in the service of Austrian emperors for several generations; not much known of his early education; studied at Köln, and was interested in languages and supernatural powers; 1502, scribe in the court of Maximilian I; 1506, sent by the emperor to Paris as secret agent in the disguise of a student; at the Paris university he studied neoplatonic philosophy and magic, became friend of Biagio Cesare LANDOLFO, later professor of medicine at Pavia, Germain, a lawyer, Charles FOUCARD, Gaigny, and others, and founded a secret society of theosophists; much time spent in astrology, astronomy, and in the reading of old authors; Sept. 1506, Philip of Spain died, and Agrippa enters a plot with Juanetín Bascara of Gerona for turning over Catalonia to Maximilian; 1507–1508, travels in France, visits Köln; 1508, his Spanish adventure a failure, and he narrowly escaped on Aug. 14; travels again through Barcelona, the Balearic Islands, Sardinia, Napoli, reaching Avignon before Christmas; Jan. 1509, in Lyon, where he meets CHAMPIER; visits Dôle, a town in Burgundy, where the vivacious Princess Margaret of Austria is the mistress; in order to earn her patronage, Agrippa lectures and comments on REUCILIN'S *De verbo mirifico* in the school of Dôle after July 8, 1509, and begins to write his treatise upon the Nobility and Excellence of the Female Sex (Op. 16); married with Jane Louisa Tyssie, a girl of his age from Genève; becomes rector of the Dôle school, and writes his *Oecult Philosophy* (op. 17), which he submits to the Abbot of Tritenheim in 1510 for criticism, who approves it but warns him against publishing; meanwhile, Jean CATILINET, a Franciscan monk, accused him in his Lent sermons, preached before the princess in Gand, of being a heretic philosophist who tried to replace Christian priests and Christian doctrines by rabbis and the talmud; he lost the favor of the princess, and was discouraged from publishing Op. 16, and Op. 17; returns

to the service of Maximilian, who sends him with an embassy to the court of Henry VIII in late August 1510; at London he lodged with John COLET, Dean of St. Paul's, studied the Epistles of St. Paul, took part in the amusements of the court, and wrote his *Expostulatio* (Op. 10) against Catilinet.

At the end of 1510, returns to Maximilian, and visits his parents at Köln, delivering also a few quodlibetal divinity lectures at the Köln University; in the spring of 1511, he is at Trento, becomes acquainted with Bishop Georg Neideck, and escorts a gold shipment to Maximilian, who is fighting with the Venetians (says the author: "Caesareo iussu, atque ex officio meo miles, Caesarearegiaque castra secutus sum; dextera mea prona in sanguine, sinistra mea dividebat spolia, venter meus de praeda saturatus"); in the summer of 1511, the heretic Cardinal Bernardino CARVAJAL of Santa Croce calls him to attend the Council of Pisa, which was held Sept. 1, 1511; in Pisa, he lectures on Plato at the theological faculty of the university; excommunicated by the Pope, he returns to military life after Oct. 24, 1511; 1512, visits his friend, Bartolomeo ROSATI, at Lavizaro in April, but at the end of the month, he is again fighting with Maximilian in Upper Italy; in July, prisoner of the Swiss, but soon gains freedom, and goes to Milano; in November, tired of fighting as a soldier, he attaches himself to the marquis of Monferrat, and settles at Casale; Febr. 1513, appeals against the excommunication from the Catholic Church, and in July reconciles to Leo X; spends most of the year in Italy studying astronomy; 1511, sent to Switzerland on a brief mission, is knighted, studies the cabbala and Hermes Trismegistos in the house of LANDI; 1515, lectures on the Pimander of Hermes Trismegistos at the University of Pavia, where he becomes graduated as doctor of medicine and the laws ("ut meorum desiderio satisfacerem, qui me doctorem malunt quam doctum"); at the Pavia University, he delivers ten public orations, which are all medical (Op. 19); in October, Francis I invades Italy, and Agrippa loses his scholarly position; leaving his wife with her family at Pavia, he goes begging from one friend to another; in 1516, several friends invite him, and he accepts the invitation of the marquis of Monferrat, Guilicmo PALEOLOGO, settles at Casale with his wife and son, Avmon called also Ascanius; engaged in writing his lost work, *Dialogus de Homine qui Dei Imago est*, and his other theological work (Op. 26); but he is still just a refugee without a job; Aug. 1517, joins the court of Charles III of Savoy, probably as court physician; at the end of the year, visits his father at Köln, who believed him dead.

In 1518, after an invitation, he settles in Metz with his family, is town advocate and official orator, and works as physician at the time of the plague; writes his Op. 20, and his experiences in treating plague (Op. 21); meanwhile, his father and his daughter die; in 1519, still in Metz, where he is engaged in religious disputations on the monogamy of St. Anne (Op. 2); as a jurist he protects a peasant's wife against the charge of witchdom, and makes Nicolas SAVIN, the chief inquisitor, his enemy; therefore, in Febr. 1520, he had to leave Metz; goes to Köln, where he stays until Apr. 1521; at a friend's call, he returns to Metz, where his wife dies; for commemoration of her faithfulness, he writes on Matrimony (Op. 21), and decides to settle in Genève, where she was born; Sept. 1521, practicing physician in Genève, and a friend of CHAPPUYS; 1522, marries a young Swiss girl (who later proved to be very fertile); Oct. 1522, invited to Fribourg (Switz.) as a town physician, which position he accepts in the early part of 1523; Apr. 1524, invited to the court of Louise of Savoy, where he is physician of the queen mother at Lyon; May 1524–Dec. 6, 1527, at Lyon, where he publishes his Op. 27, 2, 13, and 24 in one volume, dedicating it to Margaret of Valois, and writes Op. 5; his work on Matrimony, however, offends the court people, because it exposed their adulterous life; his astrological prognostications in political events did not become true, he lost favor, and his mail was intercepted; disgusted with court life he writes his work on the Vanity of Science (Op. 16), and asks his dismissal from the court, where he did not receive any salary, and where he could not sell his mechanical inventions; Dec. 6, 1527, quits Lyon with his family and servants with the intention of travelling to Antwerpen; Dec. 20, 1527, reaches Paris, where he had to wait until July 2, 1528, to get a passport (it was dated Febr. 25, 1528); leaving his family in Paris, he reaches Antwerpen July 23, and began his medical practice; his family came to Antwerpen in November; 1529, he is engaged in publishing several of his works, is busy in medical practice in and around Antwerpen, and becomes archivist and historian of Margaret of Austria; attracts many pupils, among them Johann WIER, the one who later accused Agrippa of having the devil with him in the form of a black dog; as a historian he writes on the coronation of Charles V (op. 11), and on the death of Margaret of Austria (Op. 18); Aug. 7, 1529, his wife dies of plague; meanwhile, his published works did not bring enough money, and he is troubled by creditors, also by the monks who objected to some of his ideas in *De vanitate scientiarum*; March 1531, he was condemned by the Sorbonne; in this year, he was invited to the English court, but he refused the position offered to him; Jan. 1532, in jail for debt; later, he leaves the court, takes a small house at Mechlin, and took a third wife, who later proved to be a wanton; May, 1532, he is in Köln under the patronage of the archbishop, Hermann von WIED, publishes several of his works; printing of his *Oecult Philosophy* started, but the printed sheets were seized by the Dominican inquisitor, Conrad COUILLON (Coellin), against which Agrippa appeals to the Magistrate of Köln in Jan. 1533; finally, printing was granted; writes his defense of *De vanitate*

(Op. 1), and edits the work of a Cistercian monk; 1533-34, chiefly in Bonn, where he receives some support from the archbishop; 1535, divorce from unfaithful wife in Bonn; threatened with death by the emperor, Charles V, and flees to France, where he is imprisoned, then set free but persecuted; Febr. 1535, reaches Grenoble, where at the house of a friend, Mr. Vachon, in the Rue des Clercs, he dies Febr. 18, 1535. He was buried in a convent of the Dominicans. (Var.; died 1536)

Agrippa was a dreamer, a philosopher, a theologian, a soldier, a jurist, and a learned physician unjustly accused of necromancy. For biography see also **Sommersberg, F. 213 Opera (collecta et omnia)

- .1 Lyon (publisher) 1526. 8°
- Copy: unknown.

Probably nonexistent; the supposed contents are: (a) Op. 27; (b) Op. 2; (c) Op. 13, and (d) Op. 24. The existence of the edition is made probable by the undated French translation of Op. 24, and the history of its dedication (cf. Agrippa's life).

- .2 *Antwerpen, M. Hillen van Hoochstraten, Apr. 16, 1529. SGL:184735

Copy: Berlin; Augsburg; Gand; Paris; SGL.

(84)f.; Italics, with occasional Gothic in the marginal notes, and Roman in titles and running titles; text 110 x 63 mm; initials; contains the following:

f.A_{1r}: titlepage: "Henrici Cornelii Agrippae / de Nobilitate & Praecellentia Foemi- / nei sexus" ... (etc.); title between 4 historiated (flowers, nude baby girls) woodcut bands made into an oblong border; cut on top a sitting and writing haloed saint with an eagle (Lucas?); bottom cut: 2 nude baby girls holding medaillon inscribed Virgilius Maro; f.(A_{1v}): 10 lines, for 5 distichs of hexa- and pentameters by L. BELLIAQUETUS "De foeminei sexus praecellentia".

Desine vaniloquax sexum laudare virilem

Plus aequo, laudum ne sit acervus iners, etc.

f.A₂: author's preface to Maximilian ERDELYI (Traussylvanus), counsel of emperor Charles V, dated Antwerpen, April 16, 1529; f.A_{2r}-C_{5r}: De nobilitate et praecellentia foeminei sexus (Op. 16) f.D_{1r}-D_{3r}: Expostulatio super expositione sua in librum de verbo mirifico cum Joanne Catilineti (Op. 10) f.D_{3v}-E_{4r}: De sacramento Matrimonii declamatio (Op. 24); f.E_{4v}-E_{5r}: letter to "suo Michaeli de Arando", bishop, dated Lyon, May 7, 1526; f.E_{5v}-F_{1r}: letter to Jean Chapelain (Capellanus), royal physician, dated Lyon, May 1, 1526; f.F_{1v}-F_{2r}: letter to Gulielmo Paleologo, marquis of Monferrat, dated 1516; f.F_{2v}-H_{1r}: De triplici ratione cognoscendi Deum (Op. 26), f.H_{1v}-H_{3v}: letter to Reverend Symphorian, bishop, dated Lyon, June 10, 1526; f.H_{3v}-I_{2v}: Dehortatio gentilis Theologiae (Op. 5); f.I_{2r}: letter to Theodor, bishop of Cirene at Köln, dedicating Op. 20; f.I_{3v}-K_{4r}: De originali peccato (Op. 20); f.K_{4v}-K_{7r}: Contra pestem Antidota securissima (Op. 21); f.K_{8r}-L_{4r}: letter of his father dated Bedbar, 1518; f.L_{4r}-L_{4v}: letter by Agrippa to Theodor, dated Metz, Febr. 6, 1518; L_{4r}: colophon: "Michael Hillenius in Rapo, An. M. D. XXIX." f.L_{4v} blank.

Thus, the works included in the volume are Op. 16, 10, 24, 26, 5, 20, 21, and several letters.—Very rare.

- .3 (Köln) (publisher) May, 1532.

Copy: BM; Pannonhalma (Hung.); München; Berlin; Wien; Harvard; Univ. South Carol.

206p. 8°; sigs A-N; contains the same works in the same order as the 2. ed. with addition of Op. 27, 13, and 8.

- .4 (s. l.) (publisher) 1568. 12°

Copy: Münster.

(186)f.; size sometimes given as 32°; reprint of 1. ed.; woodcut portr. on tp;—3 RM (1885).

Editions by the "Bering Brothers"

The genuine "Beringi fratres" consisted of Godefroy and Marcellin Beringen, German printers, who settled in Lyon about 1538. They started printing in 1544, and not earlier. Marcellin died in 1556, and the printing establishment was sold by Godefroy to Guillaume and Jacques Reynaud, Sept. 2, 1556. The only genuine Agrippa publications of this printing house of Op. 17 are the 6. ed. of the Op. omni., and the b) and c) editions listed under their names. Cf. BAUDRIER, J. *Bibl. lyonnaise*. Lyon, 1897, 3: 31 &c.

After 1545 (?), when the Occult Philosophy of Agrippa was published by the "Beringi fratres", the name of this publishing company occurs repeatedly, and the place of publication is given as "Lugdunum"; several editions of the Opera Omnia of Agrippa with or without date carry the name of the "Bering brothers"; it seems that the name of the Bering brothers is fictitious in all the editions, and "Lugdunum" may be either Lyon or Leiden, or any other, probably German city; most of the editions have several variants, but all of them are mutilated. According to one opinion, the undated editions were printed at Paris. The following is a list of copies and references without any attempt at identification:

- .5 Lugduni, Beringi fratres (ca 1550?)

Copy: Berlin; München; Wien; Phila. Pub. Libr. (?)

Only vol. 1, which has 668p.

- .6 Lugduni, Beringi fratres (ca 1565?) 8°

Ref.: Prost.

2 vol. with portr. on v.1, p.2; v.1: (8)f. 779p.; v.2: (12)f. 1139p. (22f.); "Henrici Cornelii Agrippae ab Nettesheim

opera, quaecumque hactenus vel in lucem prodire vel inveniri potuerunt"; Prost thinks that this is the Ed. Princeps.

.7 Lugduni, Beringi fratres (s. a.)

Copy: BM; NYAcadM; Boston ML.
2 vol.; size either 8° or 12°

.8 Lugduni, Beringi fratres (after 1565?)

Ref.: Prost; Copy: v.1 Paris; v.2 Barcelona.

Round letter; 2 vol.; 144 x 78 mm copy; v.1: 12f. 694p.; v.2 16f. 1156p. On f. Henrici Cornelii / Agrippae/ ab Nettesheym / armatae militiae equitis / Aurati, (etc.)"; on verso of tp. portrait of author.

.9 Lugduni, Beringi fratres, (ca 1590)

Copy:

Italic type; 2v. in 3 parts; 8°; v.1: (15)f. 779p.; v.2: (24)f. 1139p. (44)f.—17 RM (1931); 23 RM (1931).

.10 Lugduni, Beringi fratres, 1600.

Copy: v.1: Paris; München; Wien; v.2: Berlin; München; Wien; Boston Pub. Libr.; Pennsylv. Univ.

8°; 2 vols; v.1: (12)f. 668p.; v.2: (8)f. 440p. for the first part, and (8)f. 480p. for the second part. "... Opera in duos tomos concinne digesta." To this edition an Appendix apogetica was added in 1605 (See Op. 1)

Contains the following works: 12, 15, 26, 5, 10, 16, 24, 20, 27, 13, 21, 8, 19, 6, 7.

.11 Lugduni, Beringi fratres (1600).

Copy: Berlin; München; Wien; Peabody Inst. Baltimore.

Italic type; 2 vols.; v.1: (15)f. 779p.; v.2: (24)f. 1139p. (correctly 1193) (44)f. for register; portrait of author on verso of the tp. of each volume. Contents as in the 1531 edition of Op. 17.

.12 Lugduni, Beringi fratres (after 1600)

Reprint of 1. volume; Italic; only 677p. To the same edition seems to belong a v.2 with 668p.

.13 Lugduni, Beringi fratres (1605?)

Ref.: Houzeau.

2 vol.; 8°

.14 Lugduni (Beringi fratres?) 1610. 3 pts.

8°

.15 Lugduni, Beringi fratres, (ca. 1630)

Copy: BM; Princeton.

8°; the printer may be E. Zetzner at Strassburg?

.16 Lugduni, Beringi fratres (ca 1600? or 1700?)

Ref.: Clement.

12°; 2 parts in 2 vols; 1156p.—£2-5 (1940).

This may be identical with the second volume of the following.

.17 Lugduni, Beringi fratres (s. a.)

Ref.: Clement.

8°; 2 vols; Roman; v.1: 694p.; v.2: 1156p. It is known to exist in three variants distinguishable by the end of the first line of the preface: (a) ... libri no-; (b) libri nostri de Occul-; (c) libri nostri de Occulta;

Unidentified editions in American libraries: Univ. Kansas; Libr. Congr.; Boston Pub. Libr.; Pennsylvania Univ.; Newberry Libr.; Harvard.

Further editions, of which no trace could be found, are: 18. Lugduni, 1660; 19. 1713, German; 20. 1714, German; 21. Lugduni, 1750; 22. Lugduni, 1753.

Nonexistent editions of the Opera omnia: (a) 1510; (b) 1531; his Op. 17 is mistaken for Op. omn.; (c) Lugduni, 1535 referred to by Maréchal.

214 Op. 1: Apologia adversus calumnias propter declamationem de vanitate scientiarum & excellentia Verbi Dei, sibi per aliquos Lovanienses Theologistas intentatas.

For its history see Agrippa's life; written in 1533.

.1 (Köln) (publisher) 1533.

Copy: Berlin; München; Wien; BM; Harvard.

8°; 96f.; contains also his Op. 23.

.2 Lugduni, Beringi fratres, 1605.

Copy: Berlin; München; Wien; Paris.

8°; 262p. "Appendix apogetica ... pertinet ad 2. eius Operum Lugduni editorum partem"; contains also his Op. 23. and abridgment of Op. 2 (Propositiones abbreviatæ de beatissimæ Annae monogamia), and the tabulated abridgment of Op. 15.—Rarissimum.

.3 München, G. Müller, 1913.

Copy: Berlin; München, etc.

In the German transl. of his Op. 12; "Verteidigungsschrift."

215 Op. 2: De beatissimæ Annae monogamia ac unico puerperio.

Result of a scientific battle over the book of Faber d'Étaples De tribus et una. There was a legend that St. Anne had three husbands, and by each a daughter, each being called Mary. Agrippa agreed with Faber that the legend was without any foundation or authority. To this work a Dominican replied, and against the reply Agrippa issued his Op. 4.

.1 Lyon (publisher) 1526.

Copy: ?

In his Opera; does it exist?

.2 (Köln) Johannes Nydepontanus, 1534.

Copy: BM; Paris; München; Wien.

4°; 144f.; the publisher was a physician at Metz; the volume also contains Op. 4 and a letter on the same topic.

.3 Lugduni, Beringi fratres, 1605.

Copy: Berlin; München; Wien; Paris.

Issued in his Op. 1; as "Propositiones abbreviatæ."

Other editions in the Op. Omn. published by the Bering brothers.

216 Op. 3: Consilium in diarrhoea.

An anonymous treatise or consilium written to a certain Baron; it is listed here because it immediately follows Agrippa's Op. 21 in Pierre POTER'S Insignes curationes; according to the title page of this volume it was written by a physician of the Electoral Prince of Köln. Description of various hygienic measures and medicaments.

Text begins: "Nonnulli in hepatis gibbo obstructionem esse ... (ends) ... malo tueatur et mihi memorem reddat."

.1 *Köln, Matthaeus Smitz, 1625.

SGL:101282

Copy: SGL; NYAcadM.

On p.169-190 of P. POTTER Insignes curationes.

217 Op. 4: Defensio propositionum prænarratarum contra quendam Dominicastrum ... qui ... Annam conatur ostendere polygamam.

For its history see under Op. 2.

.1 (Köln) John. Nydepontanus, 1534.

Issued in his Op. 2; other editions in the Op. omn. published by the Bering brothers.

218 Op. 5: Dehortatio gentilis theologiae, ad amicos aliquos quondam perorata.

He was asked by some young friends to lecture to them on Pimander of Hermes Trismegistos, which he refused to do, and wrote to them this dehortation against the mistakes of looking for a knowledge of God to heathens. There is no virtue in Hermes or Plato what had not been better taught by the Apostles, and the New Testament.

Text begins: "Efflagitastis iam saepe a me ut librum ter maximi Mercurii ... (ends) ... Nunc ergo credite mihi, licet iuniori dum adhuc tempus habetis ad discendum, quod si non crederitis, sero tandem credetis, sed & simul deplorabitis."

.1 Lyon (publisher) 1526.

Supposed edition.

.2 *Antwerpen, M. Hillen von Hoochstraten, Apr. 16, 1529.

SGL:184735

Copy: Berlin; Paris; SCL.

In his Opera 2. ed. f.H₂-I₂v.

.3 (Köln, publisher) 1532.

Copy: BM; München; Berlin; Wien; Pannonhalma, etc.

In his Opera 3. ed. f.H₂-H₂.

Further editions in the Op. omn. published by the Bering brothers.

219 Op. 6: De duplici coronatione Caroli V.

Identical with his Op. 11 (q. v.)

220 Op. 7: Epigrammata.

.1 Köln, J. Soter, 1535.

In his Op. 19.

221 Op. 8: (Epistolae)

Agrippa was in correspondence with many important persons; several of the letters have been published in his various works; also, forming seven "books", in his Op. Omn.

222 Op. 9: Epistola apogetica ... contra insaniam (infamiam?) Conradi Cölin de Ulma, O. P. Monachum.

This letter belongs to Op. 8, but is mentioned separately because of its literary importance. In 1532, when his Occult Philosophy was in print, Conrad Cölin, Dominican inquisitor denounced the author to the senate of Köln, and the press was stopped. The letter is a defense of the Occult Philosophy and of the academic freedom of thought. Written Jan. 11, 1535.

.1 Strassburg, Peter Schöffler, 1535.

Copy: München.

8°; 14f. Very rare.

.2 Strassburg, Schöffler, 1535.

Copy: München.

German transl. by Theodor Faber; 18f.; "Ein Sendtbrief ... wider die Sophisten." "Further editions in Op. Omn.?; not in his Op. 17.

223 Op. 10: Expostulatio super expositione sua in librum de verbo mirifico cum Joanne Catilineti. For its history see life of the author; written 1510 in London.

1 *Antwerpen, M. Hillen van Hoochstraten, 1529.

Copy: SGL; etc.

Issued in his Opera f.D_{1r}-D_{5r}; also in Op. Omn.

2 (Köln, publisher) 1532.

In his Opera f.D_{1r}-D_{4r}.

3 *London, Chapman & Hall, 1856.

SGL:

Copy: SGL; etc.

English transl. by H. Morley in his The Life of ... Agrippa. p. 240-9.

224 Op. 11: Historiola de duplici coronatione Caroli V.

Written by him as the official historian and the keeper of archives; the coronation of Charles V by Pope Clement VII is described in minute details; the event happened Febr. 1530.

1 (Antwerpen) Martin de Keyser (Caesar) 1530.

Copy: BM; 's-Gravenhage.

8^o; 20f.; sigs A-B^{8C}; Italian; f.1_r titlepage; f.1_v blank; f.2_r dedication to Princess Margaret; f.3_r dedication to Antonius de Lalaing.

2 Köln, J. Soter, 1535.

In his Op. 19.

3 Köln (publisher) 1538.

4 Basel (publisher) 1574.

Copy: BM.

In Simon SCHARDIUS: Historicum opus. vol. 2.; fol.—Further editions in (a) M. GOLDAST: Politica imperialis. Frankfurt a. M., 1614; (b) in S. SCHARDIUS: Schardius redivivus. Giessen, 1673.

225 Op. 12: De incertitudine et vanitate scientiarum, et artium atque excellentia Verbi Dei declamatio.

Written by the disgusted, pessimistic Agrippa in 1527; dedicated to Augustinus Furnarius; the fundamental idea of the work is expressed in its first chapter. "Ego vero alius generis persuasus rationibus, nil perniciosius, nil pestilentius hominum vitae, animarumque nostrarum salutis posse contingere arbitror quam ipsas artes, ipsasque scientias." The original Latin edition is not divided into numbered chapters, but the later Latin editions and the translations have chapters with titles. There are 102 such chapters:

1. De scientiis in generali; 2. De literarum elementis (of the characters of the letters); 3. de grammatica; 4. de poesi; 5. de historia; 6. de rhetorica; 7. de dialectica; 8. de sophistica; 9. de arte Lullii; 10. de arte memorativa; 11. 12. 13. mathematica, arithmetica, geometria; 14. aleatoria; 15. de sorte Pythagorica; 16. adhuc de arithmetica; 17. de musica; 18. de saltationibus et choricis; "exercitium profecto non e coelis exortum, sed a malis daemonebus excogitatum"; 19. gladiatoria; 20. histrionica; "nullum denique nomen fuit olim infamius quam histrionum"; 21. de rhetorismo; 22. geometria; 23. optica vel perspectiva; 24. pictura; 25. de statuaria et plastica; 26. specularia (of the art of seeing glasses); 27. de cosmimetria; 28. de architectura; 29. metallaria; 30. astronomia; 31. astrologia iudiciaria; 32. de divinationibus in genere; 33. 34. 35. physiognomia, metoposcopia, chiromantia; 36. 37. geomantia, aruspica; 38. speculatoria; 39. somnispicia (interpretation of dreams); 40. de furore; 41. de magia in genere; 42. de magia naturali; 43. magia mathematica; 44. magia venefica; 45. goetia et necromantia (goetia! intercourse with wicked spirits); 46. theurgia; 17. cabala; 48. de praestigiis (juggling); 49. de philosophia naturali; 50. de principiis rerum naturalium; 51. de mundi pluralitate et ejus duratione; 52. de anima; 53. de metaphysica; 54. de morali philosophia; 55. de politica; 56. de religione in genere; 57. de imaginibus; 58. de templis; 59. de festis; 60. de caeremoniis; 61. de magistratibus ecclesiae; 62. de sectis monasticis; 63. de arte meretricia (remarkable sequence of chapters!); 64. de lenonia (of bawdry); 65. de mendicitate; 66. de oeconomia in genere; 67. de oeconomia privata; 68. de oeconomia Regia sive Aulica ("Scio ego famosam Galliarum urbem ea causa sic perversam, ut vix aliqua ibi matrona pudica sit, vix filiae nubant virgines" etc.); 69. de nobilibus aulicis; 70. de plebeis aulicis; 71. de mulieribus aulicis; 72. de mercatura; 73. de quaestura; 74. 75. agricultura, pastura; 76. de piscatione; 77. de venatica et aucupio; 78. de agricultura residuum; 79. de arte militari ("quoniam leges aliqui in praedones, incendiarios, raptores, homicidas, sicarios poenis saeviant, tales nomine militiae habentur nobiles et honesti"); 80. de nobilitate; 81. de arte heraldica; 82. DE MEDICINA IN GENERE ("ipsa etiam quadam homicidiorum ars est"; the entire medical

science is abounding with contradictory statements); 83. DE MEDICINA OPERATRICE ("tota praeterea medendi operatrix ars nullo alio fundamento quam fallacibus experimentis super extracta est"); 84. DE PHARMACOPOLIA ("... nos mortem nostram magna emere pecunia compellunt"); 85. DE CHIRURGIA ("eujus opera manifesta et securiora sunt remedia ... sed virulentarum sordium immunditia et sanguinolenta crudelitate infamis"); 86. DE ANATOMISTICA ("utrorumque pharmacutorum et chirurgorum theatra carnificina"); 87. DE VETERINARIA; 88. DE DIAETARIA; 89. DE ARTE COQUINARIA; 90. DE ALCUMISTICA ("impunis impostura"); 91. de iure et legibus; 92. de iure canonico; 93. de arte advocatoria ("ars vetustissima et fraudulentissima"); 94. de arte notariatus et procuratoria; 95. de iurisprudentia; 96. de arte inquisitorum; 97. de theologia scholastica; 98. de theologia interpretativa; 99. de theologia prophetica; 100. De Verbo Dei; 101. de scientiarum magistris; 102. ad Eucumium asini digressio.—Several of these "chapters" were also separately printed or translated.

Text begins: "Vetus opinio est, et ferme omnium philosophantium concors ... (ends) ... Sed ut diutius sermociinando ultra clepsidram (ut dicitur) declamem hic orationis nostrae finis esto." See also SCHELLHORN, J. G. Amoenitates literariae, v.2, 1725.

In his Opera (q. v.)

226 Op. 14: Encomium asini.

This is only the 102. chapter of his Op. 12, but it has been given by the German translator of Op. 12 as a separate work: "Lob des Esels." For editions see Op. 12.

227 Op. 15: (commentaries) RAMON LULL: Ars brevis.

Full title: In artem brevem Raymundi Lullii commentaria. As an appendix to the commentaries, the author compiled a "Tabula abbreviata commentariorum artis inventivae." The commentaries were probably written in 1517 during the author's Italian sojourn; they are dedicated to Jean LAURENCE, preceptor at Rivolta, and the friend who helped Agrippa in getting the position of an advocate at Metz. It is a paraphrase of Lull's work.

Text begins: "Raymundus Lullius composuit artem ad scientiarum inventionem ... (ends) ... debilia confrinet, dirigat errata, ligataque resolvat." It consists of 3 parts: A (1) de subiectis universalibus; (2) de praedicatis absolutis; (3) de praedicatis respectivis; (4) de quaestionibus earumque regulis et speciebus; (5) terminorum multiplicatio; (6) figurarum multiplicatio inter se; B) pars principalis secunda; C) pars principalis tertia.

The "Tabula" is dedicated to Adolf ROBOREUS, canon at Köln; it has been probably written much later than the Commentaries (1530?)

.1 Köln, J. Soter, 1531.

Copy: ?

Ref.: Rogent; Panzer; Prost.

8°; contains also the Tabula abbreviata, and the two dedicatory letters.

In RAMON LULL: Opera, on p.787-896 (commentaries) and p. 897-916 (tabula). Roman; text 145 x 80 mm; several diagrams.

Nonexistent ed.: (1) 1538 Köln.

229 Op. 16: De nobilitate et praecellentia foeminei sexus declamatio.

For its history see life of the author; written 1509. Dedicated to Margaret of Austria. It is a single treatise without chapters. The author says that God created man and woman. The necessary difference between the two sexes is only in the anatomo-

my of the organs of generation. But the form of their souls is the same. The woman has the same mind, the same reasoning, speech, and man and woman will become sexless angels. As far as the soul is concerned there is no difference between the two sexes. But looking at whatever is in mankind beside the soul we find that the fair sex is infinitely over the hard male sex. This is proved by many authorities, historical facts, testimonials of the Holy Scriptures, and by the sanctions of the Law. There is beauty in women, also decency in her form. Many things of medical interest.

Text begins: "Deus optimus maximus cunctorum genitor ... (ends) ... Ne ergo opus ipsum in nimis magnum volumen exeat, hic illius finis esto."

Against Agrippa's work an anonymous treatise has been published (sine loco) in 1721: *Der gerette (!) Vorzug des männlichen vor dem weiblichen Geschlechte oder Beleuchtung C. Agrippae Tractats* (etc.). The subject of the preeminence of one sex above the other has been a favorite topic of discussion in the 16. and 17. centuries. See also No. 65 Op. 7 under *Acidalius* in this list.

.1 *Antwerpen, M. Hillen van Hoochstraten, Apr. 16, 1529. SGL: In his Opera, on f.A_{3r}-C_{8v}; dedication on f.A_{3r}-A_{4r}; text f.A_{4r}-C_{8v}. Ed. Pr.

.2 Antwerpen, Martin Keyser, 1530. Copy: Paris. Copy: SGL, etc.

French transl. by Alexis BERTRAND, professor at the Univ. of Lyon; published in the Arch. anthrop. crim., 1910, 25: 112–146; with a preface of the translator; "Grandeur et suprématie des femmes"; full translation, the dedication included. ¶Nonexistent or doubtful: (1) Köln, 1597; in Op. 12; (2) 1632, sine loco; (3) s-Gravenhage, 1686; Dutch transl.; (4) s-Gravenhage, sine anno; French; 2 vol.; (5) Paris, 1726; (6) 1773; German transl. in Op. 12.

230 Op. 17: De occulta philosophia libri tres.

Written about 1510; it is a systematic description of magic as exercised by the ancient and modern magicians. The first editions contained only three books; later, a 4. book has been added to the work, but this is held apocryph by many. His study of the magical sciences was mostly objected to by 16. century Christian scholars. Even in the 17. century, one found it necessary to write against Agrippa's Occult Philosophy. See, e. g., J. BELOT: Les fleurs de la philosophie Chrétienne, Par., 1603. There were several surreptitious editions between 1531 and 1533 before the first authorized publication had been issued at Köln.

(a) Antwerpen, J. Graphaeus, Febr. 1531.

Copy: Bodleian; Darmstadt; Hamburg; Faenza(?)

Surreptitious and incomplete; contains the 1. Book only; (90)f. 4°; f.(1) title: "Henri/ ci Cor. Agrippae / ab Nettesheim a Consiliis a / Archivis Inditiarii sacrae Cae- / sarcae Maicstatis. De occulta / Philosophia Libri Tres"/; f.(1v) privilege in French; f.(2v) to the reader; f.(4r) dedication to Johann of Trithem; f.(5r) letter of Trithem to Agrippa; f.(6r) letter to Herman von WYDE, archbishop of Köln; dated Mechlin, Jan. 1531; f.(7r): index of the first book; f.(12v) blank; f.(13r) portrait of Agrippa's wife; f.(13v) epigram by Hilarius Bertulf; f.(14) blank; f.(16r); f.(89v) text; colophon; f.(90v) errata; f.(90v) device.—Extremely rare.

(b) Paris, Chr. Wechel, 1531.

Copy: Berlin; München; Univ. Paris;

Second surreptitious edition, being a reprint of the Antwerpen edition; the first book only; (16)f. 206p. (1)f. collation variously given).—Rarior.

.1 (Köln, J. Soter, July 1533)

Copy: Berlin; München; Wien; Paris; BM; Pennsylvania Univ.; Libr. Congr.; Williams Coll.; Greenville Pub.; Harvard; Huntington; Coll. Phys. Philadelphia.

The first authorized edition containing the authentic three books. The printing of the work began already in 1532, but the sheets were seized by Conrad COUILLON, and it took some time until the magistrate of Köln allowed the continuation of printing. (See life of the author).

(6)f. CCCLXIIp.; fol.; with portrait of author, 204 woodcut initials, and 8 astrological woodcuts. There are mentioned six different variants of this edition; two of them are differentiated as follows: (a) on p.19, the line 36 reads "cuivis" in the A variant, "cuius" in the B variant; (b) on p.198, line 6 reads "divinatio" in the A variant, "dominatio" in the B variant; copy of Coll. Phys. Phila. is the B variant.—Very rare edition; £2 (1931); 33RM (1932); 60RM (1933); £8-10 (1939); £0-32-6 (1939); 460 lire (1940).

.2 (place, printer) 1541.

Copy: München; Wien;

4°; CXCH f.; reimpression of E. Pr.—Rarissimum.

.3 Marburg, publisher, 1559.

Copy: München; Paris;

- .4 (Basel) publisher, 1565.
Copy: Breslau; Göttingen; Harvard.
Only the 4. apocryphal book; 173p. 8°; also P. ABANO: *Elementa magica*; a reprint of 3. ed.
- .5 Basel, publisher, 1567.
Copy: Pennsylvania Univ.
Only the 4. Book; 172p.; (probably a reprint of 4. ed.) Very rare.
- .6 (Paris, Jac. Dupuys, 1567)
Copy: Berlin; Münster; Marburg; BM; Yale.
All four books; 16p, l. 668p.; 8°; probably the same as one ed. by the "Beringi Fratres" (q. v. for contents)
- .7 Lugduni, Beringi fratres, 1600.
In the Op. omni.
Under the fictitious name of the Bering brothers, with fictitious place of publication, and date, the magical works of Agrippa and others have been published repeatedly. They are as follows:
(a) Lugduni, n. d.; 2 vol. 694p.; 1156p.; 8°; contains Agrippa's Op. 17, two of his orations, his Op. 12. Abano's Heptameron (=Elementa magica), Plinius: Ratio compendiarum magiae naturalis, the spurious 4. Book, Disputatio de fascinationibus, De daemoniis, Gerard of Cremona: Geomantia astronomica; Arbatel de Magia, De incantatione et adjuratione collicque suspensione epistola, Tritheim De steganographia, Diversa divinationum genera; copy: Berlin, München, Wien, Münster, Coll. Phys. Phila.; Pennsylvania Mus. Art; Univ. Chicago; Libr. Congr.; Harvard; Johns Hopkins; Lehigh; Amer. Antiqu. Soc.
(b) an undated edition with 677p.; copy: Berlin, München;
(c) Lugduni, 1550; 586p. 8°; (only the three authentic books?) copy: Breslau, Bonn, München, Paris; Harvard; Penns. Mus. Art.
(d) Lugduni, 1567; 668p. 8°; contents as in (a) ed. of the Bering brothers; copy: Berlin, München, Paris, BM; this may be identical with the 6. ed. (q. v.)
(e) Lugduni, 1580; 2 vol.; copy: Berlin, München; the best of the Bering eds according to Jöcher;
(f) Lugduni, 1600; copy: BM;
.8 (place, printer) 1615.
Copy:?
The three books; offered for sale by Sotheby in 1934.—10 shill. (1934).
- .9 Mecheln, publisher, 1633.
Copy:?
4°; "Occultae philosophiae libri tres; item de Magia naturali"; contains also De magia mathematica, De geomantia et necromantia, Theurgia, Cabbala, Praestigia (all by Agrippa?); some of these titles seem to be chapters taken from Op. 12.
- .10 London, R. W. for Gregory Moule, 1651.
Copy: BM; Phila. Pub.; Huntington; Harvard; Princeton; Pennsylvania Univ.; Amer. Antiqu. Soc.; Union Theol. Seminary.
English transl. by (Horne) J. F.; (4p.; 24p.) 583p. 12p. last p. blank; 4°; one folding table; frontispiece, portrait; contains only the three authentic books.
- .11 London, J. C. for John Harrison, 1655.
Copy: BM; Libr. Congr.
English transl. of the 4. spurious book by Robert Turner; 8. p. l. 217p. 4°; contains also translations of ABANO: Magic elements; GERARD of CREMONA: Astronomical geomancy; G. PICTORIUS: The nature of spirits; ARBATEL: Magic, etc.—The 10. and 11. ed. is usually sold together as one work. £5-15 (1930); £1 (1932); £3 (1933).
- .12 London, J. C. for Tho. Roods (Rooks?) 1665.
Copy: BM;
Re-issue of the 11. ed.; only the 4. book; 206p. 4° £3-3 (1940).
- .13 (place) publisher, 1702.
Copy:
French extract from Op. 17; 12°; "Le Grand Grimoire avec la grand Clavicule de Salomon et la magie noire, ou les forces infernales du Grand Agrippa" ... etc.—6RM (1902). (By Antonio Veneziano?)
- .14 's-Gravenhage, R. C. Alberts, 1727.
Copy: Wien; Greifswald; Paris; BM; Libr. Congr.; Phila. Pub.
French by A. Levasseur; 2 vols; 8°; transl. of the 1567 ed. of the Bering brothers; nice and rare, with illustrations.
- .15 Roma (fictitious) publisher, 1744 (i. e. ca 1800?)
Copy:
French; in "Les oeuvres magiques de ... Pierre d'Aban."

144964—Vol. 6, 4th Series—54

- .16 London, printer, 1783.
Copy: Harvard; Libr. Congr.
English translation (new? or reprint of 1651-55?); 8°—£2-5 (1934)
- .17 (Liège, publisher) 1798.
Copy: Harvard.
French; in ABANO: Les oeuvres magiques.
- .18 Roma(?) printer, 1800.
Copy:
As ed. 15.; 18°; 108p. 4 plates; place of publication fictitious; Latin and French text.
The same work has been repeatedly published in the 19. century with fictitious imprints: (a) ca 1830; (b) ca 1850.
- .19 *Stuttgart, J. Scheible, 1855.
SGL:91181
Copy: Berlin; München; BM; SGL; N. York Pub.; Libr. Congr.; Harvard.
224p.; p.(1)-(6) unnumbered; text 100 x 65 mm; Gothic; few illustrations; text on p.29-209; p.210-221 advertisement. An abstract in German from the Occult Philosophy of Agrippa; ed. by Friedr. Barth; forms No. 4 of Kleiner Wunder-Schauplatz d. geheim. Wiss.; includes 27 chapters, mostly from the apocryphal 4. Book; title reads: "Die Cabbala des Heinrich Cornelius Agrippa von Nettesheim." Reprinted 1886; copy Dropsie College.
- .20 Stuttgart, J. Schieble, 1855-56.
Copy: München; Libr. Congr.; Harvard.
German transl. of P. Abano's magical works; containing also extracts from Agrippa; 5 vol., forming No. 7-No. 11 of Kleiner Wunder-Schauplatz d. geheim. Wissenschaften.
- .21 (Firenze?) Atene, 1880 (?)
Copy: BM.
Italian abstract from the apocryphal 4. Book; 224p.; 12°; "Il libro del Comando, ovvero l'arte di evocare gli spiriti."
- .22 (place, publisher) 1881-82.
See in PROST: Cornille Agrippe.
- .23 Inwood, N. Y., E. Loomis & Co., 1897.
Copy: N. York Pub.
Engl. translation; 288p.
- .24 Chicago, Hahn & Whitehead, 1898.
Copy: BM; John Crerar; Newberry; Libr. Congr.; Boston Pub.
Revised version of the English translation of J. F. (see ed. 10); 288p.; 8°; frontisp. portr. illustr.; 6 plates, one facsimile; "Three books of occult philosophy or magic", but contains only Book 1: Natural magic; ed. by Willis F. Whitehead.—\$3 (1939).
- .25 Paris, Chacornac, 1910-1911.

Copy: Berlin; Marburg; Bonn; Harvard.
German translation; the same as ed. 20; "Magische Werke"; called "3. Auflage"; 5 parts; forms v.10-v.14 of Geheime Wissenschaften.
- .29 Berlin, Barsdorf, 1921.
Copy: Breslau; Halle; Univ. Chicago; Newberry; N. York Pub.
Reprint of ed. 28.
- .30 Kiel, Scheible, 1921.
Copy:
Reprint of ed. 19; 224p.; forms No. 4 of Wunder-Schauplatz. Nonexistent editions: (a) Lyon, 1553; referred to by Linden; (b) Paris, 1910; this is the magic work of "Arbatel" occurring in several editions of the spurious 4. Book of the Occult Philosophy; (c) Malines, 1529; (d) Malines, 1531; the place in the date of dedication has been taken as the place of publication; e) 1547, Liège; f) 1835, Stuttgart.
- .231 Op. 18: Oratio in funere Margeritae Austriacorum at Burgundiorum principis.
Margaret died at the age of 52; the panegyric written in 1530 by Agrippa as the official historiographer of the court.

.1 Antwerpen, M. de Keyser, June 6, 1531.
Copy: 's-Gravenhage.

28f; 8°; sigs A-G⁴; Roman; dedicated to Joh. Carundeleit, Archbishop of Palermo, dated Mechlin, Dec. 23, 1530; f.(1r) title-page; f.(1v)-(2v) dedication; f.(3r)-(28r) text and colophon; f.(28v) blank.

232 Op. 19: Orationes decem.

The orations were publicly held at various occasions.

.1 Köln, J. Soter, 1535.

Copy: BM; Paris; Berlin; Wien; Göttingen. Chicago Univ.

151p. A-I⁸K⁴; 8°; contains also his Op. 11 and the epigrams.

†The orations were also published in the Op. omn. Non-existent: (a) 1515; Ref.: Gautier.

233 Op. 20: De originali peccato, disputabilis opinionis declamatio.

The nature of the original sin was a favorite topic of Agrippa. Op. 26 discusses the same problem; dedicated to Theodor, Bishop of Cyrene, residing at Köln. Written in 1518.

Text: "In principio libri Genesios ... (ends) nisi quatenus a Sancta Christiana Ecclesia non fuerit reprobata."

.1 *Antwerpen, M. Hillen van Hoochstraten, Apr. 1529.

Issued in his Opera; also in later editions of his selected works and Op. omn.

234 Op. 21: Contra pestem antidota securissima.

Written in 1518 in Metz; contains his experiences obtained at the time of an epidemic of plague; dedicated to Theodor, Bishop of Cyrene, at Köln.

Text: "Quod vivendi regimen pestilentialium tempore servandum sit ... (ends) inque parvum fuerit per ignis artificium purgata, et ad simplicitatem suam congrua lotionem redacta. Sed de his alias."

.1 *Antwerpen, M. Hillen van Hoochstraten, Apr. 1529.

In his Opera; on f.K_{1v}-K_{7v}. Also to be found in all other editions of his Opera selecta and Opera omnia.

.(b) *Köln, Matthaeus Smitz, 1625.

Copy: NYAcadM; SGL.

On p.158-68, of P. POTIER Insignes curationes.

235 Op. 22: Pronostics astrologiques.

.1 (place, printer, 1526?)

Nothing definite could be found on the existence of such a publication.

236 Op. 23: Querela super calumnia ob eandem Declamationem.

Further defense of his Op. 12; for editions see under Op. 1.

237 Op. 24: De sacramento matrimonii declamatio.

Written in 1521; dedicated to Margaret of Austria; a work which caused the author much trouble both with the courtiers and with the monks. He believes that marriage is a human bond for solace, for generation, and for the preservation of chaste life; celibacy increases lust, but one should choose a wife from love; is against divorce of any kind.

Text: "Sacramentum matrimonii antiquissimum ... (ends) cum illo, ut confundatur tanquam reprobatus a Deo & a fidelium consortio alienus."

.1 Lyon, publisher, 1526.

Copy: Unknown.

In his Opera (q. v.)

.2 (Lyon, printer, 1526?)

Copy: Paris.

French translation by the author; 16°; Gothic letters; "Bresve déclamation du saint sacrement de mariage."—Rarissimum.

.3 London, John Scot, 1528.

Copy: Huth Libr.

English translation; by John Harington; 12°; extremely rare.

.4 *Antwerpen, M. Hillen van Hoochstraten, Apr. 1529.

In his Opera; f.D_{5v}-E_{4r}.

.5 Antwerpen, M. de Keyser, 1530.

Copy: Paris.

In his Op. 16, f.(47r)-(64r); French translation: "Briefve declamation di saint Sacrement de mariage."

.6 London, T. Berthelet, 1540.

Copy: BM; Huntington.

English by D. Clapham; 8°; "The commendation of matrimony."

.7 London, Thom. Berthelet, 1545.

Copy: BM; Folger.

sigs A-C⁸; 8°; Clapham's English translation; dedicated to Gregory Cromwell, son of Lord Cromwell.

.8 Köln, A. Hierat, 1598.

In his Op. 12.

†Further editions either with Op. 12 or with Op. 16.

238 Op. 25: Pro Samuele Pufendorffio ad iniquos Pufendorffii censores.

Not by Agrippa; Samuel Pufendorf was born 1632. Agrippa's name has been used as a pseudonym by a 17. century writer. Such a work is, however, listed under Agrippa by the Gesamtkatalog der Preussischen Bibliotheken.

239 Op. 26: De triplici ratione cognoscendi Deum.

Written ca 1516, and dedicated to Gulielmo Paleologo, marquis of Monferrat; divided into 6 chapters.

Text: "Eternitatis Dominus universorum principium medium et finis ... (ends) ... a spe vitae et salutis aeternae alienus est."

.1 *Antwerpen, M. Hillen van Hoochstraten, Apr. 1529.

In his Opera. f.F_{2v}-H_{4v}. Also in other editions of his Opera.

240 Op. 27: De vita monastica sermo.

.1 Lyon, printer, 1526.

In his Opera (q. v.)

.2 (Köln, publisher) 1532.

In his Opera, 3. ed.

†Lost work: 1. Dialogus de homine qui Dei imago est.

AGRIPPA, Livio Luigi, fl. ca 1528?

Unknown; probably of Monferrato; contemporary (?) of Heinrich Cornelius Agrippa, who also spent some time at Monferrato. He may be the translator of the anonymous Italian translation of ALBERTUS MAGNUS: Liber aggregationis.

241 Op.: Discorso sopra la natura et complessione humana.

Includes also three tables: (a) anni climacterici; (b) hours of day and night with the planets which are ruling them; (c) table of sunrise for the year, and changes of the moon. An astrological superstitious treatise describing the influence of the stars and planets according to the ages of a growing man from his birth to his 100. year; there is also a brief enumeration of the correlations of the shape of various organs with the character of a man (physiognomy).

Text: "I' esser differenza da una natura all'altra, questo si fa in virtù di quel pianeta ... (ends) e se li numeri passeranno 30. si butta 30. & l'epata restera (followed by 4 epactal tables)."

.1 Venezia, printer, 1528.

Ref.: Panzer.

AGRYPPA.

See Agrippa.

AGÜERO, Bartolomé Hidalgo de, 1531–1597.

Syn.: Bartheleme Hidalgo; Hidalgo de Agüero.

Physician and surgeon, called the Spanish Paré. B. Sevilla, 1531; stud. med. at Sevilla as the pupil of Juan de Cuevas and Afonso Lacuadra; was a very successful surgeon at Sevilla, where he practiced at the Hospital del Cardenal; also professor of surgery at the Sevilla university, and teacher of Ponce de León; about 1584, he began his literary career with writing a surgical treatise (*Avisos de cirugía*), and became involved in a polemic with Frago, surgeon of Felipe II; wrote 14 surgical works, which were ready for publishing in 1596, yet were not printed until 1604, seven years after the author's death; died at Sevilla, Jan. 5, 1597.

He was a severe critic of the surgical practice in Spain, and advocated his method of "via particular" or the dry method of wound treatment against the "via común" or the instrumental and wet method of treatment.

Portrait reproduced from Ciba Symposium, 1940.

242 Op. omnia: Tesoro de la verdadera cirugía y via particular contra la comun.

According to the preface of the editor, who was Francisco Ximénez Guillen, the author's son-in-law, this work is a veritable treasure of surgery which makes anyone a skilled surgeon at home; it contains 14 numbered treatises, as many independent works, and several unnumbered works. The first treatise deals with surgery proper, describing the treatment of head injuries, cranial fractures, treatment of aneurysm (chapt. 9), wounds, nerves, fistulas, the French disease (chapt. 19), cancer, smallpox, the instruments of anatomy (chapt. 30), etc. The method promoted by the author is the "via particular", i. e. treatment without wet applications or instruments. It is claimed that the new method reduced the time for wound healing from 6 months to from 7 to 14 days. The work contains also references to AMERICA (p.275 of 3. ed.).

Text: "El intento de este libro es ... (ends, 14. treatise) ... los demas podran cada qual ver en los Praticos que dellos tratan".

.1 Sevilla, printer, 1604.

Copy: Sevilla Univ.

Fol. with portrait of author (omitted in later editions). Does not contain the 14. treatise (Tabardillo)

.2 Barcelona, printer, 1624.

Copy: Madrid;

Dedication to Diego Hexarch; approbation by Bosser, proto-medicus of Cataluña. 42—Rarior

.3 *Valencia, Claudio Macé for Crespin Roman, 1654.

SGL:120655

Copy: Sevilla; SGL;

The most complete edition of the author's works. (6)f. 400p.; sigs: §A–Z, Aa–Mm⁶ Nn²; SGL copy defective: p.37–52, 107–134, and the last leaf missing; text 245 x 150 mm; Roman, with dedication and chapter headings in Italic; few floreated hollow initials, diagram (p.81); primitive double woodcut on tp.: St Cosma and St Damian;

f.(1): title: "Tesoro / de la Ver- / dadera Cirugia / y via particular con- / tra la comun/" ... etc.; woodcut, and imprint; f.(1v) blank; f.(2r): censure by Dr Dionisio Daza CHACON, physician and surgeon of Felipe II, dated March 25, 1596; f.(2v): privilege for present edition, in Catalan language, dated Valencia, June 15, 1652; f.(3r)–(4r): prologue of the editor, Dr Francisco Ximénez Guillen, to the reader; f.(4v): sonnet to Sevilla; f.(5r): sonnet to the author; f.(5v): poem of the editor: Encomion in autorema; f.(6): an alphabetical dictionary of medical terms for the layman; p.1–400; text; (defective end)

The following treatises are contained in this edition:

1. The la verdadera cirugía; 77 chapters;
 - (a) Recopilación de las opiniones y modos curativos que ha auido en cirugía; 26 chapters; a sort of history of surgery;
2. De evacuaciones.
3. De la sangría.
4. De heridas; 25 chapters;
 - (b) Fundamentos y preceptos de la via particular; 28 principles;
 - (c) Breve suma de las razones de la via particular;
 - (d) Antidotario general; a great number of prescriptions;
 - (e) Respuesta a las proposiciones (Or. Suma de las proposiciones) que el Licenciado Frago enseñá, contra unos avisos particulares de cirugía; 46 propositions and as many answers; written 1585;
5. De la definición de la cirugía y de los apostemas en general; 13 short chapters;
6. De teoría de cirugía; in the style of the questions of examination boards.
7. De l'anatome del cuerpo humano; 87 chapters;
8. De la historia del ojo; 4 short chapters;
9. De apostemas; 15 chapters;
10. De la definición de la ulcera y de sus diferencias; 16 chapters.
11. De fracturas; 18 chapters;
12. De dislocaciones; 12 chapters;
13. De peste, 5 chapters;
14. De tavaridillo; 6 chapters.

*Nonexistent editions: (a) Sevilla, 1584; editions of the independent works are sometimes mentioned by biographers, but no copy of them was ever seen.—SGL copy bd in vellum; previous owner Fra Felis de Cadiz, at the Capuchino Enfermeriade de Malaga.—Rarior.

AGUILAR, Francisco, fl. ca 1590.

A little-known physician, who was born at Valencia, studied and practiced there at the end of the 16. century. His name appears on a Latin treatise written against Bernardo CAXANES, who in 1592 published a pamphlet criticizing the Valencian physicians. The true author is said to be his professor, H. POLO.—Could he be identical with Francisco Aguilar, the poet?

243 Op. Pro Valentina medicorum schola adversus Bernardum Caxanes ... De febrium putridarum curatione liber.

Criticism of the work of B. CAXANES, physician at Barcelona; chapter by chapter the author analyzes the arguments of the Barcelona physician, and attempts at a thorough defense of the treatment of putrid fevers as taught by the Valencian medical school.

.1 *Valencia, Philip Mey, (1594) 1593.

SGL:312452

Copy: SGL;

(2)f. (9)f. p.1–222; pagination begins on f.B_{2r}; text 115 x 75 mm; Roman; the 2 unnumbered pages are prefixed; sigs A–P²; there are two titlepages; First tp.: "Pro Valenti- / na medicorum schola / adversus Bernardum Caxanes / Barcinonensem Medicum / De febrium putridarum curatione liber/ auctore Francisco Aguilar Medico Valentino/" ... etc.; the imprint has the date 1594; the verso of the tp. is blank; the 2. preliminary leaf carries a dedication to the consuls of Valencia (on recto) and words of the printer (on verso) dated "VI. Id Januar. MDXCIV"; f.A_{1r}–A_{2r}; privilege in Catalan language, dated Aug. 1593; also ecclesiastical privilege dated Sept. 1593; f.A_{2v}–A_{3v}; preface of author to the Medical School of Valencia; f.A_{4r}–B_{2r}; letter of author to Bernardus CAXANES; p.1–222 text: "Multiplex, ac varia est tractandi ac docendi artes, et disciplinam ratio ... (ends) unguem ullo modo discedant".

There is no other edition; the present edition is identical with the reference made by LINDEN to the subtitle of this work and with the 1593 date of publication.

AGUILAR, Pedro de, 1514–(before 1600)

B. at Antequera, small village in Grenada (Spain), in 1514; he was a soldier, captain, and a horseman; once he was held captive at Tunis; his Op. 2, which has much interest for veterinary medicine, has been finished 1570; his date of death is not known; memoirs of his captivity at Tunis were published recently.

244 Op. 1: Memorias del cautivo en la Goleta de Túnez.

AGUILERA, Antonio de, 1533–(ca 1591?)

Syn.: Aquilera;

B. at Junquera in Catalonia in 1533 (his own data); stud. medicine and pharmacy at the University of Alcalá de Henares; settled at a small village, at Atienza in Guadalajara, where he was the physician of Don Fernando de Silva, Count of Cifuentes; to whom he dedicates his Op. 1 in 1566; his Op. 1 was published in 1569; later, he was honorary physician at the Spanish court; date of death unknown (ca. 1591?)

246 Op. 1: (commentaries) MESUE(= Mása-waih al-Márdíní) De medicinis universalibus et particularibus.

The author was interested in the education of Spanish pharmacists, and in the standardization of the methods of drug dispensing. The present work describes the qualities of a true pharmacist, the necessary training, and, in the form of a dialogue between Apollo and Curio, selected chapters from Mesue's work on pharmaceutical preparations and the methods of decoction, maceration, etc., are discussed.

Text of commentaries: "Es crive Hipocrates varon cierto, insigne, y fuente de la arte ... (ends) muchas particularidades en griego y de pliego. Lau Deo." He was 33 years old when he composed this work.

.1 *Alcala de Henares, Juan de Villanueva, 1569. SGL:312153

Copy: SGL;

(4)f. 239f.; sigs: A–Z, Aa–Hh⁸ (the last leaf, f.Hh⁸ missing in SGL copy); text: Roman for commentaries; Italic for Mesue's text, and for prefaces; text 110 x 65 mm; heraldic device on tp.; Ar: title: EXPOSICION SO/bre las preparaciones de Mesue, agora nuevamen/ te compuesta por el doctor Antonio de Aguilera na/ tural dela villa de Yunquera y residente/ en la ciudad de Guadalajara./ ... etc.; woodcut and imprint; f.A_{1v}: approbation by Dr Juan Gutiérrez, dated Madrid, April 1, 1566; also privilege signed by Pedro del Marmol, May 1569; f.A_{2v}–A_{3v}: privilege royal dated, April 15, 1565; f.A_{4r}–A_{4v}: preface of the author; f.1_r–f.6_v: dedication to Fernando de Silva by the author; f.7_r–f.12_v: preface: "Visto que es imposible ... en la facultad y arte de la medicina"; f.13_r–f.239_r; text; f.239_v blank; (f.240, missing; probably blank?).—SGL copy bd in leather.—Rarissimum.

247 Op. 2: Praeclarae rudimentorum medicinae libri 8.

Written in 1562, when the author was "siendo de edad de treynta años"; the original manuscript consisted of 215 leaves. It is a compendium of medicine; the author called it "Enchiridion de medicina".

- .1 Alcalá de Henares, J. Villanueva, 1571.

Copy: BM;

164f.; fol.—Rarior.—30 pesetas (1913).

248 Op. 3: Apologia por el hábito de Santo Domingo.

- .1 Alcalá de Henares, printer, 1572. 4°

Copy:?

Whether by him?; Antonio mentions also a manuscript with the title: De varia curandi ratione, which is very probably his Op. 2.

AGUILERA, Juan de, —after 1555.

Physician, mathematician, and astrologer in the first half of the 16. century. He was professor of astrology at the University of Salamanca from 1528 to 1536 or later; according to the testimony of Andres de LAGUNA, he was also papal

physician to Paul III (Pope 1534–49) and Julius III (Pope 1550–1555); probably for his services as a papal physician, he received the office of the treasurer of the Church of Salamanca; after 1555, nothing is known of him. He wrote on the astrolabe in 1528, and on mnemonics in 1536.

249 Op. 1: Ars memorativa.

- .1 Salamanca, printer, 1536.

Copy: BM;

25f.; 8°; Gothic; very rare.

250 Op. 2: Canones astrolabii universalis.

Dedicated to Luis Vacca, Bishop of Salamanca; the work is 'non solum astronomis verum etiam palamophilis, medicis, ac theologis' useful.

AGUILON, Francois, S. J., 1566–1617.

Syn.: Aguilonius; Agulonius; Aquilonius; Aguilon.

B. Bruxelles, 1566 (not in 1530 or 1567); son of the secretary of Felipe II, King of Spain; he became a Catholic priest, and received the tonsure by Cardinal Granvella in 1577; entered the Jesuit order, 1586; then he studied at Douai, where he later was teaching theology and philosophy; travelled in Spain; returns to the Netherlands in 1596; at Antwerpen and Louvain, rector, and professor of theology and mathematics; made the plan for the Jesuit church at Antwerpen (not Rubens); in the early years of the 17. century he finished his chief work on optics, and continued his studies on catoptries and dioptries, which, however, was left unfinished owing to his death; died at Antwerpen, March 20, 1617.

251 Op.: Opticorum libri sex.

Written before 1611; the result of much personal study and observation. The six Books are: 1. anatomy and construction of the eye; 2. the explanation of the optical rays, optical axis, and horopter; 3. the vision of size, distance, shape, site, perspective, motion, etc.; 4. optical illusions; 5. lights and shadows (including the principles of the camera obscura); 6. the science of projections, orthographic, "stereographic", and scenographic. He holds that the primary organ of vision is the "tunica aranea", which begins in the retina, and through the optic nerve it enters the brain. Many interesting observations on comparative physiology of vision.

.1 *Antwerpen, Off. Plantiniana, widow and sons of Joh. Moret, 1613. SGL:117121

Copy: Berlin; München; Wien; Coll. Phys. Phila.; SGL; Harvard; John Crerar; N. York Pub.

(24)f. p.1–684; (22)f.; sigs: for the preliminary leaves *—****, and for the index leaves Mmm–OooPpp; text 270 x 145 mm; Roman and Italic letters; many woodcut diagrams, and seven engravings in the text; title-page also engraved; many ornamental initials.

f._{1r}: half-title: "Optica / Agvilonii"; f._{1r}: blank; f._{2r}: engraved title-page designed by Rubens and made by Corn. Galle; it is an architectural design with symbolic figures of Mercur holding the head of Argus, Minerva and Juno(?); imprint at bottom surrounded by geometrical figures; title reads: "Francisci / Agvilonis / e Societate Jesu / Opticorum / libri sex / Philosophis iuxta ac Mathematicis / utiles /"; f._{2v}: blank; f._{3r}–f._{3v}: dedication to Imigo de Borgia, governor of Antwerpen; f._{4r}–f._{4v}: author to the reader, giving contents and scope of the work; f._{5r}–****_v: contents; p.1–684: text; f.Mmm_r–Ppp_r: alphabetical index, with errata at end; f.Ppp_v: two approbations, and a privilege dated Jan. 15, 1612, Dec. 9, 1611, Jan. 20, 1612; f.Ppp_r: printer's device; f.Ppp_v: blank.—SGL copy bd in leather; Ex-Libris of William Abbot, Fellow of the St John's College, Cambridge.

The copper-plate engravings are all in the style of RUBENS. They are: 1) the title-page (see above); 2) on p.1, 100 x 145 mm, old scholar in Roman toga at left, sitting with an unrolled scroll of paper on his knee, examining an excised eye fixed with four nails on a stone block; five amorettes helping him; at right, dissecting instruments, the bearded head of a cadaver with an opening cut into the frontal bone, and examined with a sound by an amorette; 3) on p.3, 55 x 145 mm, six figures of the eyeball and lens, showing the choroid, bloodvessels, and a cross-section of the bulbus; 4) on p.105, 100 x 145 mm, scene on a mountain side, with an old man and amorettes measuring the height of the Colossus of Rhodes; 5) on p.151, 100 x 145 mm, interior scene in a library with a sitting old man, who with one eye closed attempts at guessing the size of a short rod held before him by three amorettes; 6) on p.195, 100 x 145 mm, an interior scene in the same style, with an old man kneeling in front of a table, on which two circles are exhibited on a vertical board for the symbolization of optical illusions, with amorettes looking on; 7) on p.356, 100 x 145 mm, old man and two amorettes around a table studying the results of a light beam thrown through holes on a vertical board; 8) on p.452, 100 x 145 mm, scene with three amorettes, one holding a torch, and the old

man holding a spherical framework the shadow of which is thrown upon the ground and is measured by one amorette.

AHMAD ibn 'ABDULLAH (at-Tulaitilī)

fl. 1504.

Syn.: Agmer ben Ab-Dala; Aluned ben Abdala; not to be confused with Ahmad ibn 'Abdullah of Morocco, ca 1610, or with the historian Ahmad ibn 'Abdullah ibn Muhanunad ar-Rāzī, ca 1586.

He was a physician in Spain, and practiced in Toledo (hence at-Tulaitilī); in 1504, he wrote his Op. in the Arabic on the mineral waters of Salam-Bir.

252 Op.: *Tratado de las aguas medicinales de Salam-Bir que comunemente llaman de Sacedon*. The Arabic Salam Bir was the village Sacedon, 30 miles SE from Guadalajara; its sulfurous warm springs, about 2 and a half miles away from the village, were known as Thermida (recently called La Isabela).

AICARDI, Paolo, -1607.

Syn.: Aicardus; Aicardius; Aicardo;

B. in the first half of the 16. century at Albenga, a small coastal village 50 miles SE of Genova; stud. medicine, and graduated at Torino; in 1570 he came to Padova, where he was an eager listener of the dermatological lectures of Girolamo MERCURIALI; the lectures have been written down by many of the pupils, but with such a distortion of the words that Mercuriali, first being against any printed publication of his lectures, became convinced that for his own reputation a correct text of the lectures should be published. He permitted Aicardi to restore the correct text and to edit it in 1572. While in Padova, Aicardi wrote also commentaries to several classical authors (Cesar, Cicero, Plautus, CELSUS, Aristoteles, Polybius), but only the commentaries to Caesar were published 130 years after the author's death. He was offered several good positions, but for his attachment to G. V. Pinelli he refused to leave Padova, where he died of a febrile disease on Aug. 10, 1607.

254 Op. 1: (commentaries) J. CAESAR: *De bello Gallico*.

.1 Leiden, S. Luchtman, 1737.

Copy: Paris;

In CAESAR: *De bellis Gallico et civili Pompeiano*, edited by Fr. Oudendorp; (13)f. 1035p. plus index.

Further editions of Aicardi's commentaries in the reprints of the Oudendorp edition of Caesar's *De bello Gallico*: 2. Leiden, 1740; 3. Oxford, 1780; 4. Stuttgart, 1822.

255 Op. 2: (editor) G. MERCURIALI: (a) *De morbis cutaneis*; (b) *De excrementis*.

.1 *Venezia, Paolo & Antonio Meiet, (1571) 1572. SGL:110882

Copy: SGL;

For description of the volume see under MERCURIALI; it contains a dedication by Aicardi to Cardinal Gulielmo Sirlet (1514-1585), Librarian of the Vatican, dated Padova, Nov. 24,

1571, and a preface to the students at the Padova University; text of preface: "Nisi exploratissimum haberem, paucos esse doctiores in tota Europa ... qui harum rerum, estis periti. Valete, et in dies maiora a Mercuriale, Deo favente, expectate". The preface is followed by an alphabetical index, and the list of the chapters by the editor. The date in the colophon is 1571.-50 Sw. fr. (1928).

AILLEBOUST, Jean, d', ca 1531-1594.

Syn.: Aillebout; Alibour; Alibourg; Alibosius; Albosius; cogn. "Haedus" Albosus; SMELLIE confabulated an author by the name of "Lithopaedus Senensis", which is the title of one of the works of this author.

Chief physician of Henry IV, King of France (*1553; 1589-1610).—B. probably before Sept. 5, 1531 (unless a posthumus) at Autun (=Augustodunum, or Hedua; hence called Haedus); his father was Pierre d'A., physician at Montpellier and later, physician of Francis I; his mother's maiden name was Mlle de Messey; had five brothers: Anatole, André, Charles, who was later bishop of Autun (1572-85), Hugues, and another Jean, who also became a physician; his education must have been excellent both in languages and in medicine; date and place of graduation not known (Paris or Montpellier?); ca. 1580, became town physician at Sens, (Dept. Yonne), where he observed the curious case of a petrified child carried by its mother for 28 years; the publication of this case in 1582 (Op.) called the attention of the world to its author, who soon became physician of Henry III, and, later, of Henry IV; married twice, the second time to Suzanne Hotman, and had several sons, one of them Antoine, by his first wife, who later became a public official at Sedan; as physician of Henry IV, he was called to examine Mlle Gabrielle d'Estrées, the mistress of the King, whom he found pregnant; the illegitimate child of the King was born June 7, 1594, and soon the doctor was killed by poison on July 24, 1594.

258 Op. 1: Portentosum lithopaedion (Icon)

The petrified fetus was one of the greatest sensations of the 16. and early 17. century. On May 16, 1582, the 68-year old Columba Chatry, for 20 years wife of Louis Charité, tailor at Sens, died. Twenty-eight years before, she has been pregnant, but at the time of labor there was no child born. After a long puerperal illness she recovered, but always has been suffering since then. After her death, the husband asked a postmortem section, which was performed by Claude Le Noir, and Jean Cottias, surgeons. Finding a petrified female fetus they called the physicians of the neighborhood, among them the author, also Jean Perigo, Simon Provancher, and Jean Rousselet as well as the village pharmacist, Etienne Bouvier.

At the instigation of Ambrois Paré, the author ordered a woodcut made of the petrified fetus, and, with a short hexastichon of his, he sent it to friends and scientists. Yet, the woodcut did not satisfy the curious investigators, who wanted to know more about this never-described abnormality. Meanwhile, one of the observers, Simon PROVANCHER, physician at Sens, wrote a French pamphlet on the history of the case. He wanted to publish it in Latin translation also, but Ailleboust already finished his case history (see Op. 2), to which Provancher wrote then a supplement on the possible causes of petrification.

The image of the petrified fetus was also published in the works of Ambrois Paré, Licet, and Thomas Bauhin after drawings which are different from Op. 1.—The fetus itself was sold to Pretesegla, a Paris dealer in curiosities, in whose shop it was seen by the midwife, Louise Bourgeois (Boursier); then, it was in the possession of Etienne Carteron, goldsmith at Paris, who sold it to another goldsmith called Gilbert Vautron in February 1628. This man brought the fetus to Venezia, from where it came into the possession of Frederick III, King of Denmark and Norway, in 1653.

- .1 (Sens) Joh. Savine(?), 1582.

Copy:

Latin broadside; with a hexastichon signed I. A. M. (Jean d'Ailleboust).

- .2 (Sens, Jean Savine?) 1582.

Copy:

French broadside; "Portrait d'un prodige & enfant pétrifié ... en la ville de Sens"; anonymous.

- .3 *Basel, C. Waldkirch, 1586.

SGL:

Copy: SGL; Coll. Phys. Phila.

Published in the 2. vol. of GYNAECIORUM physicus, edited by Casp. Bauhin; on p.565-566; size of woodcut 160 x 125 mm; headed: "Extractio Lithopaedij Senonensis ex / matris vtero."/; it represents a nude female cadaver in a sitting and reclining position, on a bed, facing the cliffs and a coastal village in the right background; her abdomen is opened along the linea recta, showing the situs of the uterus (marked with A); on the right of the cut, a cushion on the bedside with fetus in the opened amniotic sac (marked with B); on the left, cushion on the floor with the same fetus without the fetal membranes (marked C).

- .4 *Basel, C. Waldkirch, (1589)

SGL:

Copy: SGL; Hunterian; Paris.

The same drawing but a different cut; published in C. Bauhin's Latin translation of F. ROUSSET's folding plate inserted after p.254; size 160 x 125 mm; headed: "Hanc Iconem referes ad paginam 254." It is together with Op. 2.

- .5 *Frankfurt a. M., M. Hartmann for N. Bassaeus, 1601.

SGL:

Copy: BM; Paris; Coll. Phys. Phila.; SGL.

In his Op. 2 issued in Bauhin's transl. of ROUSSET's work here called "Exsectio foetus vivi ex matre viva." On p.300; a new cut of 115 x 80 mm; it is about the same drawing as before but a "mirror" image of the previous cuts.

259 Op. 2: Portentosum lithopaedion (text)

The subtitle reads: Embryum petrefactum urbis Senonensis. The treatise contains an objective description of the case history, also a discussion of the possible causes of petrification. This part is called "Exercitatio problematica"; to which is usually attached a similar discussion written by Simon Provancher, another physician at Sens, and eyewitness of the unusual event.

Text of history: "Mulier Senonensis, nomine Columba Chatry ... (ends) haec de matris et foetus administrate anatome dicta sunt." Text of the Problematic Exercitation: "Iam de istius indurationis naturalibus causis ... (ends) tot mensibus et annis a matre circumgestatum fuisse." For PROVANCHER's treatise see under his name.

Copy: BM; Paris; Hunterian; Coll. Phys. Phila.; Univ. Amsterdam; SGL.

Under separate title-page published in the COLLECTANEA de diuturna graviditate; the three treatises occupy f.A_{1r}, which is the separate title-page, p.3-41, followed by a treatise on the same lithopaedion written by Thomas Bartholin on p.42-52; title reads: "Portentosum / Lithopaedion, / sive / Embryum / Petrefactum urbis Senonensis, /" ... etc. with imprint.

f.A_{1r}: 6 lines: "Historia Embryonis ... / scribitur"; p.3-6 the author to the reader; p.7-10 epigrams; p.11-18: case history; p.19-32: text of Exercitatio problematica; p.33-41: Simon Provancher's work.

¶Nonexistent and doubtful editions: (a) Sens, 1587; (b) Basel, 1588.

260 Op. 3: Epigramma ad Franciscum Roussetum.

A hexastichon offered to Caspar Bauhin for insertion in the Latin translation of ROUSSET's TETEPOTOMOTOKIA; it begins: "Qui vicit Poenos, cuique Agricola subdita, dictus, etc." For its editions see Op. 2 (ed. 4, 5, 8).

261 Op. 4: (Epistola ad F. Roussetum: Historia partus Caesarei)

It has been inserted in all editions of F. ROUSSET's TETEPOTOMOTOKIA, in Section I, Chapt. 5, Historia 3; description of a Caesarean section performed by Jean MARAES, surgeon at Chastre en Berry, on his own wife; the son so delivered became later a royal surgeon; the mother had a successive birth of a daughter "per vias naturales."

For its editions see Op. 2 (ed. 4, on p.505; ed. 5, on p.12; ed. 6, on p.42-43 in a different version; ed. 7, on p.450; ed. 8, on p.11-12).

262 Op. 5: (Epistola ad F. Roussetum: Historia apostematis uteri)

To be found in all editions of ROUSSET's TETEPOTOMOTOKIA, in Section IV, Chapt. 3, Historia 1; description of two cases of uterine abscess which required laparotomy.

For its editions see Op. 2 (ed. 4, 2. vol., p.530-531; ed. 5, on p.84-86; ed. 6, on p.287-289; ed. 7, on p.463; ed. 8, on p.78-80).

263 Op. 6: (Epistola ad Casp. Bauhinum)

Written Dec. 20, 1585 from Montebell; description of a case of Caesarean section performed at the end of 1582 by Jean JACOT, surgeon, on a woman at Marry; the case has been described also by ROUSSET in his TETEPOTOMOTOKIA assertio historiologica (see Op. 2, ed. 6, on p.81-86).

Text: "Gratissimae mitis fuerunt tuae litterae ... Mitto quoque hexastichon, quo exaravimus ... &c."

For its editions see Op. 2 (ed. 4, vol. 2, p.563-4; ed. 5, on p.182-185; ed. 7, on p. 81, which contains only a reference to this letter).

Unidentified author in the 16. century.

264 Op.: Unterrichts aus Gottlichen und gaystlichen Rechten, etc.

A polemic writing from the era of the reformation discussing the right of the priests to marry.

.1 (place, printer) 1526.

Ref.: Graesse.

Title reads: "Underricht ... auch aus den flayschlichen Bapstischen unrechten, ob ein Priester ein Ewail oder Concubin das ist ein beyschlaß haben möge."

al-'AINTÁBÍ al-AMŚÁṬÍ, Muzaḥfaraddīn ibn ut-Tanā'ī Mahmūd ibn Aḥmad, 1407-1496.

B. at Cairo, 1407; studied the canonic Law of the Islam (called the *Fiqh*); studied also medicine, and was taking part in military campaigns as a surgeon(?); died Dec. 1496, at Cairo. Four of his works are known to exist in manuscripts.

265 Op. 1: Al-Isfār fī ḥukm al-asfār.

A theological work; "The revelation on the judgment of the Scriptures". MS: referred to by Dā'ūd al-Mauṣūf.

266 Op. 2: Al-Qaul as-sasīd.

"The solid speech"; MS.

267 Op. 3: Ta'sīs aṣ-ṣihha.

Commentary on the Al-Lamḥa al-'aḥḥa (The chasty glance) of Abū Sal'īd ibn Abū Surūr as-Sāwī al-Isrā'īlī ibn Amīr ad-Daula; the title of the commentary is The Laying of foundation for health.—MSS: Gotha 1970; Bodleian, I, 860; Princeton; Rāmpūr State Libr., I, 487.

AIROLDI, Giampietro, fl. 1582-1614.

Syn: Airolodus; Airolidi; Ayrolidi; Ayrault; Airolidi di Marcellino. Not to be confused with Pierre Ayrault (died 1601).

Professor of medicine at Venezia; b. about the middle of the 16. century, at Mundelli, a small town near Novara, as descendant of a noble Italian family; his father was Cesare A., and his uncle was Marcantonio MAJORAGGIO, a student of classical authors; studied at the Padova University, where he studied for 3 years under G. Mercuriali, and graduated MD and PhD; thereafter, settled in Venezia, where he conducted a successful medical practice and was also teacher of medicine; he edited several works of his uncle and various commentaries written by Fr. VALLES, between 1582 and 1614; in 1613, he was still alive.

268 Op. 1: (editor) M. MAJORAGGIO: Commentarius in Dialogum de partitione oratoria Ciceronis.

His uncle's work; of philological interest;

.1 Venezia, Fr. Franciscis Senensis, 1587.

Copy: BM;

4²; dedicated to Pompeo TRISSINO; 181f. portr. of Majoraggio.

.2 (place, printer) 1614. 8^o

Copy: BM;

269 Op. 2: (editor) M. MAJORAGGIO: Oraciones et praefationes.

Dedicated to Nicolò SFONDRATI, later Pope.

.1 Venezia, Ant. Bonifacio, 1582.

Copy: Paris;

210f.; 4²; the next edition was printed at Münster, 1599, but this and a few other German editions are not by Airolidi.

270 Op. 3: (editor) M. MAJORAGGIO: Commentarius in dialogum, seu librum primum de Oratore ... Ciceronis.

Under a different title this seems to be identical with his Op. 1.

.1 Venezia, F. Franciscis, 1587.

Copy: Paris;

165f.; 4²

271 Op. 4: (editor) Fr. VALLES: Commentaria in Cl. GALENI ... libros.

Contains the Vallesian commentaries to the following Galenic works: 1. *Ars medicinalis*; 2. *de inequali temperie*; 3. *de temperamentis*; 4. *de simplicibus medicamentis libri 5 priores*; 5. *de differentiis febrium lib. 2*; 6. *de locis patientibus libri 6*; also four works of F. VALLES: (a) *de urinis*, (b) *de pulsibus*, (c) *de febribus*, (d) *methodus medendi*.

.1 Coloniae (i. e., Venezia) Franc. de Franciscis & J. B. Ciotto, 1592.

Copy: Paris;

Fol.; 1222 cols and index.

.2 Coloniae (i. e., Venezia) F. de Franciscis & Giamb. Ciotto, 1594.

Copy: BM; Paris; Coll. Phys. Phila.;

Fol.; (1)f. 1 blank, 1222 cols. (5)f.; Roman letters.—50 Sw. fr. (1928); 28RA1 (1929) A later edition of the commentaries is not by Airolidi (Frankf., 1615).

272 Op. 5: (editor) Fr. VALLES: In libros Hippocratis de morbis popularibus commentaria.

These are the commentaries on the epidemiological work of Hippocrates. Airolidi wrote a preface to this edition, the text of which is: "Magna res est et ore omnium a Deo ... (ends) quadam eximia ratione explicantem atque illuminantem omnia, audiamus". In the preface the editor shows himself an ardent follower of Hippocrates and Galen, and an opponent to the Arabism in medicine.

.1 *Coloniae (= Venezia) Giambattista Ciotto, 1588. SGL:18734

Copy: Paris; Coll. Phys. Phila.; SGL;

For description of the volume see under VALLES; fol.; (6)f. 850 cols. (9)f. Later editions of the Vallesian commentaries not by Airolidi.

273 Op. 6: (editor) Fr. VALLES: In Aphorismos Hippocratis commentarii VII.

The volume contains commentaries of VALLES to the following Hippocratic works: 1. *Aphorismi*; 2. *de alimentis*; 3. *pro-*

gnosticum; 4. de ratione victus in morbis acutis; the text is preceded by the preface of the editor: "Plurimae res inveniuntur, quae quamvis corpore ... (ends) ut utrique utrumque propositum implere possitis".

Copy: BM; SGL;

Fol.: (8)f. 628 cols. (9)f.; for description of the volume see under VALLES.

The author also wrote a collection of *CONSILIA DE FEBRIBUS* (not de "floribus"), which is in MS at the Paris Bibl. Nationale (No. 63,333).

AJALA.

See *Ayala*.

AJELLO, Sebastiano di, fl. 1577–1597.

Syn.: Aiello; Agelli(?)

Little is known of him; between 1575 and 1597, physician at Napoli, where he witnessed an epidemic of plague, and wrote his observations (op. 1) in 1577; another epidemic has been described by him in 1597 (op. 2); it is also mentioned that he composed a poem in honor of Albert of Aragon, Duke of Austria, of which, however, no trace could be found.

See *Ayora*.

AKAKIA, Jean, (–1635)

See in 17. ct. list.

AKAKIA, Martin (the First) 1497–1551.

Syn.: Akakia; his true name is Sans-Malice, which in Greek is *α-κακια*; not to be confused with his son, Martin II, or with his grandson, Martin III, or with the great-grandson, Martin IV; his family name has been used by Voltaire as a pseudonym: "Docteur Akakia".

B. at Châlons-sur-Marne (hence the cognomen "Catalaunensis") in 1497 (he was baptized Dec. 5, 1497); his parents were Louis A., seigneur of Hevrancourt, and Martine Du-Crocq; the old family motto was: "Quaecunque ferat fortuna ferenda est"; for higher education he went to Paris, where he studied medicine under Pierre BRISSOT, and graduated MD in 1526; his chief interest was the study of the classics of medi-

cine, and the restoration of these works to their original integrity; he was especially interested in Galen, and his commentaries to the *Ars medica* were published in 1529; at that time, he was probably in Italy; from 1530, he has been professor of medicine at the University of Paris, became physician of the royal court of Francis I, and took care also of the health of Clément MAROT, the poet; married ca 1538 to Marie Chauveau, and had a son, Martin the Second, in 1539; in the year of his marriage, his Op. 2, another Galen commentary, was published; in 1545, was sent by the University to the Council of Trento; his third Op. was published after his death; died June 2, 1551.

His portrait was painted by Henri MAHIEU in 1692, and reproduced by N. LEGRAND in *Les collections artistiques de la Fac. de méd. de Paris*. Paris, 1911, p.53.

He is the founder of a distinguished medical dynasty the members of which excelled in academic and court life during the 16. and 17. centuries. Jean had five other sons, one of whom became a diplomat, and four entered the monastery of Port-Royal des Champs.

Martin I (d. 1551)

Martin II (d. 1588) (q. v.)

Martin III (d. 1604) (q. v.)

Jean (d. 1635)

Martin IV (d. 1677)

276 Op. 1: (commentaries & translation) GALEN: Ars medica, quae et Ars parva.

The translation of Galen's *Τέχνη ιατρική*, also called *Microtechné*, *Ars medicinalis*, or *Ars parva*. The added commentaries form about 70% of the volume. It is dedicated to Francis I, King of France; written in an excellent style, the commentaries reflect the author's vast erudition, and contain many personal observations.

Dedication: "Cum nuper in Regiam tuam, Franciscus Rex ... (ends) Valeat et vincat tua maiestas et autoritas." Text of translation: "Triplex est omnis doctrina, quae ordine nititur: ... (ends) quem ita inscribimus, Galeni de propriis libris"; text of commentaries: "Doctrina aut actio est quae a praecceptore in discipulum transfunditur ... (ends) alios de pulsibus: & de ossibus ad initiatos, ante libros alios anatomicos."

Akakia also translated Galen's book *De constitutione artis medicae* ad Patrophilum, which was left in MS (see MS. Lat. 7120, Paris Bibl. Nat.)

AKAKIA, Martin (the Second), 1539-1588.

Syn.: Aekia; Sans-Malée; see also Martin the First, his father; not to be confused with father or with the 3. or 4. Martin Akakia.

Professor of surgery and surgeon of Charles IX, King of France; b. at Paris, 1539; son of Martin Akakia (the first) (q. v.) and Marie Chauveau; he studied at Paris, and in his early youth he became connected with the royal court, where his father was a physician; in 1551, the father died; the young Akakia was soon attached to the court of the Queen mother, Catharine de' Medici, who favored him for his good jokes; in

1565, he accompanied the young King, Charles IX (*1550; 1560-74) to Bordeaux; 1572, graduated MD at the Paris University; in the early part of 1574, he was nominated professor of surgery at the university; in 1578, he became the second physician of Henry III (King 1574-89), in which year he wrote a panegyric of the King (op. 3); July 1580, he became regent of the Faculty of Medicine of Paris; his married life is unknown, but he had two sons, the elder Martin (the Third), and the younger Jean, both of them physicians. He died Dec. 8, 1588 at Paris, and his son, Martin (the Third) succeeded him in the chair of surgery at the Paris University.

While professor at Paris, he wrote annotations to the anatomical work of Jacques DUBOIS (Sylvius) in 1577, a work on cosmetics in 1578, two consilia on renal diseases, and a large treatise in two books on Women's Diseases; the latter is incorrectly attributed to his father by HALLER, and by a great number of other biographical works, but there is no doubt that it is the work of the second Martin Akakia (see Op. 3). Only his consilia and his gynecology were published, after his death; the rest of his medical writings is still in manuscript.

279 Op. 1: In nephritide consilium.

Consilium in a case of renal calculus; gives dietetic prescription, and medicaments (pills, enemas, etc.)

Text: "Calculus ex viscosis & crassis humoribus fit ... (ends) Cum sero lactis utatur, ut dictum est, loco praedictorum, maxime in aestate."

SGL:

Copy: SGL; etc.

Published as the 139. Consilium on col. 398-399, in L. SCHOLTZ Consilia medicinalia (q. v. under Scholtz)

281 Op. 3: De morbis mulieribus.

Written by Martin Akakia (the second) and not by Martin Akakia (the first); Martin, the eldest, died 1551; yet, in the Prolegomena of this work the author quotes Sealign (=BORDON), whose book called *Exercitationes exotericarum* was first published in July 1557 at Paris. Such a quotation could not have been made by the eldest Akakia; it is therefore incorrect to attribute this gynecological treatise to Martin Akakia (the first)

The work is divided into two Books, the first containing the Prolegomena, and 24 chapters, and the 2. Book having 19 chapters. It is based chiefly upon Aristoteles, Hippocrates, Moschion, and Galen, while Plinius and several of the modern (i. e. 16. ct.) authors are criticized, especially Amatus Lusitanus. In the Prolegomena the author discusses what a woman is and what the uterus is. The chapters are:

Lib. 1: 1. de mēsiuſ suppressione; 2. de profusioribus mēsiuſ; 3. de mēsiuſ melancolicis peccantibus ac primum de pituitosis; 4. de mēsiuſ melancholicis et biliosis; 5. de fluxu mulicbri, ac primum de albo; 6. de fluxu rubro; 7. de fluxu sanioso; 8. de hysteria suffocatione; 9. de uteri aberratione; 10. de prociencia uteri; 11. de agglutinatione mutuo contactu, et complicatione uteri; (deals with atresia); 12. de rebus contra naturam in utero contentis, & primum de columella (i. e. the clitoris); 13. de uteri inflammatione; 14. de erysipelate uteri; 15. de pituita in utero, et oedemate; 16. de flatu in utero; 17. de hydropse uteri; 18. de scirrho uteri; 19. de cancro uteri et mammarum; 20. de lapide et topko in utero; 21. de ascaridibus uteri; 22. de mēsiuſ suppuratis et suppurato uteri; 23. de ulceribus uteri; 24. de mola uteri;

Lib. 2: 1. De hominis procreatione et natura seminis; 2. de conceptione et eius impedimentis (on sexual intercourse, conception and pregnancy); 3. de diacta gravidarum; 4. de symptomatis gravidarum, praecipue vero de abortu; 5. de superfœtatione; 6. de partu; 7. de officio obstetricis; 8. de secundis cunctantibus; 9. de curatura puerperae; 10. de symptomatis puerperarum; 11. quo tempore mamma danda est puero? 12. de dolore puerperarum; 13. de difficultate partus; 14. de monstro gemino et mortuo partu; (15.) de geminis; (16.) de foetu mortuo, et corrupto abigendo; (17.) de colostratione, de malo pilari, de incremento mammarum contra naturam; 18. de sterilitate tum mulierum tum etiam virorum; 19. de iis quibus venter inflatur per Venerem. (Chapters incorrectly numbered by printer) There does not seem to be much original or new in the entire work.

.1 *Strassburg, Lazar Zetzner (1597)

SGL:53985

AKIBA ben Jakob Gunzburg.

See Frankfurt, Akiba.

ALAARD (of Amsterdam) 1491-1544.

Syn.: Alardus Amstelredamensis; Allard.

B. at Amsterdam (hence Amstelredamensis) at 1491 (var. 1490); studied first at Köln, later at Louvain, where he was pupil of Jacobus Latomus and Ruard Tapper, the inquisitor; he was interested in theology, Latin, Greek, and Hebrew, and was in correspondence with a great number of friends such as Erasmus, Conrad Golenius, and Peter Nuñez; in 1520, he was teacher at Louvain, where he held lectures on the grammar of Erasmus; at the end of his life, he was again teaching at Louvain, where he died in 1544, and was entombed in the Franciscan Church.

Most of his many writings are of theological nature; as the editor, commentator and translator of some works of Baerland,

G. Budé, Hippocrates, Huysman (Agricola), Marbodius, and Theophylactos he played an important role in the medical literary life of the 16. century.

His portrait has been published in his *Ritus edendi paschalis* (Amsterdam, 1523) and reproduced in the catalog of Leo S. OLSCHKI: *Choix de livres anciens*, 3. vol., Florence, 1912, p. 990.

287 Op. 3: (translation & paraphrasis) HIPPOCRATES: Epistola ad Damagetum.

- .1 Solingen, J. Soter, 1539.

Copy: BM; Paris; Hunterian.

(188f. sigs a-k, L; 8°; Greek text with Latin translation and paraphrasis, Very rare.—Another edition, which could not be found anywhere, and seems to be nonexistent, is also mentioned (Solingen, Sachse, 1530)

288 Op. 4: (editor) R. HUISMAN (=Agricola) De inventione dialectica.

For description of the work and its editions see HUISMAN, Roelof.

289 Op. 5: (edit. & comment.) MARBODUS: De gemmarum lapidumque pretiosorum formis, naturis atque viribus opusculum.

The work of Marbodius or Marbodaues, whose true name was "de Marboeuf," and who wrote his poem on precious stones at the end of the 11. century, has been published repeatedly since 1511. In 1531, G. Pictorius edited it at Freiburg i. B. Alard had a much more complete and correct manuscript than did Pictorius so that his edition contains 100 more verses of the poem. He also added the variants of the text, also extracts from the works of Plinius, Dioscorides, Galen, Philo, Hegeppus, Origenes, St Basil, Gregory of Nazianzus, Chrysostomos, Marsilio Ficino, Ermolao Barbaro, also the annotations of Pictorius, and his own scholia, which he titled "Praecipuae gemmarum lapidumque pretiosorum explicationes."

Alard dedicated his edition to Georg of Egmont (=Haecmondensis), Bishop of Utrecht (died 1559), to whom he gladly offers this work of Marbodius, which he calls "octavum orbis miraculum."

- .1 Köln, Hero Fuchs (=Alopecius), 1539.

Copy: BM; Paris; Osler 5126.

126f. 8°; "Marbodaeci Galli Caenomanensis de gemmarum ..." etc.; on f.76: "Marbodaeci sive potius incerti auctoris versus aliquot hactenus desiderati"; these verses were first edited by Alard, and they describe (in 93 verses) 16 precious stones not included in the original poem of Marbodaues; they are: capnites, ophthalmius, obsianus, ignites, diadochos, exebenus, lingurus, daphnius, mennonius, galactites, odontes, lapis qui fronte nascitur asini, trisutes, phrygius, sarcophagus, and specularis lapis.

Alard's additional verses have been also included (with his variants of reading) in Abr. GORLAeus *Dactylitheca* (Leiden 1695 and 1707), and in Ant. BEAUGENDRE's edition of Marbodius (Paris, 1708). His dedicatory letter and his preface to the reader were reprinted in the critical edition of MARBODUS by Johann Beckmann (Göttingen, 1799; copy: SGL), where his variants of reading and some of his annotations are also to be found.—The original edition of 1539 is very rare.

290 Op. 6: (transl. & edit.) THEOPHYLACTOS (Simocatta?) Epistolae.

The father of Arn. Birkmann, a physician and anatomist, died; for the consolation of his friend, Alard edited the Greek and Latin text of the letters of Theophylactos in a small volume, which also contains a few poems on fever, wine, and women, on the Truth, on virginal life, etc.

- .1 (Louvain, printer, ca 1541)

Copy: ?

(48f. 8°; extremely rare.—100 RM (1930)

Other works of Alaard are theological such as (a) *Dissertatio de Eucharistiae sacramento*, Louvain, 1537; (b) *Passio Dni Nostri*, Amst., 1523; (c) *Ritus edendi paschalis agni*, Amst., 1523; (d) *Compendium catechismi*, 1538; (e) *Epithalamium*, Antw., 1528; (f) *Haeretici descriptio*, Solingen, 1539; (g) edition of C. Crocus, 1531; etc.

ALAIN, Jean, -1616?

Syn.: Alanus.

B. in Saintes before 1570; son of Nicolas Alain, the physician (q. v.); he was advocate at the parliament of Bordeaux, and sheriff at Saintes in 1616; his only connection with medicine was that he edited the works of his father in 1598.

291 Op.: (editor) Nicolas ALAIN: *De Santonum regione*, etc.

For description see 291a.

ALAIN, Nicolas, -ca 1570.

Syn.: Alanus.

B. in the first half of the 16. century; Catholic physician, practicing at Saintes ca 1560; he was interested in the genealogy of the families of his town, also in the manufacturing of salt, which was the town's chief occupation; in 1568-1569 he wrote his two works on these subjects; died about 1570, probably at Saintes. He is said to be the first to identify in the absinth of Saintonge (Saintes) the santonin of older pharmacological and botanical authors (Columella, Dioscorides); he also used it therapeutically.

¶ For his work and life see also Rev. de la Saintonge, 1905, 25: 163.

291a Op. 1: De factura salis apud Santones.

This work has been published in his Op. 2; but before its publication the manuscript has been copied by Bernard PALISSY, who published it in his *Discours admirables de la nature des eaux et fontaines* (Paris, 1580) as his own. In Palissy's Op. omn. it was repeatedly printed (1777, 1844, 1880, 1888, also ?) 1890, 1922; see under PALISSY.

.1 Saintes, F. Audebert, 1598.

Copy: Paris.

Published in Op. 2.

292 Op. 2: De Santonum regione et illustrioribus familiis.

The title further reads: "... item de factura salis ...", which is his Op. 1. It has been edited by Jean, his son, and dedicated to the Prince of Condé. The work is in a rather crude Latin, and of little scientific value.

See Lallemand.

ALAMANNI, Luigi Francesco, sen., 1495-1556.

Syn.: Alamannus; not to be confused with Luigi A. (1558-1603), also poet.

Italian poet and diplomat; b. at Firenze, Oct. 3, 1495; son of Pietro Alamanni (1434-1519), ambassador of Firenze at other Italian towns; he received an excellent education, but for political reasons he had to leave Firenze, and sought refuge in France, where he was living under the patronage of Francis I; he wrote many poems, and the French King paid the expenses of printing them in 1532; he took part in various diplomatic missions; in 1546, his *Coltivazione* was published, an imitation of the Georgicon; after the death of Francis I, he remained at the royal court and was in favor of Henry II to whom he offered several of his writings; his comedy *Flora* was played at the royal theatre at Fontainebleau in 1555; he married twice, once a dame of the court, had several sons and daughters, and died April 18, 1556, at Amboise, probably of an attack of dysentery.

293 Op.: La coltivazione.

Poem in the style of the Georgicon, describing, in six Books, agricultural and horticultural subjects; dedicated to Francis I, King of France.

ALATINO, Moses, 1529–1605.

Syn.: Moyses Alatinus; Moses Amram Alatinus; "Aloysius Alatini" (printer's error in the 1607. ed. of Galen's Op. omni.)

B. 1529 in Italy, probably at Spoleto where he spent his early childhood; he had a half-brother Yehiel, who was a physician at Todi (Italy), and a brother, Vitale, who was a physician of Julius III (Pope 1550–55) and of Bartolommeo EUSTACHI, the anatomist; Moses Alatino studied at Perugia, where he learned philosophy from Francesco Piccolomini; while at Perugia, he found the Hebrew translation of the work of Themistios, which he translated between 1568 and 1573, and published in 1574 (Op. 2); sometime in the 70's he entered into the service of Camillo VARANI, son of the Duke of Camerino, whom he accompanied to various places; in 1572, he spent some time at the hot springs of Padova with his master, and cured himself of a chronic ailment; he resided at Ferrara, where he was held in great esteem; in 1577, he wrote a letter to a friend, a former Moroccan Jew, who became baptized, entered a monastery, and changed his name from Joseph Zarfatì to Andre de Monte; this friend became a fanatic inquisitor, and was especially ferocious with Hebrew books; Alatino asks him in his letter for more leniency; in 1587, he is at Ferrara, and, with the aid of his elder son, Bonajuto Azriel Pethahiah Alatino, who also was a physician, he attempted to translate into Latin a Hebrew manuscript of Ibn Sina's Qānūn(?); yet, this translation was never finished, and never published; he received his license for medical practice at Ferrara from Pope Clement VIII ("1536; 1592–1605) in 1592; at the end of his life, he translated one of Galen's commentaries on Hippocrates from the Hebrew into Latin, and this translation (Op. 1) was inserted into the 8. and 9. Juntine editions of Galen's Opera omnia. He probably died at Venezia, April 17, 1605 (the Hebrew Nisan 29, 5365). His son, Bonajuto, was physician and Rabbi at Ferrara; his younger son, Emanuel, died in 1605; his sister remarried at Ferrara in 1618.

294 Op. 1: (translator) GALENOS: In Hippocratem, De aere, aquis, et locis commentarius.

There existed an Arabic translation of Galen's commentary in the 13. century, which Solomon ben Natan ha-Meati translated into Hebrew on June 2, 1299; this Hebrew manuscript text, of which a copy is now at the Bodleian Library, came into the hand of Alatino, who translated it into Latin. His translation is introduced by a preface to the reader in which he brings arguments for the authenticity of the commentaries.

Text of preface: "Non me latet, (candide lector) non defuturos ... (ends) commentarios legitimos ac fideles ipsius Galeni esse." There are only three commentaries; their text: "Argumentum. Pertractat de Aeris varietate, & locorum differentijs, quae ex diverso ad quattuor mundi partes situ, & ventorum flatibus dependunt. Particula Prima. Quicunque artem medicam recte ... (ends) Astronomia enim caeteris nationibus exceptis Aegyptijs, cognita non fuit."

1. *Venezia, Juntae, 1609.**SGL:89614**

Copy: BM; Paris; SGL; etc.

Published in the 8. Juntine edition of Galen's Opera omnia; it is contained in the 2. volume ("Librorum Secunda Classis"), in which the 2. preliminary leaf (without signature) has Alatino's preface, while the commentaries occupy f.1r–f.6v. This is the first edition of Alatino's translation; it is not in the previous 7. Juntine edition (of 1597), nor in any of the Galen editions of the 16. century. STEINSCHNEIDER mentions a Galen edition of 1679, but this supposedly Paris edition could not be found even at the Paris Bibl. Nat.

2. *Venezia, Juntae, 1625.**SGL:38034**

Copy: BM; SGL;

Published in the 9. Juntine edition of Galen's Opera omnia; it is to be found in the 2. volume ("Secunda Classis"), with Alatino's preface preceding, on f.1r–f.6v.

295 Op. 2: (translator) THEMISTIOS: Paraphrasis in libros 4 Aristotelis de caelo.

Themistios (ca. 317–388 A. D.) was probably the most important among the 4. century scholars of Constantinople; he wrote a great number of paraphrases on the works of Aristoteles. One of them is a paraphrasis on the De Coelo, which has been translated from the Greek into Arabic, and from the Arabic into Hebrew; the Hebrew translation was made in 1284 by Serahya ben Ishāq in 1284 at Roma; the text of this translation was found by Alatino at the time when he was studying philosophy under Francesco Piccolomini. He was urged by Piccolomini and by Bartolommeo Eustachi, the anatomist, to translate the only existing Hebrew text into Latin. With the aid of his friend, Elia Nolano, he finished the translation in 5 years (1568–1573), and dedicated it to Cardinal Luigi d'Este.

ALBANDINUS.

See Arcandam.

ALBANI, Bartolommeo, fl. 1470.

Syn.: Albanus; de Albano; "Guilhelmus Gratarolus" in the 1553 ed. of De Balneis.

Not much is known of his life; he was the descendant of the illustrious Albani family, which had a Bergamo and an Urbino branch; he is usually mentioned by the biographers as a professor at Bergamo about 1550; but he must have died already at the end of the 15. century or in the first decades of the 16. century. He was a practitioner at Bergamo, and wrote his balneological work in 1470 at the occasion when the baths at Trescore Balneario (=Vallis Transcherius) were rebuilt by Bartolommeo COLLEONI (1400–1475), noted Italian mercenary commander, whose family exercised a minor sovereignty over the Bergamo district. Trescore Balneario is about 10 miles east of Bergamo.

296 Op. De balneis Vallis Transcherii Libellus.

The manuscript of this work came into the possession of the library of the Dominican Friars (at Bergamo?); it was written July 27, 1470; in 1552, or about that date, a copy of this manuscript was seen by Guilermo GRATAROLI, who himself was born at Bergamo; he made an extract of it, and adding a few of his own, offered it to Conrad GESNER; the extract was printed under the name of GRATAROLI in the balneological collection of 1553 (Venezia); almost 30 years later, however, the original full text, with some variants of reading, was edited under the correct name of its author, by Comino Ventura, printer at Bergamo.

The extract is a single, undivided treatise under the title: "De Balneis Vallis Treschurii agri Bergomatis". It begins: "Balnea Vallis Treschurii, a civitate Bergomi per decem Italica milliaria distantia orientem versus" ... etc. At the end it reads: "Haec ego Guilhelmus Gratarolus doctor medicus cum ex mea oculata observatione, tum aliorum Bergomatum medicorum veterum scriptis longa praxi breviter, & non obscure collegi ad proximi commodum. Faxit omnipotens Deus ... et potest & debet".

The original manuscript, as printed in 1582, is divided into 12 chapters; the text reads: "Caput I. Locus & instauratio Balnearum. Balnea Vallis Transcherii, a civitate Bergomi per decem (Italica) milliaria distantia versus Orientem ... (ends) cum Dei auxilio convalescent ex suis infirmitatibus, ad laudem ... (&c.) ... per infinita secula seculorum. Amen."

- ALBERTI, Alberto Lodovigo de, 1560–1628.**
See list of 17th century authors.
- ALBERTI, Leone Battista, 1404?–1484.**
See **DEGLI ALBERTI**. Leone Battista.

ALBERTI, Salomon, 1540–1600.

Syn.: Albertus; Salamo Albertus; Albert; not to be confused with Marius Salomonius Albertschus (ca 1530) or with Solomon Albertseus (ca 1567).

His portrait (1596) is reproduced from the SGL portrait collection.

B. Oct. 1540 at Naumburg, where his father was either an architect or a real estate man, a convert Jew; in 1541, the family moved to Nürnberg (Norimbergae; hence called Norimbergensis), where his father died next year; the poor mother could not pay the expenses of his education, and the magistrate of the city took care of his school expenses; in 1560, he became student of the Wittenberg University, where he must have studied not only medicine, but also languages, because his

writings contain many Greek quotations and references to Hebrew literature; 1574, graduated MD; 1575 (not in 1573), became professor of physics at Wittenberg; in 1577, he began to teach medicine, and was professor of medicine until about 1594; he was especially interested in anatomy; most of his medical works have been written during this period of 20 years; meanwhile, he married, and had a son, Johan Jacob Alberti (not to be confused with the editor of Paracelsus); in 1582, a savage epidemic closed the university, and students together with the professors fled from the city; the author retired to his "Ammonianum," and wrote his anatomical "History" for medical students; in 1588, at the request of the Duke of Saxonia, he began to study the problem of endemic scurvy, and made a thorough survey of the population not only of Saxonia, but also the entire Germany, and of a few islands of Denmark; in 1592, he became the physician of the Duke of Saxonia, Friedrich Wilhelm, and next year he published his observations on the scurvy; thereafter, he took no part in the academic life, and did not write anything; since 1592, he has been residing at Dresden, where he died March 28, 1600 (var.: March 29)

His chief achievements were on the field of anatomy, and his descriptions of the cochlea, venous ostiola, lacrymal apparatus, renal papillae, and intestinal valves (the so-called Bauhin valves) are said to be fundamental. He also left a number of reports of abnormalities such as the abnormal origin of the renal veins, etc.

List of works

- Op. 1:** Adumbratio et descriptio sursum nutantium membranularum in venis brachiorum et crurum;
Op. 2: Antidotarium medicamentorum simplicium et compositorum, quae internis et externis corporis affectibus accommodantur.
Op. 3: De ardore stomachi;
De asthmate. See Op. 29.
Op. 4: De bile excrementicia;
Op. 5: De cognitione herbarum;
Op. 6: Commonefactio ad communitatem universitatis scholasticae;
Op. 7: Consilia aliquot medica;
Op. 8: Cur in lacrimis suspiria et gemitus fere conjugantur?
Op. 9: Cur pueris non sit interdicendum lacrimis?
Op. 10: De disciplina anatomica;
Op. 11: Elegia;
Op. 12: Epistola consolatoria ad J. Oelhaufum;
Op. 13: De felle ad intestina restagnante;
Op. 14: (editor) GALEN: De ossibus; (Greek)
Op. 15: (ed. & Transl.) GALEN: De urinis (Greek-Latin)
Op. 16: Historia plerarumque partium humani corporis;
Op. 17: De lacrimis (thesis of M. Henig)
Op. 18: De medendi scientia ... imprimis de Rasis libro nono;
Op. 19: De morbis contagiosis (his doctoral dissertation)
Op. 20: De morbis mesenterii et eius quod pancreas appellatur;
Op. 21: De moschi aromatis natura et efficacitate;
De mutitate. See Op. 35.
Op. 22: Observationes anatomicae;
Op. 23: Orationes duae;
Op. 24: Orationes quattuor;
Op. 25: Orationes tres;
Op. 26: De peste;
Op. 27: Questionem (Responsio ad) an et quid grandini in sue cum schorbuto in homine sit commercii.
Op. 28: Quaestio an ventriculus suo cremore vere nutriatur; Quaestio cur pueris non sit interdicendum lacrimis. See Op. 9.
Op. 29: Quaestio num metallica et mineralia in asthmate conferant;
De Rasis libro nono. See Op. 18.
Op. 30: Schorbuti historia;
Op. 31: De singultu;
Op. 32: De structura ureterum renis dextrae mirifica;
Op. 33: De studio doctrinae physicae et eo libello qui de anima inscribitur;
Op. 34: De sudore cruento;
Op. 35: De surditate et mutitate;
Op. 36: Tractationes formularum medicarum;
Op. 37: De venarum ostioli;
Op. 38: Convocatio ad publicam magistrorum renunciationem.
Op. 39: Invitatio ad solennem candidatorum examinationem instituendam.
Op. 40: (Poem on functions of the Dean)
Op. 41: Responsio Decani.
Op. 42: Studiosis doctrinae physicae salutem.
Op. 43: Studiosos eius partis doctrinae physicae quae de Anima pertractat ...
Manuscripts.
